*The Essential Cult TV Reader* David Lavery, 2021-09-15 The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as Star Trek, The Avengers, Dark Shadows, and The Twilight Zone to popular contemporary shows such as Lost, Dexter, and 24, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

**Ghosts from Our Past** Erin Gilbert, Abby L. Yates, Andrew Shaffer, 2016-06-28 As seen in the Sony Pictures 2016 film Ghostbusters, the ultimate guide to identifying, understanding, and engaging with any paranormal activity that plagues you Years before they made headlines with the Ghostbusters, Erin Gilbert and Abby L. Yates published the groundbreaking study of the paranormal, Ghosts from Our Past. Once lost to history, this criminally underappreciated book is now updated for the new century. According to Gilbert and Yates, “extraordinary claims require extraordinary evidence,” and whether you’re a believer or a skeptic, you’ll find the information you’re seeking right here in this extraordinary book, including:

- The childhood experiences that inspired Erin and Abby’s lifelong passion for the scientific study of the paranormal
- The history of ghosts and other

supernatural entities, the science that explains their existence, and profiles of the groundbreaking paranormal researchers who have investigated them • An illustrated guide to Class I through Class VII ghosts • Helpful sidebars like “A Ghost by Any Other Name” and “Ectoplasm Cleanup Tips” • Updates including “The Ghostbusters’ Arsenal” by Jillian Holtzmann and “Haunted History” by Patty Tolan • A new Ghostbusting Resources appendix, featuring the “Paranormal Quickstart Guide”, “Is It a Ghost? A Handy Quiz”, “A Supernatural Stakeout Journal”, “The Devil’s Dictionary: Paraterminology You Need to Know” With this helpful—and hilarious—official Ghostbusters guide in hand, you’ll be prepared for almost any spirit, spook, or spectre that comes your way. As for the rest, you know who to call.

**Mindblindness** Simon Baron-Cohen, 1997-01-22 In Mindblindness, Simon Baron-Cohen presents a model of the evolution and development of mindreading. He argues that we mindread all the time, effortlessly, automatically, and mostly unconsciously. It is the natural way in which we interpret, predict, and participate in social behavior and communication. We ascribe mental states to people: states such as thoughts, desires, knowledge, and intentions. Building on many years of research, Baron-Cohen concludes that children with autism, suffer from mindblindness as a result of a selective impairment in mindreading. For these children, the world is essentially devoid of mental things. Baron-Cohen develops a theory that draws on data from comparative psychology, from developmental, and from neuropsychology. He argues that specific neurocognitive mechanisms have evolved that allow us to mindread, to make sense of actions, to interpret gazes as meaningful, and to decode the language of the eyes. *Gene Quantification* Francois Ferre, 2012-12-06 Geneticists and molecular biologists have been interested in quantifying genes and their products for many years and for various reasons (Bishop,

1974). Early molecular methods were based on molecular hybridization, and were devised shortly after Marmur and Doty (1961) first showed that denaturation of the double helix could be reversed - that the process of molecular reassociation was exquisitely sequence dependent. Gillespie and Spiegelman (1965) developed a way of using the method to titrate the number of copies of a probe within a target sequence in which the target sequence was fixed to a membrane support prior to hybridization with the probe - typically a RNA. Thus, this was a precursor to many of the methods still in use, and indeed under development, today. Early examples of the application of these methods included the measurement of the copy numbers in gene families such as the ribosomal genes and the immunoglobulin family. Amplification of genes in tumors and in response to drug treatment was discovered by this method. In the same period, methods were invented for estimating gene numbers based on the kinetics of the reassociation process - the so-called Cot analysis. This method, which exploits the dependence of the rate of reassociation on the concentration of the two strands, revealed the presence of repeated sequences in the DNA of higher eukaryotes (Britten and Kohne, 1968). An adaptation to RNA, Rot analysis (Melli and Bishop, 1969), was used to measure the abundance of RNAs in a mixed population.

