Were there Vikings in Finland? *Fibula, Fabula, Fact - The Viking Age in Finland* is intended to provide essential foundations for approaching the Viking Age in Finland. The volume consists of a general introduction followed by nineteen chapters and a closing discussion. The nineteen chapters are oriented to provide introductions to the sources, methods and perspectives of diverse disciplines. Discussions are presented from fields including archaeology, folklore studies, genetics, geopolitics, historiography, language history, linguistics, palaeobotany, semiotics and toponymy. Each chapter is intended to help open the resources and the history of discourse of the particular discipline in a way that will be accessible to specialists from other fields, specialists from outside Finland, and also to non-specialist readers and students who may be more generally interested in the topic.

Sylvia Plath's Lady Lazarus - Cultural and Social Context Anne Runkel,2009-05 Seminar paper from the year 2008 in the subject American Studies - Literature, grade: keine, University of Hamburg, course: American Poetry & Poetics, language: English, abstract: The name of Sylvia Plath is intrinsically tied to the literary movement of Confessional Poetry. Her poem *Lady Lazarus* is often regarded as the prime example of this genre, as it is an

apparent forecast of Plath's suicide (Middlebrook 644) only one year later. But the idea of a 'confessional' poetry that directly refers to the poet's personal experience has lead Plath-Criticism astray for many years. Critics have discussed Plath's life and work as if they were exactly the same thing, and have drawn bizarre conclusions by assuming that Plath's writing can be used as a reliable source for diagnosing her mental condition.. It is obvious that this kind of immediate understanding of Confessional Poetry leads nowhere. As Tracy Brain puts it, in her essay about the dangers of reading Sylvia Plath's work as an unfiltered outpour of personal experience (Dangerous Concessions: Sylvia Plath): How can we ever hope to distinguish the extreme diction and address that is prompted by lived events from a vividly imagined drama that is the result of an expertly assumed style? The answer is: We cannot. Still, one should not altogether ignore the context of the Confessional movement when interpreting Sylvia Plath. But how can Confessional Poetry be dealt with, without getting caught in the traps and pitfalls of a biographic reading? This essay will first try to detect the underlying principles of the so-called 'Confessional Poetry' and position it within literary history. By revealing some of the influences and conventions of Confessional Poetry it aims to uncover the deceiving strategies of this type of poetry. The subsequent interpretation of Sylvia Plath's Lady Lazarus will then try to concentrate on the cultural and social context the poem was produce in and examine in which ways Plath

Assessment of Climate Change for the Baltic Sea Basin BACC Author Team, 2008-01-22 This book offers an up-to-date overview

of the latest scientific findings in regional climate research on the Baltic Sea basin. This includes climate changes in the recent past, climate projections up until 2100 using the most sophisticated regional climate models available, and an assessment of climate change impacts on terrestrial, freshwater and marine ecosystems. The authors demonstrate that the regional climate has already started to change, and will continue to do so.

The Remote Sensing of Tropospheric Composition from Space
John P. Burrows, Ulrich Platt, Peter Borrell, 2011-01-15
The impact of anthropogenic activities on our atmospheric environment is of growing public concern and satellite-based techniques now provide an essential component of observational strategies on regional and global scales. The purpose of this book is to summarise the state of the art in the field in general, while describing both key techniques and findings in particular. It opens with an historical perspective of the field together with the basic principles of remote sensing from space. Three chapters follow on the techniques and on the solutions to the problems associated with the various spectral regions in which observations are made. The particular challenges posed by aerosols and clouds are covered in the next two chapters. Of special importance is the accuracy and reliability of remote sensing data and these issues are covered in a chapter on validation. The final section of the book is concerned with the exploitation of data, with chapters on observational aspects, which includes both individual and synergistic studies, and on the comparison of global and regional observations with chemical transport and climate models and the added value that the interaction brings to both. The book concludes with scientific needs and likely future developments in the field, and the necessary actions to be taken if we are to have the global observation system that the Earth needs in its present, deteriorating state. The appendices provide a comprehensive list of satellite instruments, global representations of some ancillary data such as fire counts and light pollution, a list of abbreviations

and acronyms, and a set of colourful timelines indicating the satellite coverage of tropospheric composition in the foreseeable future. Altogether, this book will be a timely reference and overview for anyone working at the interface of environmental, atmospheric and space sciences.

Culture, Suicide, and the Human Condition Marja-Liisa Honkasalo, Miira Tuominen, 2014-03-30 Suicide is a puzzling phenomenon. Not only is its demarcation problematic but it also eludes simple explanation. The cultures in which suicide mortality is high do not necessarily have much else in common, and neither is a single mental illness such as depression sufficient to lead a person to suicide. In a word, despite its statistical regularity, suicide is unpredictable on the individual level. The main argument emerging from this collection is that suicide should not be understood as a separate realm of pathological behavior but as a form of human action. As such it is always dependent on the decision that the individual makes in a cultural, ethical and socio-economic context, but the context never completely determines the decision. This book also argues that cultural narratives concerning suicide have a problematic double function: in addition to enabling the community to make sense of self-inflicted death, they also constitute a blueprint depicting suicide as a solution to common human problems.

