Anticorruption in History Ronald Kroeze, André Vitória, Guy Geltner, 2018 Anticorruption in History is a timely and urgent book: corruption is widely seen today as a major problem we face as a global society, undermining trust in government and financial institutions, economic efficiency, the principle of equality before the law and human wellbeing in general. Corruption, in short, is a major hurdle on the path to Denmark a feted blueprint for stable and successful statebuilding. The resonance of this view explains why efforts to promote anticorruption policies have proliferated in recent years. But while the subject of corruption and anticorruption has captured the attention of politicians, scholars, NGOs and the global media, scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place, with the attendant diversity in how to define, identify and address corruption. Economists, political scientists and

policy-makers in particular have been generally content with tracing the differences between low-corruption and high-corruption countries in the present and enshrining them in all manner of rankings and indices. The long-term trends & social, political, economic, cultural; potentially undergirding the position of various countries plays a very small role. Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to a country's image (of itself or as construed from outside) as being more or less corrupt. It is precisely this scholarly lacuna that the present volume intends to begin to fill. The book addresses a wide range of historical contexts: Ancient Greece and Rome, Medieval Eurasia, Italy, France, Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania, the Ottoman Empire, the Netherlands, Germany, Denmark, Sweden and the former German Democratic Republic.

1-Day Diet - the Fastest Diet in the World! Jennifer Jolan, Rich Bryda, 2014-01-06 If you've dreamed of a way to safely and quickly lose weight while still eating foods you love, then this book by bestselling weight loss authors Jennifer Jolan and Rich Bryda could be exactly what you're looking for. The 1-Day Diet is changing the diet and weight loss world. Based on hard science, it works without constantly dieting for days, weeks, and months at a time... without planning special meals... without counting calories...

and without needing to exercise. The idea behind this diet was first discovered by professional athletes (who wanted to lose body fat without starving or feeling tired) and then perfected for women by a world-class diet expert. In fact, it's not unusual to lose 2-5 pounds the first day and up to 30 pounds the first month without fat returning. The Best Part? You're only allowed to do the diet 1-3 days per week. The rest of the week you can eat all your favorite foods (even bad foods) as long as you follow a few simple guidelines. Some of the secrets in this fascinating book include: The science behind why it's almost impossible to fail here. (Even if everything else hasn't worked.) - How to diet 1 day a week to KEEP fat off forever. (No yo-yo effect or worrying about fat creeping back on.) - A simple 5-minute exercise that can double your weight loss speed on the 1-Day Diet. (Exercise is NOT required-but you can lose weight TWICE as fast by doing this simple exercise that takes only 5 minutes per day.) - How to use the 1-Day Diet Plan to cut your food bill almost in half. - How to prevent fat gain even while pigging out on holidays and weekends. - How the 1-Day Diet naturally eliminates cravings and thinking about food. - A spice that lowers blood sugar levels, makes you more insulin sensitive (that's really good thing), and helps you lose weight. - The 1-hour window to eat as bad as you want without gaining fat. (If you really want to indulge, eat your bad meals at this exact time to carbs turn into energy instead of fat.) - Why the 1-Day Diet is NECESSARY for pre-diabetic people... or who have full-blown diabetes. (Millions of people are pre-diabetic and don't even know it.) - Why typical dieting and exercise are often no match for CRAZY, out-of-control hormones... and how to fix your hormones so weight loss follows. - The culprit found in processed foods at a rate of 1,000,000 times higher than estrogen found in women's breasts! A disaster for weight loss. - How our foods

became so nutritionally empty that it now takes 26 of this fruit to equal the nutrition of 1 of them from 1914! - You know second-hand smoke is bad for you, right? Well, this common food is like the equivalent of second-hand smoke. Bad news... and you're eating it without even knowing it. - Women hold fat because they have 1,000 TIMES the concentration of these versus men (a big reason why women usually have a harder time losing weight). - This cheap substance has 84 different minerals... the version you probably get has only 2. Get the right one and start losing weight! Want more? 10 FREE Bonus Reports are Linked on the Last Page of the Book: 1. How to Lose Weight Spinning in a Circle like Kids 2.
