White Boots William Pitt Root, 2006 A compendium of poems about the Western United States by the esteemed poet William Pitt Root

British Spy Fiction and the End of Empire Sam Goodman, 2015-06-05 The position of spy fiction is largely synonymous in popular culture with ideas of patriotism and national security, with the spy himself indicative of the defence of British interests and the preservation of British power around the globe. This book reveals a more complicated side to these assumptions than typically perceived, arguing that the representation of space and power within spy fiction is more complex than commonly assumed. Instead of the British spy tirelessly maintaining the integrity of Empire, this volume illustrates how spy fiction contains disunities and disjunctions in its representation of space, and the relationship between the individual and the state in an era of declining British power. Focusing primarily on the work of Graham Greene, Ian Fleming, Len Deighton, and John le Carre, the volume brings a fresh methodological approach to the study of spy fiction and Cold War culture. It presents close textual analysis within a framework of spatial and sovereign theory as a means of examining the cultural impact of decolonization and the shifting geopolitics of the Cold War. Adopting a thematic approach to the analysis of space in spy fiction, the text explores the reciprocal process by which contextual history intersects with literature throughout the period in question, arguing that spy fiction is responsible

for reflecting, strengthening and, in some cases, precipitating cultural anxieties over decolonization and the end of Empire. This study promises to be a welcome addition to the developing field of spy fiction criticism and popular culture studies. Both engaging and original in its approach, it will be important reading for students and academics engaged in the study of Cold War culture, popular literature, and the changing state of British identity over the course of the latter twentieth century.

The Vega Adventures Shane Granger, 2015-07-01 Early in 1892, one of Norway's finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. With thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world's most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship restoration, and bush pilot, he has always

come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.

Aliens: Kidnapped Jim Woodring, 1999-03-09 In the dark reaches of the universe lies a remote planet that holds both forbidden pleasures and unspeakable horrors. For three naive smugglers, it's also a place to unload a deadly cargo: an Alien egg. But something about this particular egg is scaring off the black marketeers. And when it hatches, the nightmare will have just begun.

Drink to Yesterday Manning Coles, 2022-08-10 This work tells the story of Michael Kingston, who was drafted into the secret service under Hambledon when he was seventeen. Together, they planned the murder of a scientist breeding cholera germs, setting fire to a Zepp plant, and the killing of Bodenheim. The death of Hambledon and a German girl brought the wheel of murder full circle, and Kingston found himself tormented, unable to come to hold with himself or his life.

The Science of James Bond Lois H. Gresh, Robert Weinberg, 2008-04-21 The science behind the gadgets, exploits, and enemies of the world's greatest spy From the sleek Aston Martin that spits out bullets, nails, and passengers at the push of a button to the microjet that makes hairpin turns to avoid a heat-seeking missile, the science and technology of James Bond films have kept millions of movie fans guessing for decades. Are these amazing feats and gadgets truly possible? The Science of James Bond takes you on a fascinating excursion through the true science that underlies Bond's most fantastic and off-the-wall accoutrements. The acclaimed science-fiction authors Lois Gresh and Robert Weinberg provide a highly entertaining, informative look at the real-world achievements and brilliant imaginations behind such singular Bond gadgets as the buzz-saw Rolex, the car that turns into a submarine, and the ever-popular rocket-firing cigarette. They examine hundreds of Q Division's

ingenious inventions; analyze Bond's astonishing battles beneath the earth and sea, in the skies, and even in outer space; and ask intriguing questions that lead to enlightening discussions about the limits of science, the laws of nature, and the future of technology. Filled with entertaining anecdotes from Bond movie shoots and supplemented with tech ratings for all of the Bond movies, *The Science of James Bond* separates scientific fact from film fantasy--with some very surprising results.

Escape to Hell and Other Stories Muammar Qaddafi, 1998 In the present texts, aside from the views as a revolutionary and a prophet, we discover Quaddafi as a writer and an essayist.

Rational Fears Mark Jancovich, 1996 This re-assessment of 1950s American horror films relates them to the cultural debates of the period and to other examples of the horror genre: novels and comics.

Cover Stories (Routledge Revivals) Michael Denning, 2014-07-11 First published in 1987, this title tracks the spy thriller from John Buchanan to Eric Ambler, Ian Fleming and John Le Carré, and shows how these tales of spies, moles, and the secret service tell a history of modern society, translating the political and cultural transformations of the twentieth century into the intrigues of a shadow world of secret agents. Combining cultural history with narrative analysis, *Cover Stories* explores the two main traditions of the thriller: the thriller of the work, in which bureaucratic routines are invested with political meaning; and the thriller of leisure, in

which the sports and games that kill time become a time of dangerous political contests. Examining the characteristic narrative structures of the spy novel – the adventure formulas and the plots of betrayal, disguise and doubles – Denning shows how they attempt to resolve crises and contradictions in ideologies of nation and empire, and of class and gender.

James Bond Henry Chancellor, 2005 For over half a century, the Bond novels have entertained millions around the world. 007 has been a cultural phenomenon since the first publication of *Casino Royale* in 1953. But no book has celebrated Fleming's literary Bond in his own right. This is an authoritative and entertaining journey through the world of the original James Bond, from Moscow to Mayfair, the bedroom to the war-room, the casino to the villain's lair. Ian Fleming's archive has released never-before seen documents and material to create this book. Sources include research notes and diaries to annotated manuscripts and ephemera from Fleming's files. Illustrated with classy, contemporary images, the book is a visual feast, but it is also engaging, with a rigorous and satisfying text. It recaptures the glamour of an age, and offers a new insight into the twentieth century's most thrilling literary hero.

