A Business Model for Entrepreneurship Thierry Verstraete,Estele Jouison-Laffitte,2011 This book takes an original approach to business models and entrepreneurship, resulting from a durable involvement with entrepreneurs and from experiments combining theory and practice. The authors present the generation, remuneration, and sharing business model, which relates to the value generation, its remuneration and the sharing of this remuneration. They also outline the role and the central place of the business model within the entrepreneurial process; the theoretical bases conventions theory, resource based view and stakeholder theory and the construction of the GRS model; the experiments conducted within teaching, practical, and theoretical frameworks; and the contribution of the business model to a theory of entrepreneurship theory. The book explains why the business model can be useful for entrepreneurs and why it is relevant to set it in place during the entrepreneurial process. Students and researchers who are interested in entrepreneurship will find this an important resource for developing a new business. Management coaches, often interested in the most recent developments of management research, will have no difficulty moving between the theory and practice set out in this book. Finally, curious entrepreneurs will read this study not to seek immediate solutions to a problem but to reflect on the topics addressed here that show that the business model is not just a fashion but is highly useful.

Voice and Communication Therapy for the Transgender/Gender Diverse Client Richard K. Adler,Sandy Hirsch,Jack Pickering,2018-12-06 Voice and Communication Therapy for the Transgender/Gender Diverse Client: A Comprehensive Clinical Guide, Third Edition remains a must-have resource for speech-language pathologists, voice clinicians and trainers who assist transgender/gender diverse clients in aligning their communication with their gender identity. Such goals for transfeminine, transmasculine and gender diverse people are far from insurmountable given appropriate training. This third edition builds on the work of the first two editions, and meets the clinical and training needs of an even larger and better-informed core of speech language pathologists and trainers. Enhancements to this edition include significantly expanded chapters on counseling, psychotherapy, theater, non-verbal communication, singing, vocal health, medical considerations, and the historical perspectives on evidence-based research as well as a call to action to meet the needs of trans youth. Chapters cover each aspect of a communication training program, including case studies, summaries, appendices and an extensive bibliography, as well as an outline of therapy protocols and ideas for transmasculine, transfeminine and gender diverse clients. New to this edition: A new co-editor, Jack Pickering, brings a fresh perspective from extensive experience in transgender voice and communication trainingA comprehensive chapter addressing research and the voice and communication needs of transmasculine individualsA chapter focusing on the needs of trans youth, future directions in this area, and the role of SLPs with this unique populationA practical chapter on psychotherapy and the relationship between the SLP and psychotherapist/social worker and how these professionals work in tandem to help in the entire transition processA chapter on counseling for the transgender/gender diverse client, with step by step practical information that can also be used for counseling with all populations seen by SLPsA practical chapter on theater giving the perspectives from two transgender actresses' personal experiences, a cisgender actress/voice clinician, and a cisgender voice/theater coach/teacherAn expanded medical chapter outlining

foundational information on terminology, development, endocrinology and surgeries as well as the physician's role and best practice in the transition process for each client Updated and expanded chapters on the role of multidisciplinary considerations for the transmasculine, transfeminine and gender diverse client, and assessment of these clients, in all aspects of pitch and inflection, the art and science of resonance, non-verbal communication, and group therapy and discharge This seminal text guides clinicians and trainers who work with the transgender/gender diverse population, in designing and administering a mindful, focused, and appropriate treatment plan. Speech-language pathologists, voice coaches, ENT physicians, professors and anyone working in the areas of voice, singing, and the vocal performing arts, will find this text to be an essential resource. Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

Advances in Hydrogen Production, Storage and Distribution Adolfo Iulianelli, Angelo Basile, 2014-07-16 Advances in Hydrogen Production, Storage and Distribution reviews recent developments in this key component of the emerging hydrogen economy, an energy infrastructure based on hydrogen. Since hydrogen can be produced without using fossil fuels, a move to such an economy has the potential to reduce greenhouse gas emissions and improve energy security. However, such a move also requires the advanced production, storage and usage techniques discussed in this book. Part one introduces the fundamentals of hydrogen production, storage, and distribution, including an overview of the development of the necessary infrastructure, an analysis of the potential environmental benefits, and a review of some important hydrogen production technologies in conventional, bio-based, and nuclear power plants. Part two focuses on hydrogen production from renewable resources, and includes chapters outlining the production of hydrogen through water electrolysis, photocatalysis, and bioengineered algae. Finally, part three covers hydrogen production using inorganic membrane reactors, the storage of hydrogen, fuel cell technology, and the potential of hydrogen as a fuel for transportation. Advances in Hydrogen Production, Storage and Distribution provides a detailed overview of the components and challenges of a hydrogen economy. This book is an invaluable resource for research and development professionals in the energy industry, as well as academics with an interest in this important subject. Reviews developments and research in this dynamic area Discusses the challenges of creating an infrastructure to store and distribute hydrogen Reviews the production of hydrogen using electrolysis and photocatalytic methods

*System Design Automation* Renate Merker, Wolfgang Schwarz, 2013-03-09 Design automation of electronic and hybrid systems is a steadily growing field of interest and a permanent challenge for researchers in Electronics, Computer Engineering and Computer Science. System Design Automation presents some recent results in design automation of different types of electronic and mechatronic systems. It deals with various topics of design automation, ranging from high level digital system synthesis, through analogue and heterogeneous system analysis and design, up to system modeling and simulation. Design automation is treated from the aspects of its theoretical fundamentals, its basic approach and its methods and tools. Several application cases are presented in detail. The book consists of three chapters: High-Level System Synthesis (Digital Hardware/Software Systems). Here embedded systems, distributed systems and processor arrays as well as hardware-software codesign are treated. Also three special application cases are discussed in detail; Analog and Heterogeneous System Design (System Approach and Methodology). This chapter copes with the analysis and design of hybrid systems comprised of analog and digital, electronic and mechanical components; System Simulation and Evaluation (Methods and Tools). In this chapter object-oriented Modelling, analog system simulation including fault-simulation, parameter optimization and system

validation are regarded. The contents of the book are based on material presented at the Workshop System Design Automation (SDA 2000) organised by the Sonderforschungsbereich 358 of the Deutsche Forschungsgemeinschaft at TU Dresden.
