Street Art NYC Lord K2,Lois Stavsky,2022-04-15 The birthplace of graffiti, New York City, has evolved into a global center for street art. Its public surfaces host a range of media from handmade stickers and wheatpastes to huge installations and murals. Artists from across the globe routinely travel to New York City to grace its walls as they refashion the city into one huge never-ending unofficial street art festival. Among these are such contemporary urban legends as D'Face, Banksy, Os Gemeos, Case, MaClaim, Invader, Stik and Faith 47. Street Art NYC showcases both sanctioned and unsanctioned works captured in the course of a transformative decade that saw the emergence of over a dozen distinctly engaging projects. The hugely popular Bushwick Collective, L.I.S.A Project NYC and Welling Court Mural Project are highlighted with introductory essays. Local community-based projects and festivals, as well as those responding to specific environmental and social issues, are also represented. Banksy's one month 2013 residency, *Better Out than In* is documented with words and images. And homage is paid to the legendary 5 Pointz graffiti and street art mecca. Street Art NYC is a beautifully designed hardcover book. The full color photographs by Lord K2 captures the art in the city, printed on thick coated paper, and Lois Stavsky's text provides the context. This is the only book to spotlight the transformational decade that marked the shift from largely unsanctioned to widely curated street art throughout New York City's five boroughs. This book is a collaboration between Lord K2, an award-winning photographer and curator of the online Museum of Urban Art and Lois Stavsky, a noted street art documentarian and editor of the popular

blog, Street Art NYC.

Evaluation of Cellulose Ethers for Conservation

Robert L. Feller, Myron H. Wilt, 1991-03-21 This report is the result of a three-year research program. It describes the chemical character of cellulose ethers as a general class of polymers and establishes an approximate ranking of the relative stability of each generic chemical subclass. Ranking the thermal stability of the polymers with respect to color change and loss in degree of polymerization led to the conclusion that as generic chemical classes, methylcellulose and carboxymethylcellulose appear to be the most stable of the cellulose ethers. Water-soluble ethylhydroxyethylcellulose apparently also possesses good stability. Of questionable long-term stability are hydroxyethylcellulose and hydroxy- propylcellulose. Ethylcellulose and organic-soluble ethylhydroxyethylcellulose proved to be of poor stability, potentially undergoing marked changes in twenty years or less under normal museum conditions. An important additional conclusion reached here, as well as in an earlier investigation, is that considerable variations in stability can occur within a generic chemical class from differences in the basic raw material, a natural product from plants, which is not a uniform, manufactured, chemical substance. Further variations can exist due to different manufacturing processes or commercial sources. Hence, commercial products must be evaluated individually to determine the most stable of a given generic type. Nonetheless, the authors believe the conclusions expressed here to be valid with regard to the relative stability of the generic chemical classes of cellulose ethers.

The Spoonflower Handbook Stephen Fraser, Judi Ketteler, 2015-09-01 An accessible guide to understanding and using Spoonflower to design your own fabric, wallpaper,

and gift wrap. Designing fabric, wallpaper, and gift wrap used to be the stuff of dreams. Only a few select creatives got to do it, and it required formal training and significant financial investment. But times have changed, and today anyone with a computer, Internet connection, and idea can upload a file and order their own fabric or paper, printed affordably one yard or more at a time. At the forefront of this revolutionary DIY movement is Spoonflower, a North Carolina startup that produces designs for hundreds of thousands of users worldwide—twenty-four hours a day/seven days a week to keep up with demand. With step-by-step tutorials and projects that span a wide spectrum of skills, *The Spoonflower Handbook* is written for both new and experienced users of this print-on-demand technology. Covering everything from equipment to software to working with photos, scans, repeats, vector files, and more, it is an essential guide to a booming new creative outlet.

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on

issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Thing Around Your Neck Chimamanda Ngozi Adichie, 2010-06-01 These twelve dazzling stories from Chimamanda Ngozi Adichie — the Orange Broadband Prize-winning author of *Half of a Yellow Sun* — are her most intimate works to date. In these stories Adichie turns her penetrating eye to the ties that bind men and women, parents and children, Nigeria and the United States. In “A Private Experience,” a medical student hides from a violent riot with a poor Muslim woman, and the young mother at the centre of “Imitation” finds her comfortable life in

Philadelphia threatened when she learns that her husband has moved his mistress into their Lagos home. Searing and profound, suffused with beauty, sorrow and longing, this collection is a resounding confirmation of Adichie's prodigious literary powers.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

The Participatory Museum Nina Simon, 2010 Visitor participation is a hot topic in the contemporary world of museums, art galleries, science centers, libraries and cultural organizations. How can your institution do it and do it well? The Participatory Museum is a practical guide to

working with community members and visitors to make cultural institutions more dynamic, relevant, essential places. Museum consultant and exhibit designer Nina Simon weaves together innovative design techniques and case studies to make a powerful case for participatory practice. Nina Simon's new book is essential for museum directors interested in experimenting with audience participation on the one hand and cautious about upending the tradition museum model on the other. In concentrating on the practical, this book makes implementation possible in most museums. More importantly, in describing the philosophy and rationale behind participatory activity, it makes clear that action does not always require new technology or machinery. Museums need to change, are changing, and will change further in the future. This book is a helpful and thoughtful road map for speeding such transformation. - Elaine Heumann Gurian, international museum consultant and author of *Civilizing the Museum* This book is an extraordinary resource. Nina has assembled the collective wisdom of the field, and has given it her own brilliant spin. She shows us all how to walk the talk. Her book will make you want to go right out and start experimenting with participatory projects. -Kathleen McLean, participatory museum designer and author of *Planning for People in Museum Exhibitions* I predict that in the future this book will be a classic work of museology. --Elizabeth Merritt, founding director of the Center for the Future of Museums

