Zeppelin Ernst August Lehmann,1937 This is a thorough first person account of zeppelins, their history and flights. This book was being translated by Leonhard Adelt, who was on board with Lehmann as a guest during the Hindenburg's last flight. The book had recently been published in German when the Hindenburg was destroyed. The English translation, completed by Jay Dratler, was published in 1937 with a preface and closing chapter by American airship captain Charles E. Rosendahl, who had interviewed Lehman on his deathbed. https://en.wikipedia.org/wiki/Ernst_A._Lehmann

The Golden Age of the Great Passenger Airships Harold Dick,Douglas Robinson,2014-12-02 Drawing on the extensive photographs, notes, diaries, reports, recorded data, and manuals he collected during his five years at the Zeppelin Company in Germany, from 1934 through 1938, Harold G. Dick tells the story of the two great passenger Zeppelins. Against the background of German secretiveness, especially during the Nazi period, Dick's accumulation of material and pictures is extraordinary. His original photographs and detailed observations on the handling and flying of the two big rigids constitute the essential data on this phase of aviation history.

Zeppelins Charles Stephenson,2012-03-20 On 2 July 1900 the people of Friedrichshafen, Germany, witnessed a momentous occasion the first flight of LZ 1, Count Ferdinand von Zeppelin's first airship. Although deemed a failure, a succession of better craft (LZ2 to 10) enabled the Zeppelin to expand into the consumer market of airship travel, whilst also providing military craft for the German Army and Navy. The years of the Great War saw the Zeppelins undertake strategic bombing missions against Great Britain. This title covers the post-war fate of the Zeppelins, including the crash of the Hindenburg, and their use by the Luftwaffe at the beginning of World War II.

Zeppelin! Guillaume de Syon,2007-07 Six decades later, there is still a mystique surrounding these technological leviathans, one that Zeppelin! addresses with insight and wit.

Zeppelin Ernst A. Lehmann,2015-06 The author of this book, Ernst A. Lehmann, was close to the Zeppelin story from its early days and had great faith in the ever increasing success of the Zeppelin on international routes. It is sadly ironic that this talented man and strong advocate of the Zeppelin should die in Hindenburg disaster shortly after he had produced the draft for this book. He died following the fire that destroyed the Hindenburg on 6 May 1937; he survived the fire itself but was badly burned and died the following day. Lehmann was a Zeppelin commander during the First World War bombing England on numerous occasions, and even met some of the supreme German commanders such as General Erich Ludendorff. He was well acquainted with Count Zeppelin and all of the designers and management of the Zeppelin Company. After the war he worked for the Zeppelin Company under Hugo Eckener, who took over the management following Count Zeppelin's death in 1917. Lehmann was closely involved in the voyages of the Graf Zeppelin, including the famous round the world voyage, and pioneered services to the Unites States and the regular service to South America. Lehmann makes his Nazi sympathies quite clear, but tactfully does not touch upon his differences with Hugo Eckener regarding the use of the airships for Nazi electioneering-for Eckener was strongly against it. Nor does he touch upon G♦ring's maneuvering which broke up the Zeppelin Company, thereby leaving Eckener as an outsider. He believes in the superiority of German engineering and beyond that the superiority of everything German. Lehmann served as commanding officer on more than 100 of the flights of the Graf Zeppelin between 1928 and 1936. In 1935, when Hermann G♦ring created the Deutsche Zeppelin Reederei to increase Nazi influence over Zeppelin operations, Captain Lehmann was named director of the new airline. In 1936, he commanded 10 round-trip flights to Lakehurst on the new Hindenburg. The text is well-written, approachable, and provides a comprehensive account of the Zeppelin story until the 1937 disaster which cost the author his life.

The Zeppelin Michael Belafi,2015-03-31 This authoritative history of the Zeppelin covers the entire course of the airship's development "extensively illustrated with . . . photographs and drawings" (Toy Soldier & Model Figure). Named after the German Count Ferdinand Von Zeppelin, an early pioneer of rigid airship development, the Zeppelin was first flown commercially by Deutsch Luftschiffahrts (DELAG), the world's first airline in revenue service. By mid-1914, DELAG had carried over 10,000 fare-paying passengers on over 1500 flights. When war hit, it was employed to military advantage, wreaking carnage upon Britain's towns and cities. German defeat in 1918 temporarily halted the airship business. Though it bounced back with the construction of the Graf Zeppelin in the thirties, a series of accidents signaled the demise of the Zeppelin. Following the Hindenburg disaster of 1937, and in the midst of numerous political and economic issues, the Zeppelin was soon to be consigned to the history books. This new publication explores each facet of its history, and concludes by assessing the legacy of rigid airship development, still felt to this day.