*Readicide* Kelly Gallagher, 2023-10-10 Read-icide: The systematic killing of the love of reading, often exacerbated by the inane, mind-numbing practices found in schools. Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the decline, poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative book *Readicide: How Schools are Killing Reading and What You Can Do About It*, author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading: our schools. *Readicide*, Gallagher argues that American schools are actively

(though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading by: Valuing standardized testing over the development of lifelong readers Mandating breadth over depth in instruction Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts Ignoring the importance of developing recreational reading Losing sight of authentic instruction in the looming shadow of political pressures Readicide provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading;-steps that will help prevent the loss of another generation of readers.

**The Library Screen Scene** Renee Hobbs, Liz Deslauriers, Pam Steager, 2019 In the past two decades, several U.S. states have explored ways to mainstream media literacy in school curriculum. However one of the best and most accessible places to learn this necessary skill has not been the traditional classroom but rather the library. In an increasing number of school, public, and academic libraries, shared media experiences such as film screening, learning to computer animate, and video editing promote community and a sense of civic engagement. The Library Screen Scene reveals five core practices used by librarians who work with film and media: viewing, creating, learning, collecting, and connecting. With examples from more than 170 libraries throughout the United States, the book shows how film and media literacy education programs, library services, and media collections teach patrons to critically analyze moving image media, uniting generations, cultures, and communities in the process.

The Development of Intersensory Perception David J. Lewkowicz, Robert Lickliter, 2013-05-13 This book provides the latest information about the development of intersensory perception -- a topic which has recently begun to receive a great deal of attention from researchers studying the general

problem of perceptual development. This interest was inspired after the realization that unimodal perception of sensory information is only the first stage of perceptual processing. Under normal conditions, an organism is faced with multiple, multisensory sources of information and its task is to either select a single relevant source of information or select several sources of information and integrate them. In general, perception and action on the basis of multiple sources of information is more efficient and effective. Before greater efficiency and effectiveness can be achieved, however, the organism must be able to integrate the multiple sources of information. By doing so, the organism can then achieve a coherent and unified percept of the world. The various chapters in this book examine the developmental origins of intersensory perceptual capacities by presenting the latest research on the development of intersensory perceptual skills in a variety of different species. By adopting a comparative approach to this problem, this volume as a whole helps uncover similarities as well as differences in the mechanisms underlying the development of intersensory integration. In addition, it shows that there is no longer any doubt that intersensory interactions occur right from the beginning of the developmental process, that the nature of these intersensory interactions changes as development progresses, and that early experience contributes in important ways to these changes.

**Trade Liberalization** Romain Wacziarg, 2018 This compelling two-volume collection presents the major literary contributions to the economic analysis of the consequences of trade liberalization on growth, productivity, labor market outcomes and economic inequality. Examining the classical theories that stress gains from trade stemming from comparative advantage, the selection also comprises more recent theories of imperfect competition, where any potential gains from trade can stem from competitive effects or the international transmission of knowledge. Empirical

contributions provide evidence regarding the explanatory power of these various theories, including work on the effects of trade openness on economic growth, wages, and income inequality, as well as evidence on the effects of trade on firm productivity, entry and exit. Prefaced by an original introduction from the editor, the collection will be an invaluable research resource for academics, practitioners and those drawn to this fascinating topic.

**Crossroads Between Innate and Adaptive Immunity IV** Peter D. Katsikis, Stephen P. Schoenberger, Bali Pulendran, 2013-03-01 This volume presents a collection of reviews derived from work presented at the Aegean Conference: "4th Crossroads between innate and adaptive immunity". This meeting was the fourth in a series, and assembled a team of scientists working on mechanisms by which the innate immune system of the host senses pathogens, the cellular and signaling networks that orchestrate the innate response and antigen presentation and adaptive immunity. The importance of the crosstalk between innate immunity and the adaptive immune response has only recently started to be appreciated. Although it is well recognized that dendritic cells, NK cells, NK-T cells and T cells are all critical for the host response to pathogens, the respective fields that study the biology of these immune cells tend to exist in parallel worlds with minimum exchange of information and ideas. This fragmentation hinders the integration of these fields towards a unified theory of host response. The Aegean Conference "Crossroads between Innate and Adaptive Immunity" brought together leading international scientists and experts to address critical areas of Innate and Adaptive immunity something necessary for the development of more efficient scientific exchange and crosspollination between these fields. This conference attracted scientists from all over the world to discuss their latest findings on the various aspects of Innate and Adaptive immunity. The conference had limited participation and a scientific and social program that

maximized scientific interchange through lecture presentations, poster sessions and informal discussions.