The Selfish Meme Kate Distin, 2005 Publisher Description

Suicide Movies Steven Stack, Barbara Bowman, 2011-01-01 How is suicide portrayed in the cinema and what does it mean for

suicide prevention? The first-ever comprehensive study of film suicide analyzes more than 1,500 film suicides. The portrayal of suicide in cinema can impact public understanding and effective prevention of suicide. This book presents the first-ever comprehensive analysis of how suicide has been portrayed in films over 110 years, based on a thorough evaluation of more than 1,500 film suicides – 1,377 in American films, 135 in British films. One striking finding is that while the research literature generally attributes suicide to individual psychiatric or mental health issues, cinema and film solidly endorse more social causes. In a compelling blend of social science and humanities approaches, the authors use quantitative methods, as well as the voices of scriptwriters, directors, actors, and actresses, dozens of illustrative frame-grabs, and numerous case examples to answer core questions such as: Are we guilty of over-neglecting social factors in suicide prevention and research? Do cinematic portrayals distort or accurately reflect the nature of suicide in the real world? Has film presentation of suicide changed over 110 years? What are the literary roots of cinema portrayals? This unique book makes fascinating reading for all concerned with suicide prevention, as well as areas such as sociology, film and media studies, and mass communication.

Darwinian Creativity and Memetics Maria

Kronfeldner, 2014-09-11 Maria Kronfeldner examines how Darwinism has been used to explain novelty and change in culture through the Darwinian approach to creativity and the theory of memes. The first claims that creativity is based on a Darwinian process of blind variation and selection, while the latter claims that culture is based on and explained by units - memes - that are similar to genes. Both theories try to describe and explain mind and culture by applying Darwinism by way of analogies. Kronfeldner shows that the analogies involved in these theories lead to claims that give either wrong or at least no new descriptions or explanations of the phenomena at issue. Whereas

the two approaches are usually defended or criticized on the basis that they are dangerous for our vision of ourselves, this book takes a different perspective: it questions the acuteness of these approaches. Darwinian theory is not like a dangerous wolf, hunting for our self image. Far from it, in the case of the two analogical applications addressed in this book, Darwinian theory is shown to behave more like a disoriented sheep in wolf's clothing.

Sylvia Plath Linda Wagner-Martin, 1987 Given in memory of Ethel A. Tsutsui, Ph. D. and Minoru Tsutsui, Ph. D.

Suicide and the Creative Arts Steven Stack, David Lester, 2009 Artistic work itself has been thought of as a life-saving behaviour for some suicidal artists. Artistic depictions of suicide can also have a contagion effect, causing suicides among members of the real-world audience. Guidelines are still needed for institutions such as the motion picture industry for minimising possible copycat effects of suicides in feature films and other artistic displays of suicide. Perhaps one of the most important reasons for studying suicide art is for insights into the motives for suicide. Artists portrayed many motives for suicide long before the rise of the science of suicidology in the 20th Century. Motives including social factors such as death of a loved one, honour, economic strain, and betrayal in love have roots in many historical artistic products. Sophocles's plays, dating from 2,500 years ago, contain several motives that are still found today. The history of suicide in art, especially if film is included, may be subject to continuities as well as changes in the motives for suicide. While the visual arts may have drifted away from certain causes of suicide, such as heroicism, these causes may actually live on in other art forms including film and opera. The present volume stresses a holistic approach to the study of suicide in art. Patterns in one art venue may be both similar and different to those in

other venues. Hence, caution needs to be exercised in making generalisations on the basis of one or a few modalities of artistic creations.

Visions of Past Glory Derek Fewster, 2006 Finland, during both prehistoric and medieval times, has been the subject of numerous studies, but none of these have previously considered the nationalist essence of the integral, underlying history culture' or public archaeology' of the nation. Even quite obvious political interpretations, visions, and imageries of an ancient Golden Age have all too easily been dismissed as the consequences of mere patriotism, Kalevala enthusiasm', or Karelianism. This study presents the case for how the conceptions of a distant, glorious past have been advanced and actively developed within the national project of constructing a modern ethnicity of Finnishness. Accordingly, a conception of an original ancient greatness was paramount for the nationalist movements in both the Grand Duchy and the early Republic of Finland, especially so when the perceived nation was considered in need of intellectually unifying defences against the many conceived threats of Russianness after ca 1890. The author traces the construction of a Finnish Great Myth of National Origins from the 16th century until the end of the Second World War, and provides richly illustrated examples of how the process of nation-building influenced and amplified the deep historical core of the emerging Finnish national consciousness.
