Tigers in Combat Wolfgang Schneider,2020-09-01 • Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

Armored Car R. P. Hunnicutt,2015-09-15 The armored car has played a major role in American military operations since the relatively early days of the 20th Century. In 1989 Col. Royal P. Davidson arranged for the installation of a .30 caliber Colt machine gun on a Duryea light three-wheeled car. In doing so, he jump-started the development and production of armored fighting vehicles that have served in the American military ever since. Although the very first armored cars were merely outfitted with a gunshield, they were soon fully protected by armor plating. In this installment of R. P. Hunnicutt's 10-volume series on the history of American armored vehicles he details their early development through WWI, WWII, Korea, and Vietnam. Beginning with the development of armored cars on American soil at the outbreak of WWI-although none were ever shipped overseas-Hunnicutt goes on to describe the production of armored cars based on commercial car and truck chassis in the 1920s. These vehicles eventually reached limited production as the armored car M4. With detailed drawings and photographs to illustrate the history, Hunnicutt describes the development of the armored car T3, which was also

designated as scout car T1. The development of these lightweight scout cars, which met the needs of the cavalry, made the armored car unnecessary by 1937. Although production of armored cars stopped for the American military, American development continued on armored cars intended for British use. However, in 1942 as the Palmer Board decided to limit the weight of reconnaissance vehicles, the light armored car T22E2 was standardized as the M8 and put into production. The M8 and a variation, the M20, served in the U.S. Army until after the Korean War, with new models developed for use in Vietnam. Spanning the history of American wheeled combat vehicles, Hunnicutt's Armored Car is a must have for anyone with a keen interest in the history of American military operations and equipment.

Stuart Richard Pearce Hunnicutt, 2015-03-26 In *Stuart: A History of the American Light Tank (Vol. I)*, Richard Hunnicutt outlines the development history of the American light tank and its associated self-propelled guns and support vehicles. Beginning with the modification of the French Renault in the midst

of WWI, Stuart covers all pre-Stuart vehicles active during WWI in addition to light tank models and variations active during WWII, with emphasis on the wartime development of M3, M5, and M24 series of light tanks. A few other vehicles that are not technically light tanks, such as the M18 and LVT, also receive attention here as they share a number of key characteristics with the Stuart. In this comprehensive history, Hunnicutt also touches on postwar modifications and service of vehicles developed during WWII. In addition to detailing nearly all aspects of technical data and specifications, Stuart features images on nearly every page: photographs, full-color plates, line drawings, and cutaway diagrams, many of which are rare interior shots and diagrams from technical manuals. While Hunnicutt leaves the writing of the complete combat history of the Stuart to those who manned them in battle, he includes some of the Stuart's actions to demonstrate its uses in combat and attributes, both positive and negative. The definitive reference tome for the military historian, professional soldier, and tank restorer, Stuart remains the most comprehensive history on the American light tank's development from its beginnings through WWII. Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY.