**The Art of Commedia** M. A. Katritzky, 2006 Italian comedians attracted audiences to performances at every level, from the magnificent Italian, German and French court festival appearances of Orlando di Lasso or Isabella Andreini, to the humble street trestle lazzi of anonymous quacks. The characters they inspired continue to exercise a profound cultural influence, and an understanding of the commedia dell'arte and its visual record is fundamental for scholars of post-1550 European drama, literature, art and music. The 340 plates presented here are considered in the light of the rise and spread of commedia stock types, and especially Harlequin, Zanni and the actresses. Intensively researched in public and private collections in Oxford, Munich, Florence, Venice, Paris and elsewhere, they complement the familiar images of Jacques Callot and the Stockholm Recueil Fossard within a framework of hundreds of significant pictures still virtually unknown in this context. These range from anonymous popular prints to pictures by artists such as Ambrogio Brambilla, Sebastian Vrancx, Jan Bruegel, Louis de Caulery, Marten de Vos, and members of the Valckenborch and Francken clans. This volume, essential for commedia dell'arte specialists, represents an invaluable reference resource for scholars, students, theatre practitioners and artists concerned with commedia-related aspects of visual, dramatic and festival culture, in and beyond Italy.

**The War Within** Rajeev Ramchand, Joie Acosta, Rachel M. Burns, 2011 The increase in suicides among military personnel has raised concern. This book reviews suicide epidemiology in the military, catalogs military suicide-prevention activities, and recommends relevant best practices.

*Trick Mirror* Jia Tolentino, 2019-08-06 NEW YORK TIMES BESTSELLER • "From The New

Yorker's beloved cultural critic comes a bold, unflinching collection of essays about self-deception, examining everything from scammer culture to reality television."—Esquire Book Club Pick for Now Read This, from PBS NewsHour and The New York Times • "A whip-smart, challenging book."—Zadie Smith • "Jia Tolentino could be the Joan Didion of our time."—Vulture FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE'S JOHN LEONARD PRIZE FOR BEST FIRST BOOK • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK PUBLIC LIBRARY AND HARVARD CRIMSON AND ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Time • Chicago Tribune • The Washington Post • NPR • Variety • Esquire • Vox • Elle • Glamour • GQ • Good Housekeeping • The Paris Review • Paste • Town & Country • BookPage • Kirkus Reviews • BookRiot • Shelf Awareness Jia Tolentino is a peerless voice of her generation, tackling the conflicts, contradictions, and sea changes that define us and our time. Now, in this dazzling collection of nine entirely original essays, written with a rare combination of give and sharpness, wit and fearlessness, she delves into the forces that warp our vision, demonstrating an unparalleled stylistic potency and critical dexterity. Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each essay, Tolentino writes about a cultural prism: the rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine's journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino's sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound honesty, Trick Mirror is an

instant classic of the worst decade yet. FINALIST FOR THE PEN/DIAMONSTEIN-SPIELVOGEL AWARD FOR THE ART OF THE ESSAY

Reinventing Fire Amory Lovins, 2013-10-07 Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In Reinventing Fire, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, Reinventing Fire makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.

**How Pop Culture Shapes the Stages of a Woman's Life** Melissa Ames, Sarah Burcon, 2016-03-15 Contemporary popular culture has created a slew of stereotypical roles for girls and women to (willingly or not) play throughout their lives: The Princess, the Nymphette, the Diva, the Single Girl, the Bridezilla, the Tiger Mother, the M.I.L.F, the Cougar, and more. In this book Ames and Burcon investigate the role of cultural texts in gender socialization at specific pre-scripted stages of a woman's life (from girls to the golden girls) and how that instruction compounds over

time. By studying various texts (toys, magazines, blogs, tweets, television shows, Hollywood films, novels, and self-help books) they argue that popular culture exists as a type of funhouse mirror constantly distorting the real world conditions that exist for women, magnifying the gendered expectations they face. Despite the many problematic, conflicting messages women receive throughout their lives, this book also showcases the ways such messages are resisted, allowing women to move past the blurry reality they broadcast and toward, hopefully, gender equality.

