But when their charade is exposed, their worst nightmare begins. Now they must leave behind the father they love and fight for their lives. Branded as traitors, hunted as fugitives, and pushed to discover just how far they'll go in order to stay alive, Ava and Mira rush headlong into a terrifying unknown.

📖 **THE PEOPLE OF PAPER** SALVADOR PLASCENCIA, 2006 Part memoir, part lies, this imaginative tale is a story about loving a woman made of paper, about the wounds made by first love and sharp objects.

📖 **THE ART OF NOT FALLING APART** CHRISTINA PATTERSON, 2019 We plan, as the old proverb says, and God laughs. But most of us don't find it all that funny when things go wrong. Most of us want love, a nice home, good work, and happy children. Many of us grew up with parents who made these things look relatively easy and assumed we would get them, too. So what do you do if you don't? What do you do when you feel you've messed it all up and your friends seem to be doing just fine? For Christina Patterson, it was her job as a journalist that kept her going through the ups and downs of life. And then she lost that, too. Dreaming of revenge and irritated by self-help books, she decided to do the kind of interviews she had never done before. The resulting conversations are surprising, touching and often funny. There's Ken, the first person to be publicly fired from a FTSE-100 board. There's Winston, who fell through a ceiling onto a purple coffin. There's Louise, whose baby was seriously ill, but who still worried about being fat. And through it all, there's Christina, eating far too many crisps as she tries to pick up the pieces of her life. The Art of Not Falling Apart is a joyous, moving, and sometimes shockingly honest celebration of life as an adventure, one where you ditch your expectations, raise a glass, and prepare for a rocky ride.

📖 **CATEGORIES FOR THE WORKING MATHEMATICIAN** SAUNDERS MAC LANE, 2013-04-17 An array of general ideas useful in a wide variety of fields. Starting from the foundations, this book illuminates the concepts of category, functor, natural transformation, and duality. It then turns to adjoint functors, which provide a description of universal constructions, an analysis of the representations of functors by sets of morphisms, and a means of manipulating direct and inverse limits. These categorical concepts are extensively illustrated in the remaining chapters, which include many applications of the basic existence theorem for adjoint functors. The categories of algebraic systems are constructed from certain adjoint-like data and characterised by Beck's theorem. After considering a variety of applications, the book continues with the construction and exploitation of Kan extensions. This second edition includes a number of revisions and additions, including new chapters on topics of active interest: symmetric monoidal categories and braided monoidal categories, and the coherence theorems for them, as well as 2-categories and the higher dimensional categories which have recently come into prominence.

📖 **EFFECTS OF LIGHT ON MATERIALS IN COLLECTIONS** TERRY T. SCHAEFFER, 2001-08-16 The impact of light on works of art and archival materials has long been an issue of concern to conservators and other museum professionals, yet the literature on this subject has never been systematically reviewed. This volume fills that gap by providing a survey of the impact of exposure to light with an emphasis on photoflash and reprographic sources. The information provided will assist the professional audience, especially conservators and collections managers, in assessing the risk to art and archival objects of such exposures. The text surveys relevant photophysical and photochemical principles, photometric and radiometric measurement, and the spectral outputs of several light sources. Materials discussed include colorants and natural fibers; pulp, paper, and wood; natural and synthetic polymers; fluorescent whitening agents; photographic and reprographic materials; and objects containing combinations of materials. Approximations and assumptions used in the evaluation process are discussed in some detail, with examples of the different types of calculations. The research in conservation reference series presents the findings of research conducted by the Getty Conservation Institute and its individual and institutional research partners, as well as state-of-the-art reviews of conservation literature. Each volume covers a topic of current interest to conservators and conservation scientists.

📖 **GOOD ECONOMICS FOR HARD TIMES** ABHIJIT V. BANERJEE, ESTHER DUFLO, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original,

PROVOCATIVE, AND URGENT, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.