The Zeppelin Phil Carradice,2017-09-09 For a brief period in the early Twentieth Century it seemed as if the future of air travel lay with the giant airships of Count von Zeppelin. The First World War ended that dream, fixed wing aircraft superseding the slow moving and unwieldy airships. As weapons of war the Zeppelins were never truly successful although they did manage to terrify huge numbers of unknowing and naive civilians-perhaps more by imagination than by any practical manifestation of their power. The Zeppelin crews of the First World War spent hours in the air, cold and hungry-and with the prospect of a horrendous death, either by fire or by falling thousands of feet to the ground, ever present. As vehicles of mass destruction the Zeppelins were remarkably ineffective. Their real value, lay in their ability to make silent reconnaissance missions over enemy territory and sea lanes. In the post-war days the public began to realise that airships offered a form of air travel that was comfortable, mostly stable and, sometimes, even luxurious. The 'Graf Zeppelin' and the 'Hindenburg' were the height of elegance.Unfortunately, they had two major defects-they were vulnerable to the elements and, due to the hydrogen that kept them aloft, they were also highly flammable. The 'Hindenburg' disaster of 1937 effectively spelled the end of the giant airship as a commercial enterprise but for almost half a century these wonderful machines had cruised elegantly through the clouds.

Zeppelin Hans G. Knausel,2014-02-01 On July 2, 1900, Ferdinand Graf Zeppelin made the first ascent in an airship of his own design. The flight was initially viewed with skepticism, however public opinion changed after the destruction of his fourth airship at Echterdingen. Zeppelin received so many donations that not only was he able to found his own companies for the purpose of building airships, but also production facilities for the development and manufacture of engines, transmissions, shells, gas cells, airship hangars and even the construction of aircraft. All of these companies enjoyed a tremendous upswing during the First World War. After the war the Zeppelin airship company took some time to get back on its feet, but then produced its crowning achievements - the LZ 127 Graf Zeppelin and the LZ 129 Hindenburg - memories of which still remain alive and influence the present. Author Hans Knäusel describes the Zeppelin story with a critical look at the economic and political effects of the period, from the beginning until the destruction of the Hindenburg in 1937. He also discusses airships built in other countries using the Zeppelin system, as well as the hangars and landing masts vital to operation of the big airships.

Empires of the Sky Alexander Rose,2021-05-25 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky—a story that ended with the fiery destruction of the Hindenburg. “Genius . . . a definitive tale of an incredible time when mere mortals learned to fly.”—Keith O’Brien, The New York Times At the dawn of the twentieth century, when human flight was still considered an impossibility, Germany’s Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world’s first successful flying machine. As the Wrights labored to invent the airplane,

Zeppelin fathered the remarkable airship, sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades, in the quest to control one of humanity's most inspiring achievements. And it was the airship—not the airplane—that led the way. In the glittery 1920s, the count's brilliant protégé, Hugo Eckener, achieved undreamed-of feats of daring and skill, including the extraordinary Round-the-World voyage of the Graf Zeppelin. At a time when America's airplanes—rickety deathtraps held together by glue, screws, and luck—could barely make it from New York to Washington, D.C., Eckener's airships serenely traversed oceans without a single crash, fatality, or injury. What Charles Lindbergh almost died doing—crossing the Atlantic in 1927—Eckener had effortlessly accomplished three years before the Spirit of St. Louis even took off. Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes, Eckener built his masterwork, the behemoth Hindenburg—a marvel of design and engineering. Determined to forge an airline empire under the new flagship, Eckener met his match in Juan Trippe, the ruthlessly ambitious king of Pan American Airways, who believed his fleet of next-generation planes would vanquish Eckener's coming airship armada. It was a fight only one man—and one technology—could win. Countering each other's moves on the global chessboard, each seeking to wrest the advantage from his rival, the struggle for mastery of the air was a clash not only of technologies but of business, diplomacy, politics, personalities, and the two men's vastly different dreams of the future. Empires of the Sky is the sweeping, untold tale of the duel that transfixed the world and helped create our modern age.