**Empty** Susan Burton, 2021-07-06 An editor at *This American Life* reveals the searing story of the secret binge-eating that dominated her adolescence and shapes her still. “Her tale of compulsion and healing is candid and powerful.”—People NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MARIE CLAIRE For almost thirty years, Susan Burton hid her obsession with food and the secret life of compulsive eating and starving that dominated her adolescence. This is the relentlessly honest, fiercely intelligent story of living with both anorexia and binge-eating disorder, moving past her shame, and learning to tell her secret. When Burton was thirteen, her stable life in suburban Michigan was turned upside down by her parents’ abrupt divorce, and she moved to Colorado with her mother and sister. She seized on this move west as an adventure and an opportunity to reinvent herself from middle-school nerd to popular teenage girl. But in the fallout from her parents’ breakup, an inherited fixation on thinness went from “peculiarity to pathology.” Susan entered into a painful cycle of anorexia and binge eating that formed a subterranean layer to her sunny life. She went from success to success—she went to Yale, scored a dream job at a magazine right out of college, and married her college boyfriend. But in college the compulsive eating got worse—she’d binge, swear it would be the last time, and then, hours later, do it again—and after she graduated she descended into anorexia, her attempt to “quit food.” Binge eating is more prevalent than

anorexia or bulimia, but there is less research and little storytelling to help us understand it. In tart, soulful prose Susan Burton strikes a blow for the importance of this kind of narrative and tells an exhilarating story of longing, compulsion and hard-earned self-revelation.

Handbook of Executive Functioning Sam Goldstein, Jack A. Naglieri, 2013-11-19 Planning. Attention. Memory. Self-regulation. These and other core cognitive and behavioral operations of daily life comprise what we know as executive functioning (EF). But despite all we know, the concept has engendered multiple, often conflicting definitions and its components are sometimes loosely defined and poorly understood. The Handbook of Executive Functioning cuts through the confusion, analyzing both the whole and its parts in comprehensive, practical detail for scholar and clinician alike. Background chapters examine influential models of EF, tour the brain geography of the executive system and pose salient developmental questions. A section on practical implications relates early deficits in executive functioning to ADD and other disorders in children and considers autism and later-life dementias from an EF standpoint. Further chapters weigh the merits of widely used instruments for assessing executive functioning and review interventions for its enhancement, with special emphasis on children and adolescents. Featured in the Handbook: The development of hot and cool executive function in childhood and adolescence. A review of the use of executive function tasks in externalizing and internalizing disorders. Executive functioning as a mediator of age-related cognitive decline in adults. Treatment integrity in interventions that target executive function. Supporting and strengthening working memory in the classroom to enhance executive functioning. The Handbook of Executive Functioning is an essential resource for researchers, scientist-practitioners and graduate students in clinical child, school and educational psychology; child and adolescent psychiatry; neurobiology; developmental psychology; rehabilitation

medicine/therapy and social work.

Quadrophenia and Mod(ern) Culture Pamela Thurschwell, 2017-11-07 This collection explores the centrality of The Who's classic album, and Franc Roddam's cult classic film of adolescent life, Quadrophenia to the recent cultural history of Britain, to British subcultural studies, and to a continuing fascination with Mod style and culture. The interdisciplinary chapters collected here set the album and film amongst critical contexts including gender and sexuality studies, class analysis, and the film and album's urban geographies, seeing Quadrophenia as a transatlantic phenomenon and as a perennial adolescent story. Contributors view Quadrophenia through a variety of lenses, including the Who's history and reception, the 1970s English political and social landscape, the adolescent novel of development (the bildungsroman), the perception of the film through the eyes of Mods and Mod revivalists, 1970s socialist politics, punk, glam, sharp suits, scooters and the Brighton train, arguing for the continuing richness of Quadrophenia's depiction of the adolescent dilemma. The volume includes new interviews with Franc Roddam, director of Quadrophenia, and the photographer Ethan Russell, who took the photos for the album's famous photo booklet.
