The Marriage of Heaven and Earth Marlin Watling, 2016-10-07 On the lookout for a mind-blowing new perspective on the nature of God and humanity's place in the world today? Dive into *The Marriage of Heaven and Earth*, and enter the mind of a veritable rock star of contemporary theology-N. T. Wright. Marlin Watling takes abstract and complex ideas and grounds them in simple terms through his unique combination of readable summaries and fifty accompanying illustrations. He distills a lifetime of complex theological analysis and data into easy-to-consume sketches with explanations to provide one thing: universal access to a brilliant mind. Watling's guide comprises four parts ♦ An introduction to N. T. Wright ♦ Summaries of Wright's four key concepts ♦ Wright's proposal of a new worldview ♦ An overview of humanity's mission, with an eye toward the end times Following in the footsteps of reformer Martin Luther, N. T. Wright makes the old story new again with his paradigm-shifting worldview. And in *The Marriage of Heaven and Earth*, Watling does something equally novel. He enters the ivory tower, strips away the pomp and ceremony of untouchable academia, and presents to believers of all interest levels Wright's theology as it's truly meant to be: easy to understand and full of grace.

Pop-Up Design and Paper Mechanics Duncan Birmingham, 2019-02-21 This comprehensive guide to pop-up design and paper mechanics is a delightful introduction to the intriguing aspects of a fascinating craft. This new and accessible approach to pop-up theory and practice distills the numerous mechanisms into a logical set of 18 underlying shapes and explains the techniques for building these shapes. The author demonstrates how sophisticated pop-up designs are constructed and shows how to form a three-dimensional reference book. Invaluable for both professional and amateur designers. Appeals to craft-hobby enthusiasts who make their own greeting cards, but is also a useful aid to teachers of art, design and technology, designers, illustrators and sculptors.

Mathematical Curiosities Gerald Jenkins, Magdalen Bear, 2000 All the colourful models in this collection, when cut out and glued together have curious and interesting

properties. Some rotate, some fold and unfold, some twist and others fit together in unexpected ways. A minibook is included which gives background information and further ideas.

Architectural Origami Ingrid Siliakus, María Victoria Garrido Bianchini, Joyce Aysta, 2009 With just a little skill in cutting and folding, you can make perfect miniature paper replicas of great architecture - small enough to fit into an envelope as a greetings card, beautiful enough to put on display. Architectural Origami offers easy-to-use templates for 15 structures, from the Taj Mahal to the Rialto Bridge, all demonstrated by leading architectural origami artists. There are basic principles to start you off and advanced guidance on designing buildings of your own, plus detailed architectural narratives and graphics describing the original buildings. A craft knife, pencil, a ruler and a cutting board are all you need to undertake this intriguing craft. You'll find it as absorbing as drawing and as reflective as origami. When you've absorbed all the basic principles and tried your hand at all the buildings in the book, you'll find that you've learned enough to start you off on designing origami architecture of your own. About the authors Maria Victoria Garrido Bianchini is an origamic architecture designer with a degree in Architecture and Urbanism, whose work has been exhibited in New York. Ingrid Siliakus has been an origamic architecture designer/artist for over ten years. Her work has been displayed in exhibitions all over the world.

Girl Waits With Gun Amy Stewart, 2015-09-01 NATIONAL BESTSELLER. The first in the Kopps Sisters Novel Series, *Girl Waits with Gun* is an enthralling novel based on the forgotten true story of one of the nation's first female deputy sheriffs. Constance Kopp doesn't quite fit the mold. She towers over most men, has no interest in marriage or domestic affairs, and has been isolated from the world since a family secret sent her and her sisters into hiding fifteen years ago. One day a belligerent and powerful silk factory owner runs down their buggy, and a dispute over damages turns into a war of bricks, bullets, and threats as he unleashes his gang on their family farm. When the sheriff enlists her help in convicting the men, Constance is forced to confront her past and defend her family — and she does it in a way that few women of 1914 would have dared. A New York Times Editors' Choice "A smart, romping adventure, featuring some of the most memorable and powerful female characters I've seen in print for a long time. I loved every page as I followed the Kopp sisters through a too-good-to-be-true (but mostly true!) tale of violence, courage, stubbornness, and resourcefulness."—Elizabeth Gilbert

Facts of Consciousness Johann Fichte, 2017-11-06 *Facts of Consciousness* (German: *Die Thatsachen des Bewusstseyns*) by Johann Gottlieb Fichte was originally published in 1817, and translated into English by Adolph Ernst Kroeger in 1868. The pathway from the world of sense to the world above sense is laid by the experimental knowledge of the human mind. The Facts of Consciousness must be investigated, for they are the measure of the true essence of the soul. These facts of consciousness are not, however, those of the ordinary psychologist. We must take the mind of humanity at large, in the fullness of its ideal life (theoretical, artistic, ethical, and religious), and in the might of its preternatural activity, as the real starting-point. In addition to this, we must weigh carefully even those facts which are rare and exceptional. These spring from a source lying within the region of preconsciousness. For the soul is preconscious and preexistent.