Bond and Beyond Tony Bennett, Janet Woollacott, 1987

The British Spy Novel John Alfred Atkins, 1984

Horse Under Water Len Deighton, 2021-04-29 'The poet of the spy story'
Sunday Times A sunken U-Boat has lain undisturbed on the Atlantic ocean floor

since the Second World War - until now. Inside its rusting hull, among the corpses of top-rank Nazis, lie secrets people will kill to obtain. The sequel to Len Deighton's game-changing debut *The IPCRESS File*, *Horse Under Water* sees its nameless, laconic narrator sent from fogbound London to the Algarve, where he must dive through layers of deceit in a place rotten with betrayals.

Fictions of India Peter Morey, 2000 *Fictions of India* explores the relation of narrative technique to issues of power in the work of selected writers dealing with India. It examines the imperial context in which the writers operate and suggests how historical and ideological assumptions and anxieties may be read into the texts they produce. The study combines aspects of colonial and post-colonial debate with narrative theories to illuminate the work of these writers operating on either side of an epistemological divide formed by Indian independence in 1947. The book focuses largely on British writers on India with chapters on Kipling, E.M. Forster, John Masters, J.G. Farrell and Paul Scott. A final, comparative chapter traces the issues of narrative and power in the work of two post-independence Indian writers - Khushwant Singh and Rohinton Mistry - and deals with the burden of storytelling in a post-colonial situation still fraught with communal and neo-colonial abuses. This book is an important contribution to our understanding of how narrative fiction can reflect and confirm, but also contest and dismantle discourses of power. Features* Offers new interpretations of well-known texts and writers* Suggests an agenda for

studying new and less well-known texts to examine the play of narrative and power more generally* Demonstrates possible relations between narrative technique and those larger narratives which feed into the operation of political power* Challenges exclusivist readings which have often asserted 'the colonial' and 'the post-colonial' to be antithetical and mutually exclusive discursive entities

British Propaganda and News Media in the Cold War John Jenks, 2006-04-19
This is a study of the British state's generation, suppression and manipulation of news to further foreign policy goals during the early Cold War. Bribing editors, blackballing 'unreliable' journalists, creating instant media experts through provision of carefully edited 'inside information', and exploiting the global media system to plant propaganda--disguised as news--around the world: these were all methods used by the British to try to convince the international public of Soviet deceit and criminality and thus gain support for anti-Soviet policies at home and abroad. Britain's shaky international position heightened the importance of propaganda. The Soviets and Americans were investing heavily in propaganda to win the 'hearts and minds' of the world and substitute for increasingly unthinkable nuclear war. The British exploited and enhanced their media power and propaganda expertise to keep up with the superpowers and preserve their own global influence at a time when British economic, political and military power was sharply declining. This activity directly

influenced domestic media relations, as officials used British media to launder foreign-bound propaganda and to create the desired images of British 'public opinion' for foreign audiences. By the early 1950s censorship waned but covert propaganda had become addictive. The endless tension of the Cold War normalized what had previously been abnormal state involvement in the media, and led it to use similar tools against Egyptian nationalists, Irish republicans and British leftists. Much more recently, official manipulation of news about Iraq indicates that a behind-the-scenes examination of state propaganda's earlier days is highly relevant. John Jenks draws heavily on recently declassified archival material for this book, especially files of the Foreign Office's anti-Communist Information Research Department (IRD) propaganda agency, and the papers of key media organisations, journalists, politicians and officials. Readers will therefore gain a greater understanding of the depth of the state's power with the media at a time when concerns about propaganda and media manipulation are once again at the fore.

Ultimate Physics Scientific American Editors, 2016-07-11 The fundamental outlines of the physical world, from its tiniest particles to massive galaxy clusters, have been apparent for decades. Does this mean physicists are about to tie it all up into a neat package? Not at all. Just when you think you're figuring it out, the universe begins to look its strangest. This eBook, "Ultimate Physics: From Quarks to the Cosmos," illustrates clearly how

answers often lead to more questions and open up new paths to insight. We open with "The Higgs at Last," which looks behind the scenes of one of the most anticipated discoveries in physics and examines how this "Higgs-like" particle both confirmed and confounded expectations. In "The Inner Life of Quarks," author Don Lincoln discusses evidence that quarks and leptons may not be the smallest building blocks of matter. Section Two switches from the smallest to the largest of scales, and in "Origin of the Universe," Michael Turner analyzes a number of speculative scenarios about how it all began. Another two articles examine the mystery of dark energy and some doubts as to whether it exists at all. In the last section, we look at one of the most compelling problems in physics: how to tie together the very small and the very large – quantum mechanics and general relativity. In one article, Stephen Hawking and Leonard Mlodinow argue that a so-called "theory of everything" may be out of reach, and in another, David Deutsch and Artur Ekert question the view that quantum mechanics imposes limits on knowledge, arguing instead that the theory has an intricacy that allows for new, practical technologies, including powerful computers that can reach their true potential.

The Audit of War Correlli Barnett, 2011-07 Correlli Barnett described his Audit of War as an 'operational study' to 'uncover the causes of Britain's protracted decline as an industrial country since the Second World War.' First published in 1986, the book swiftly became one of the most

controversial and influential historical works of its time. '[The Audit of War] argued that British industry during the Second World War was scandalously inefficient, a situation Barnett blamed on an establishment more concerned with welfare than with industry, technology or the capacity of the nation to fight a war... Alan Clark records approvingly that Mrs Thatcher herself read it...' David Edgerton, London Review of Books 'A stimulating polemic.' Times Literary Supplement 'A formidable book, essential reading.' Asa Briggs, Financial Times

Cloak-and-dagger Bibliography Myron J. Smith, 1976 This book is an alphabetical--arranged volume of selected spy--adventure--intrigue novels written between the years 1937 and mid 1975. -- page x.