Isa Genzken Søren Grammel, 2020-10 Isa Genzken ? Works from 1973 until 1983 is dedicated to the artist's early oeuvre. The publication opens with works from her time as a student at the Düsseldorf Academy of Fine Arts (1973-1977) and details the evolution of her art up to 1983. The works shown include sculptures, computer printouts, extensive series of drawings, photographs and films. The artist blends conceptual approaches with personal themes; many works that initially seem to be exercises in geometric abstraction prove upon closer examination to be traces of her own existence, telling stories of personal relationships and the vagaries of desire. Her work during this period also responds to Minimalism and Conceptual Art, two dominant approaches in America and Western Europe at the time. Essays by Simon Baier, Jutta Koether, and Griselda Pollock examine various aspects of Genzken's body of work.00Exhibition: Kunstmuseum Basel, Switzerland (05.09.2020 - 24.01.2021 / Kunstsammlung Nordrhein-Westfalen, Düsseldorf, Germany (2021).

Handbook of Pressure-Sensitive Adhesives and Products Istvan Benedek, Mikhail M. Feldstein, 2019-07-05 Divided into three sections that are also available as individual volumes, this is the first reference to offer a complete guide to the fundamentals, manufacturing, and applications of pressure-sensitive adhesives and products. An indispensable source of state-of-the-art information, this handbook covers the design for pressure-sensitive adhesives and products, the manufacture technology and equipment for such products, including their testing and application, and the theory and practice that correlate with

the main domains of product development. Topically organized, it presents a comprehensive list of terms and definitions and offers a cross-disciplinary look at pressure-sensitive adhesives, spanning such areas as physics, surface chemistry, electronic materials, automotive engineering, packaging, and the biomedical, tape, and label industries. For more complete information on each volume visit www.crcpress.com or go directly to the webpage:

Colored Pencil Portraits Step by Step Ann

Kullberg, 1999-03-15 Portraits not only capture a likeness, but offer for generations to come a glimpse into the subject's life. Sounds like quite a challenge. But with Ann Kullberg's help, it's not as difficult as you might think to create lifelike colored pencil portraits. Using her own beautiful portraiture for instruction and inspiration, Kullberg walks you through the process step by step—from basic information about materials and techniques to two demonstrations that show how complete portraits come together from beginning to end. You'll learn how to:

- choose the right tools and master basic techniques
- compose a portrait—examples show right and wrong ways to do it
- use light to create mood in your portraits
- create a range of rich, believable skin tones
- paint the face—step-by-steps of eyes, mouth, nose and ears make it easy
- paint realistic-looking clothing—step-by-step demos show you how to paint denim, velvet and other fabrics

You'll also find Kullberg's secrets for making your portrait come alive, along with 17 mini-demos that make it easy to paint realistic features, hair and clothing. Inside is everything you need to get started, as well as advice and important information on painting portraits professionally!

Exile and Pride Eli Clare, 2015-07-15 First published in 1999, the groundbreaking *Exile and Pride* is essential to the history and future of disability politics. Eli Clare's revelatory writing about his experiences as a white disabled genderqueer activist/writer established him as one of the leading writers on the intersections of queerness and disability and permanently changed the landscape of disability politics and queer liberation. With a poet's devotion to truth and an activist's demand for justice, Clare deftly unspools the multiple histories from which our ever-evolving sense of self unfolds. His essays weave together memoir, history, and political thinking to explore meanings and experiences of home: home as place, community, bodies, identity, and activism. Here readers will find an intersectional framework for understanding how we actually live with the daily hydraulics of oppression, power, and resistance. At the root of Clare's exploration of environmental destruction and capitalism, sexuality and institutional violence, gender and the body politic, is a call for social justice movements that are truly accessible to everyone. With heart and hammer, *Exile and Pride* pries open a window onto a world where our whole selves, in all their complexity, can be realized, loved, and embraced.

The Evolution of Useful Things Henry Petroski, 2010-12-01 How did the table fork acquire a fourth tine? What advantage does the Phillips-head screw have over its single-grooved predecessor? Why does the paper clip look the way it does? What makes Scotch tape Scotch? In this delightful book Henry, Petroski takes a microscopic look at artifacts that most of us count on but rarely

contemplate, including such icons of the everyday as pins, Post-its, and fast-food clamshell containers. At the same time, he offers a convincing new theory of technological innovation as a response to the perceived failures of existing products—suggesting that irritation, and not necessity, is the mother of invention.

Handbook of Adhesive Technology, Revised and Expanded Antonio Pizzi, Kashmiri L. Mittal, 2003-08-06 The Handbook of Adhesive Technology, Second Edition exceeds the ambition of its bestselling forerunner by reexamining the mechanisms driving adhesion, categories of adhesives, techniques for bond formation and evaluation, and major industrial applications. Integrating modern technological innovations into adhesive preparation and application, this greatly expanded and updated edition comprises a total of 26 different adhesive groupings, including three new classes. The second edition features ten new chapters, a 40-page list of resources on adhesives, and abundant figures, tables, equations.
