Gastronomy Tourism World Tourism Organization (Unwto),2019-05-06 This report looks at the concept of gastronomy tourism in Japan and shows that activities of gastronomy tourism are being undertaken across the nation. It features 18 case studies, from local Sake breweries to hotel trains, showing how Japan has achieved turning gastronomy tourism into a tool for development, inclusion and regional integration.

Critical CALL - Proceedings of the 2015 EUROCALL Conference, Padova, Italy Francesca Helm,Linda Bradley,Marta Guarda,Sylvie Thouësny,2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term ‘critical’ has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become ‘naturalized’ and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Rethinking Engineering Education Edward F. Crawley,Johan Malmqvist,Sören Östlund,Doris R. Brodeur,Kristina Edström,2014-04-02 This book describes an approach to engineering education that integrates a comprehensive set of personal, interpersonal, and professional engineering skills with engineering disciplinary knowledge in order to prepare innovative and entrepreneurial engineers. The education of engineers is set in the context of engineering practice, that is, Conceiving, Designing, Implementing, and Operating (CDIO) through the entire lifecycle of

engineering processes, products, and systems. The book is both a description of the development and implementation of the CDIO model and a guide to engineering programs worldwide that seek to improve the education of young engineers.

Haptic Interaction Shoichi Hasegawa, Masashi Konyo, Ki-Uk Kyung, Takuya Nojima, Hiroyuki Kajimoto, 2017-07-06 This book comprises the proceedings of the second International Conference, AsiaHaptics 2016, held in Kashiwanoha, Japan. The book treats the state of the art of the diverse haptics (touch)-related research, including scientific research of haptics perception and illusion, development of haptics devices, and applications to a wide variety of fields such as education, medicine, telecommunication, navigation, and entertainment. This work helps not only active haptic researchers, but also general readers to understand what is going on in this interdisciplinary area of science and technology.

Business Innovation with New ICT in the Asia-Pacific: Case Studies Michitaka Kosaka, Jie Wu, Ke Xing, Shiyong Zhang, 2020-09-09 This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming services and businesses in the 21st century. "What is the direction of the business innovation using new ICT?" is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the

Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

Technological and Industrial Applications Associated with Intelligent Logistics Alberto Ochoa-Zezzatti, Diego Oliva, Angel Juan Perez, 2021 This book helps the reader to identify how different organizations in the context of diverse societies deploy their resources and leverage their capabilities to achieve better performance of its various labor skills, marketing, social responsibility and management capacity. Intelligent Logistics is a complex phenomenon that has become critical for companies to reach their development locally and internationally. On the one hand, macro-factors and market structure influence in business competitiveness, but also in a regional or sector context. The internal aspects and the use of various business tools contribute to the ability to create value in an organization. It is of utmost importance to understand the relevance of crucial aspects in the technological future that should be known and implemented by the Z generation of its incidence in the use of organizational models linked to artificial intelligence. Every innovative aspect in the use of new technologies for the distribution of goods and services will be crucial in a globalized world. An avant-garde society will require improved decision-making regarding Logistics 4.0 and its implementation in our lives respecting the environment and being sustainable together with

invaluable principles of generating tacit knowledge for future generations. .

Human Interface and the Management of Information. Interacting with Information Michael J. Smith, Gavriel Salvendy, 2011-06-24 This two-volume set LNCS 6771 and 6772 constitutes the refereed proceedings of the Symposium on Human Interface 2011, held in Orlando, FL, USA in July 2011 in the framework of the 14th International Conference on Human-Computer Interaction, HCII 2011 with 10 other thematically similar conferences. The 137 revised papers presented in the two volumes were carefully reviewed and selected from numerous submissions. The papers accepted for presentation thoroughly cover the thematic area of human interface and the management of information. The 75 papers of this first volume address the following major topics: design and development methods and tools; information and user interfaces design; visualisation techniques and applications; security and privacy; touch and gesture interfaces; adaption and personalisation; and measuring and recognising human behavior.

What is Japanese Architecture? Kazuo Nishi, Kazuo Hozumi, 2012-05-01 Traditional Japanese architecture—whether Buddhist temples or Shinto shrines, residences, castles, or teahouses—has become increasingly familiar around the world. Through the media of motion pictures, art books, T.V. documentaries and dramas such as *Shogun*, as well as through personal experience, more and more people have gained an acquaintance and appreciation of the architecture of premodern Japan. Some may even be able to name or recognize the oldest and the largest wooden structures in existence, which are to be found in Japan at Horyuji and Todaiji respectively. Yet often this knowledge is still rudimentary. Confusion abounds as to what distinguishes Japanese architecture from Chinese or Korean, or even Southeast Asian, not to mention what sets off a Buddhist temple from a Shinto shrine or, say, a residence of the tenth century from one of the eighteenth. Until now,