Zeppelin Margaret L. Goldsmith,2017-07-31 IN his fiery, adventurous youth he joined the Union Army in our Civil War, and became vitally interested in aeronautics AS a man he was known as the most fearless and audacious officer the Württemberg Army AT fifty-two he retired and began the great adventure of his life—the conquest of the air THEN, with magnificent courage, he rode over obstacle and failure to an achievement immortal in the history of flying Originally published in 1931, this is a biography of Count von Zeppelin, the German general turned aircraft manufacturer who founded the Zeppelin airship company. Ferdinand Adolf Heinrich August Graf von Zeppelin (8 July 1838 - 8 March 1917), the scion of a noble family, was born in Konstanz, Grand Duchy of Baden (now part of Baden-Württemberg) in Germany. His father was Württemberg Minister and Hofmarschall Friedrich Jérôme Wilhelm Karl Graf von Zeppelin (1807-1886). Count Zeppelin's military career spanned more than three decades, beginning as an army officer in the army of Württemberg in 1855, seeing active service in the Franco-Prussian War of 1870-1871, and rising through the ranks to commander of the 19th Uhlans in Ulm and envoy of Württemberg in Berlin from 1882-1885. He retired from the army with the rank of Generalleutnant in 1891 at age 52. He was awarded the Ritterkreuz (Knight's Cross) of the Order of Distinguished Service of Württemberg. His service as an official observer with the Union Army during the American Peninsular War led him to travel to St. Paul, Minnesota, where the German-born former Army balloonist John Steiner offered tethered flights; it was his first ascent in a balloon during this visit that is said to have been the inspiration of Count Zeppelin's later interest in aeronautics. He passed away in 1917 at the age of 78, before the end of World War I. The unfinished World War II German aircraft carrier Graf Zeppelin and two rigid airships were named after him.

KNOWLEDGE & POWER S PACIFIC LINDSTROM LAMONT,1990-10-17 Drawing on the extensive photographs, notes, diaries, reports, recorded data, and manuals he collected during his five years at the Zeppelin Company in Germany, Harold G. Dick tells the story of the two great passenger Zeppelins. -- from vendor description.

Dirigible Dreams C. Michael Hiam,2014-10-07 Here is the story of airshipsÑmanmade flying machines without wingsÑfrom their earliest beginnings to the modern era of blimps. In postcards and advertisements, the sleek, silver, cigar-shaped airships, or dirigibles, were the embodiment of futuristic visions of air travel. They immediately captivated the imaginations of people worldwide, but in less than fifty years dirigibleÊbecame a byword for doomed futurism, an Icarian figure of industrial hubris. Dirigible Dreams looks back on this bygone era, when the future of exploration, commercial travel, and warfare largely involved the prospect of wingless flight. In Dirigible Dreams, C. Michael Hiam celebrates the legendary figures of this promising technology in the late nineteenth and early twentieth centuriesÑthe pioneering aviator Alberto Santos-Dumont, the doomed polar explorers S. A. AndrŹe and Walter Wellman, and the great Prussian inventor and promoter Count Ferdinand von Zeppelin, among otherÊpivotal figuresÑand recounts fascinating stories of exploration, transatlantic journeys, and floating armadas that rained death during World War I. While there were triumphs, such as the polar flight of the Norge, most of these tales are of disaster and woe, culminating in perhaps the most famous disaster of all time, the crash of the Hindenburg. This story of daring men and their flying machines, dreamers and adventurers who pushed modern technology toÑand often beyondÑits limitations, is an informative and exciting mix of history, technology, awe-inspiring exploits, and warfare that will captivate readers with its depiction of a lost golden age of air travel. Readable and authoritative, enlivened by colorful characters and nail-biting drama,ÊDirigible DreamsÊwill appeal to a new generation of general readers and scholars interested in the origins of modern aviation.

Dr Eckener's Dream Machine Douglas Botting,2001 The year 2000 marks the 100th anniversary of the maiden flight of the first experimental Zeppelin airship. A further 115 giant airships were built and flown by the Zeppelin company (based at Friedrichshafen on the shores of Lake Constance in Germany) - mostly for the purposes of war - but the most successful and best loved was the second to last of them, Dr Hugo Eckener's round-the-world airship, Graf Zeppelin, the dream machine.
