**Critical CALL – Proceedings of the 2015 EUROCALL Conference, Padova, Italy** Francesca Helm, Linda Bradley, Marta Guarda, Sylvie Thouësny, 2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term ‘critical’ has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become ‘naturalized’ and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Haptic Interaction Shoichi Hasegawa, Masashi Konyo, Ki-Uk Kyung, Takuya Nojima, Hiroyuki Kajimoto, 2017-07-06 This book comprises the proceedings of the second International Conference, AsiaHaptics 2016, held in Kashiwanoha, Japan. **Rethinking Engineering Education** Edward F. Crawley, Johan Malmqvist, Sören Östlund, Doris R. Brodeur, Kristina Edström, 2014-04-02 This book describes an approach to engineering education that integrates a comprehensive set of personal, interpersonal, and professional engineering skills with engineering disciplinary knowledge in order to prepare innovative and entrepreneurial engineers. The education of engineers is set in the context of engineering practice, that is, Conceiving, Designing, Implementing, and Operating (CDIO) through the entire lifecycle of engineering processes, products, and systems. The book is both a description of the development and implementation of the CDIO model and a guide to engineering programs worldwide that seek to improve the education of young engineers.

### **The Ascent of GIM, the Global Intelligent**

**Machine** Teun Koetsier, 2018-10-04 In the concluding chapters of this book the author introduces GIM, the Global Intelligent Machine. GIM is a huge global hybrid machine, a combination of production machinery, information machinery and mechanized networks. In the future it may very well encompass all machinery on the globe. The author discusses the development of machines from the Stone Age until the present and pays particular attention to the rise of the science of machines and the development of the relationship between science and technology. The first production and information tools were invented in the Stone Age. In the Agricultural empires tools and machinery became more complex. During and after the Industrial Revolution the pace of innovation accelerated. In the 20th century the mechanization of production, information processing and networks became increasingly sophisticated. GIM is the culmination of this development. GIM is no science fiction. GIM exists and is growing and getting smarter and smarter. Individuals and institutions are trying to control parts of this giant global robot. By looking at its history and by putting GIM in the context of the current developments, this book seeks to reach a fuller understanding of this phenomenon.

Learning Oriented Assessment Neil Jones, Nick Saville, Angeliki Salamoura, 2016-05-19 This volume outlines the general principles of Learning Oriented Assessment (LOA), placing it in the context of European language learning policy. The authors pose three key questions central to LOA:

'What is learning?' , 'What is to be learned?' and 'What is to be assessed?'. It focuses on the use of evidence, and how it can be collected and used to feed back into learning, overviews large-scale assessment as practised by Cambridge English and learning-oriented classroom assessment practices, and concludes with a look at implementing LOA in practice. With fresh insights into the role of assessment in supporting learning, this volume will be of considerable interest to assessment practitioners, teachers and academics, educational policy-makers and examination board personnel.

**Second Language Teaching and Learning with Technology: Views of Emergent Researchers** Sylvie Thouësny, Linda Bradley, 2011 The aim of this book was to present innovative applications of technology in second language teaching and learning, as well as to explore the transformation of the different techniques to different theoretical frameworks. It has also been desired to have a representation of researchers from different parts of the world as contributors. When the reviewing process was finished, there were nine selected chapters from seven different countries: Canada, Finland, France, Ireland, Spain, Sweden, and Singapore. Thus, the chapters of this book consist of the work of eleven young researchers within the field of net-based language learning. These nine chapters all deal with topical areas of Internet-based Computer-assisted language learning (CALL). Following Notes on Contributors, Acknowledgements, and Foreword, the following papers are included in this book: (1) Introduction on Views of Emergent Researchers in L2 Teaching and Learning with Technology (Sylvie Thouësny and Linda Bradley); (2) Personal Learning Environments in Higher Education Language Courses:

An Informal and Learner-Centred Approach (Ilona Laakkonen); (3) QuickAssist: Reading and Learning Vocabulary Independently with the Help of CALL and NLP Technologies (Peter Wood); (4) Self-Assessment and Tutor Assessment in Online Language Learning Materials: InGenio FCE Online Course and Tester (Ana Sevilla-Pavón , Antonio Martín ez-Sèz, and Jos Macario de Siqueira); (5) Mobile-Assisted Language Learning: Designing for Your Students (Agnieszka Palalas); (6) A Design for Intercultural Exchange--An Analysis of Engineering Students' Interaction with English Majors in a Poetry Blog (Linda Bradley, Berner Lindström , Hans Rystedt, and Magnus Gustafsson); (7) Developing Sociolinguistic Competence through Intercultural Online Exchange (Mathy Ritchie); (8) Second Language Learning by Exchanging Cultural Contexts through the Mobile Group Blog (Yinjuan Shao); (9) Dynamically Assessing Written Language: To what Extent Do Learners of French Language Accept Mediation? (Sylvie Thoussny); and (10) Computer-Mediated Negotiated Interactions: How is Meaning Negotiated in Discussion Boards, Text Chat and Videoconferencing? (Cédric Sarr). A name index is included. **Apocalyptic Islam and Iranian Shi'ism** Abbas Amanat, 2009-02-19 Interest in Shi'i Islam is running at unprecedented levels. International tensions over Iran, where the largest number of Shi'i Muslims live, as well as the political resurgence of the Shi'i in Iraq and Lebanon, have created an urgent need to understand the background, beliefs and motivations of this dynamic vision of Islam. Abbas Amanat is one of the leading scholars of Shi'ism. And in this powerful book, a showcase for some of his most influential writing in the field, he addresses the colourful and diverse history of Shi' Islam in both premodern and contemporary times. Focusing specifically on the importance of apocalypticism

in the development of modern Shi'i theology, he shows how an immersion in messianic ideas has shaped the conservative character of much Shi'i thinking, and has prevented it from taking a more progressive course. Tracing the continuity of apocalyptic trends from the Middle Ages to the present, Amanat addresses such topics as the early influence on Shi'ism of Zoroastrianism; manifestations of apocalyptic ideology during the Iranian Revolution of 1979; and the rise of the Shi'i clerical establishment during the 19th and 20th centuries. His book will be an essential resource for students and scholars of both religious studies and Middle Eastern history.

*A World of Indigenous Languages* Teresa L. McCarty, Sheilah E. Nicholas, Gillian Wigglesworth, 2019-03-13 Spanning Indigenous settings in Africa, the Americas, Aotearoa/New Zealand, Australia, Central Asia and the Nordic countries, this book examines the multifaceted language reclamation work underway by Indigenous peoples throughout the world. Exploring political, historical, ideological, and pedagogical issues, the book foregrounds the decolonizing aims of contemporary Indigenous language movements inside and outside of schools. Many authors explore language reclamation in their own communities. Together, the authors call for expanded discourses on language planning and policy that embrace Indigenous ways of knowing and forefront

grassroots language reclamation efforts as a force for Indigenous sovereignty, social justice, and self-determination. This volume will be of interest to scholars, educators and students in applied linguistics, Ethnic/Indigenous Studies, education, second language acquisition, and comparative-international education, and to a broader audience of language educators, revitalizers and policymakers.

*Book of Alexander* Peter Such, Richard Rabone, 2009 The *Libro de Alexandre* is an epic poem about the life of Alexander the Great, written by an anonymous Spanish cleric in the thirteenth century. It is the most substantial poem (and almost certainly the first) composed in the learned *cuaderna via verse* form and provides a unique insight into the intellectual world from which it sprang. The poem conveys the grim message of Alexander's life, the sense of hubris and the horror of his fall from greatness and world domination to the bleak obscurity of the grave. As well as relaying the story of a great ancient figure, the poet also comments on the society and political situation of early thirteenth-century Spain. The combination of eras makes this poem strikingly representative of its time. Peter Such and Richard Rathbone's edition in the *Hispanic Classics* series illuminates this substantial and important text, with a wide-ranging introduction, Spanish text with facing-page English translation and notes.