there has been no recourse for those seeking, through a single book, to increase their appreciation of the whole range of traditional Japanese architecture. With the publication of *What Is Japanese Architecture?*, however, this situation has finally been rectified. Construction, design, carpentry, and the background of Japanese architecture, from prehistory to mid-nineteenth century, are here made available within the covers of a single, compact book. With over 300 drawings that illuminate the essentials of discussion more concretely than words could ever do, and a text that is succinct and always to the point, the book is divided into four parts—one each dealing chronologically with religious structures, residences, castles, and places of entertainment. The reader learns not only how each of these fields of architecture has evolved over the centuries and what distinguishes the buildings of one age from those of another, but something of the historical conditions and the people responsible for these changes as well as the role played by carpentry and methods of construction. The establishment and growth of the historic Japanese capitals—Nara, Kyoto, Edo—is brought sharply into focus, along with the rise and spread of other urban centers. Also highlighted are the mansions of the court nobility; the castles and residences of the samurai aristocracy; the homes of village elders; dwellings of the common people; educational institutions, and places of entertainment such as theaters, red-light districts, teahouses, and country villas. Any book that is as full of information as this, and readily accessible and clearly illustrated at the same time, will be of great interest and use to a wide range of people—architects, designers, historians, carpenters, movie buffs, tourists, garden designers, and others, whether amateur or professional. Whatever the readers' background, there is little doubt about one thing: they will emerge with an acuter eye and a greater sensitivity to the delights of traditional Japanese architecture.

Edutainment Technologies. Educational Games and Virtual Reality/Augmented Reality

Applications Maiga Chang, Wu-Yuin Hwang, Ming-Puu Chen, Wolfgang Mueller, 2011-08-19 This book constitutes the refereed proceedings of the 6th International Conference on E-learning and Games, Edutainment 2011, held in Taipeh, Taiwan, in September 2011. The Ascent of GIM, the Global Intelligent Machine Teun Koetsier, 2018-10-04 In the concluding chapters of this book the author introduces GIM, the Global Intelligent Machine. GIM is a huge global hybrid machine, a combination of production machinery, information machinery and mechanized networks. In the future it may very well encompass all machinery on the globe. The author discusses the development of machines from the Stone Age until the present and pays particular attention to the rise of the science of machines and the development of the relationship between science and technology. The first production and information tools were invented in the Stone Age. In the Agricultural empires tools and machinery became more complex. During and after the Industrial Revolution the pace of innovation accelerated. In the 20th century the mechanization of production, information processing and networks became increasingly sophisticated. GIM is the

culmination of this development. GIM is no science fiction. GIM exists and is growing and getting smarter and smarter. Individuals and institutions are trying to control parts of this giant global robot. By looking at its history and by putting GIM in the context of the current developments, this book seeks to reach a fuller understanding of this phenomenon.

Embedded Racism Debito Arudou, 2021-11-26 Revised and updated for this Second Edition, Embedded Racism is the product of three decades of work by a scholar living in Japan as a naturalized Japanese citizen. It offers a perspective into how Japan's overlooked racial discrimination not only undermines Japan's economic future but also emboldens white supremacists worldwide.

Tropospheric Ozone Ivar S.A. Isaksen, 1988-02-29 The main objective of the workshop was to increase our knowledge of ozone formation and distribution in the troposphere, its relation to precursor (NO_x and HC species) distribution, how it is affected by transport processes in the troposphere, and to show how the increasing levels of ozone can cause environmental problem. The focus was on the interaction of ozone on regional and global scales. There is mounting evidence that such interactions occur and that the ozone levels are increasing in most of the Northern Hemisphere troposphere. A likely source of ozone increase is human activity. As result of this, tropospheric climate may change significantly within a few decades, either through direct effects by ozone itself or indirectly through its effect on other radiatively active trace species. Further more, ozone may have adverse effects on vegetation over large continental areas due to enhanced levels which have been measured to take place. As it is well known that ozone plays a key role in the oxidation of a large number of chemical species in the troposphere, natural as well as man-made, the atmospheric distribution of important trace species like sulfur dioxide, nitrogen oxides and hydrocarbons could be markedly changed as a result of ozone changes. The rapidly increasing interest in tropospheric

ozone, and the key role ozone plays in several atmospheric areas as well the obvious increase in the tropospheric concentration of ozone made ozone a natural choice as a topic for the workshop.

Future Forms and Design For Sustainable Cities Mike Jenks,Nicola Dempsey,2006-08-11
Concentrating on the planning and design of cities, the three sections take a logical route through the discussion from the broad considerations at regional and city scale, to the larger city at high and lower densities through to design considerations on the smaller block scale. Key design issues such as access to facilities, access for sunlight, life cycle analyses, and the impact of communications on urban design are tackled, and in conclusion, the research is compared to large scale design examples that have been proposed and/or implemented over the past decade to give a vision for the future that might be achievable.

