Zoo Animal Welfare Terry Maple, Bonnie M Perdue, 2013-03-22 Zoo Animal Welfare thoroughly reviews the scientific literature on the welfare of zoo and aquarium animals. Maple and Perdue draw from the senior author's 24 years of experience as a zoo executive and international leader in the field of zoo biology. The authors' academic training in the interdisciplinary field of psychobiology provides a unique perspective for evaluating the ethics, practices, and standards of modern zoos and aquariums. The book offers a blueprint for the implementation of welfare measures and an objective rationale for their widespread use. Recognizing the great potential of zoos, the authors have written an inspirational book to guide the strategic vision of superior, welfare-oriented institutions. The authors speak directly to caretakers working on the front lines of zoo management, and to the decision-makers responsible for elevating the priority of animal welfare in their respective zoo. In great detail, Maple and Perdue demonstrate how zoos and aquariums can be designed to achieve optimal standards of welfare and wellness.

Sound, Image, Silence Michael Gaudio, 2019-11-26 A visionary new approach to the Americas during the age of colonization, made by engaging with the aural aspects of supposedly "silent" images Colonial depictions of the North and South American landscape and its indigenous inhabitants fundamentally transformed the European imagination—but how did those images reach Europe, and how did they make their impact? In Sound, Image, Silence, noted art historian Michael Gaudio provides a groundbreaking examination of the colonial Americas by exploring the special role that aural imagination played in visible representations of the New World. Considering a diverse body of images that cover four hundred years of Atlantic history, Sound, Image, Silence addresses an important need within art history: to give hearing its due as a sense that can inform our understanding of images. Gaudio locates the noise of the pagan dance, the discord of battle, the din of revivalist religion, and the sublime sounds of nature in the Americas, such as lightning, thunder, and the waterfall. He invites readers to listen to visual media that seem deceptively couched in silence, offering bold new ideas on how art historians can engage with sound in inherently "mute" media. Sound, Image, Silence includes readings of Brazilian landscapes by the Dutch painter Frans Post, a London portrait of Benjamin Franklin, Thomas Edison's early Kinetoscope film Sioux Ghost Dance, and the work of Thomas Cole, founder of the Hudson River School of American landscape painting. It masterfully fuses a diversity of work across vast social, cultural, and spatial distances, giving us both a new way of understanding sound in art and a powerful new vision of the New World.

Aquatic Biodiversity II H. Segers, K. Martens, 2006-01-20 Freshwater Biodiversity is a much underestimated component of global biodiversity, both in its diversity and in its potential to act as models for fundamental research in evolutionary biology and ecosystem studies. Freshwater organisms also reflect quality of water bodies

and can thus be used to monitor changes in ecosystem health. The present book comprises a unique collection of primary research papers spanning a wide range of topics in aquatic biodiversity studies, and including a first global assessment of specific diversity of freshwater animals. The book also presents a section on the interaction between scientists and science policy managers. A target opinion paper lists priorities in aquatic biodiversity research for the next decade and several reactions from distinguished scientists discuss the relevance of these items from different points of view: fundamental ecology, taxonomy and systematics, needs of developing countries, present-day biodiversity policy at European and at global scales. It is believed that such a platform for the interaction between science and science policy is an absolute necessity for the efficient use of research budgets in the future.

Capybara José Roberto Moreira, Katia Maria P.M.B. Ferraz, Emilio A. Herrera, David W. Macdonald, 2012-08-16 The capybara is the neotropical mammal with the highest potential for production and domestication. Amongst the favorable characteristics for domestication we can list its high prolificacy, rapid growth rate, a herbivorous diet, social behavior and relative tameness. The genus (with only two species) is found from the Panama Canal to the north of Argentina on the east of the Andes. Chile is the only country in South America where the capybara is not found. The species is eaten all over its range, especially by poor, rural and traditional communities engaged in subsistence hunting. On the other hand, in large urban settlements wildlife is consumed by city dwellers as a delicacy. The sustainable management of capybara in the wild has been adopted by some South American countries, while others have encouraged capybara rearing in captivity.

A Grammar of Kulina Stefan Dienst, 2014-12-12 This book is a reference grammar of Kulina, an Amazonian language spoken in Brazil and Peru. The dialect described by the author is spoken on the upper Purus River in the Brazilian state of Acre. Kulina belongs to the Arawan language family. It is predominantly head-marking and has a complex verbal morphology which is largely agglutinating with some instances of fusion. The language has two noun classes and two genders. The gender agreement of transitive verbs with their arguments is in part governed by intricate grammatical rules and in part pragmatically driven. There are three types of possession, alienable, inalienable, and kinship. The latter category only applies to some kinship nouns, while others are alienably possessed. Kulina has aspirated and unaspirated obstruents, but different aspirated obstruents do not co-occur in one morpheme due to Grassmann's law, a dissimilation process known from Sanskrit and Ancient Greek. The book contains two Kulina texts and a chapter on the lexicon, which discusses colour terms, generic nouns for plants and animals, pet vocatives, idioms, and the origin of loan words.