The Social Teaching of the Christian Churches Ernst Troeltsch,1992-01-01 In this landmark work, Ernst Troeltsch offers a history of Christian ethics. This expansive volume relates Christian ethical ideas to the changing structures of church and society from the period of early Christianity to the end of the eighteenth century. Troeltsch's classic work, first published in 1931, continues to speak to the present condition of the church and culture. The Library of Theological Ethics series focuses on what it means to think theologically and ethically. It presents a selection of important and otherwise unavailable texts in easily accessible form. Volumes in this series will enable sustained dialogue with predecessors though reflection on classic works in the field.

Reinventing the Propeller Jeremy R. Kinney,2017-03-24 An international community of specialists reinvented the propeller during the Aeronautical Revolution, a vibrant period of innovation in North America and Europe from World War I to the end of World War II. They experienced both success and failure as they created competing designs that enabled increasingly

sophisticated and 'modern' commercial and military aircraft to climb quicker and cruise faster using less power. Reinventing the Propeller nimbly moves from the minds of these inventors to their drawing boards, workshops, research and development facilities, and factories, and then shows us how their work performed in the air, both commercially and militarily. Reinventing the Propeller documents this story of a forgotten technology to reveal new perspectives on engineering, research and development, design, and the multi-layered social, cultural, financial, commercial, industrial, and military infrastructure of aviation.

Sustainable City Regions: Tetsuo Kidokoro, Noboru Harata, L.P. Subanu, J. Jessen, A. Motte, E.P. Seltzer, 2008-08-27 How should regional cities develop regional development strategies for their sustainable future? How can such strategies work effectively? Regional cities are now at a crossroads: will they decline or be regenerated under the impacts of globalization? Their sustainable regeneration as creative regional centers will play a decisive role in their sustainable development as a whole, but only with viable regional spatial strategies that strengthen the network of cities and their hinterlands. The concern here lies in urban regeneration and strategic spatial planning at the city-region level. This book records observations of 12 dynamically changing regional cities in Asia, Europe and the United States. The form of the city region, urban regeneration and strategic spatial planning as well as the local and regional governance of each city are examined. Through this empirical and comparative analysis, essential lessons are drawn, which will add a new perspective to discussions on the sustainable future of regional cities in an age of globalization.

Second Language Teaching and Learning with Technology: Views of Emergent Researchers Sylvie Thouësny, Linda Bradley, 2011 The aim of this book was to present innovative applications of technology in second language teaching and learning, as well as to explore the transformation of the different techniques to different theoretical frameworks. It has also been desired to have a representation of researchers from different parts of the world as contributors. When the reviewing process was finished, there were nine selected chapters from seven different countries: Canada, Finland, France, Ireland, Spain, Sweden, and Singapore. Thus, the chapters of this book consist of the work of eleven young researchers within the field of net-based language learning. These nine chapters all deal with topical areas of Internet-based Computer-assisted language learning (CALL). Following Notes on Contributors, Acknowledgements, and Foreword, the following papers are included in this book: (1) Introduction on Views of Emergent Researchers in L2 Teaching and Learning with Technology (Sylvie Thouësny and Linda Bradley); (2) Personal Learning Environments in Higher Education Language Courses: An Informal and Learner-Centred Approach

(Ilona Laakkonen); (3) QuickAssist: Reading and Learning Vocabulary Independently with the Help of CALL and NLP Technologies (Peter Wood); (4) Self-Assessment and Tutor Assessment in Online Language Learning Materials: InGenio FCE Online Course and Tester (Ana Sevilla-Pavón, Antonio Martínez-Sèz, and Jos Macario de Siqueira); (5) Mobile-Assisted Language Learning: Designing for Your Students (Agnieszka Palalas); (6) A Design for Intercultural Exchange--An Analysis of Engineering Students' Interaction with English Majors in a Poetry Blog (Linda Bradley, Berner Lindström, Hans Rystedt, and Magnus Gustafsson); (7) Developing Sociolinguistic Competence through Intercultural Online Exchange (Mathy Ritchie); (8) Second Language Learning by Exchanging Cultural Contexts through the Mobile Group Blog (Yinjuan Shao); (9) Dynamically Assessing Written Language: To what Extent Do Learners of French Language Accept Mediation? (Sylvie Thoussny); and (10) Computer-Mediated Negotiated Interactions: How is Meaning Negotiated in Discussion Boards, Text Chat and Videoconferencing? (Cédric Sarr). A name index is included. (Individual papers contain references.).
