**A Guide to Tribes in Indonesia** Zulyani Hidayah, 2020-04-28 This encyclopedia provides a comprehensive overview of the traditions, cultures, kinship norms, and other significant cultural aspects of the tribes, or otherwise named ethnic groups, of Indonesia, by an Indonesian anthropologist. The entries are supported by illustrations drawn by the late author himself, and are also accompanied by maps indicating the geographic locations and distributions of each tribe throughout the vast archipelago. Originally written and published in Bahasa Indonesian, the text has been translated into English and revised to feature up-to-date information. In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Intended as a short work of reference, it will be indispensable to students and scholars researching Indonesia from anthropological, sociocultural, and ethnographic perspectives.

**Priests and Programmers** J. Stephen Lansing, 2009-01-10 For the Balinese, the whole of nature is a perpetual resource: through centuries of carefully directed labor, the engineered landscape of the island's rice terraces has taken shape. According to Stephen Lansing, the need for effective cooperation in water management links thousands of farmers together in hierarchies of productive relationships that span entire watersheds. Lansing describes the network of water temples that once managed the flow of irrigation water in the name of the Goddess of the Crater Lake. Using the techniques of ecological simulation modeling as well as cultural and historical analysis, Lansing argues that the symbolic system of temple rituals is not merely a reflection of utilitarian constraints but also a basic ingredient in the organization of production.

Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

**The Balinese** John Stephen Lansing, 1995 This study of the complex Balinese culture examines Balinese concepts of personhood and society; the integration of art into every aspect of Balinese life; the effects of the Green Revolution on Balinese agriculture; the ecological role of their water temples in an age-old system of irrigated rice terraces; and the ethnohistory of Bali, including both colonial and Balinese views. The book is organized around four different periods of fieldwork and includes an appendix of available films and videos on the Balinese.

**Synopsis of Javanese Literature 900-1900 A.D.** Theodore G. Th. Pigeaud, 2012-12-06 The present Literature of Java, Catalogue Raisonné of Javanese Manuscripts is a publication of the Library of the University of Leiden. It is no. IX of the series *Corpus of Manuscripti* published by this Library, and it is made available to the public by the Royal Institute of Linguistics and Anthropology. Originally the work was only meant to be a sequel to Dr H. H. Juynboll's *Supplement des Catalogues van de Javaansche en Madoereesche Handschriften der Leidsche Universiteits-Bibliotheek* in two volumes. The second volume appeared in 1911. It soon became clear, however, that this was the opportunity to publish an English Catalogue which could be used as an introduction to the study of Javanese literature more easily than the previous Dutch catalogues could. It is a matter of fact that Dr Juynboll and his predecessors wrote their catalogues with the intention of providing information on Javanese literature in general, and for several decades their books did render excellent services to students of Javanese civilization. The differences in structure between the older catalogues and the present book will be explained in the introduction to the second volume. In two volumes the contents of the previous catalogues, increased by an equal quantity of new material, has been rearranged according to a new system. The third volume, containing illustrations, facsimiles of manuscripts, maps and a general index of names and subjects, is entirely new.

**Perfect Order** J. Stephen Lansing,2012-09-16 Along rivers in Bali, small groups of farmers meet regularly in water temples to manage their irrigation systems. They have done so for a thousand years. Over the centuries, water temple networks have expanded to manage the ecology of rice terraces at the scale of whole watersheds. Although each group focuses on its own problems, a global solution nonetheless emerges that optimizes irrigation flows for everyone. Did someone have to design Bali's water temple networks, or could they have emerged from a self-organizing process? *Perfect Order*--a groundbreaking work at the nexus of conservation, complexity theory, and anthropology--describes a series of fieldwork projects triggered by this question, ranging from the archaeology of the water temples to their ecological functions and their place in Balinese cosmology. Stephen Lansing shows that the temple networks are fragile, vulnerable to the cross-currents produced by competition among male descent groups. But the feminine rites of water temples mirror the farmers' awareness that when they act in unison, small miracles of order occur regularly, as the jewel-like perfection of the rice terraces produces general prosperity. Much of this is barely visible from within the horizons of Western social theory. The fruit of a decade of multidisciplinary research, this absorbing book shows that even as researchers probe the foundations of cooperation in the water temple networks, the very existence of the traditional farming techniques they represent is threatened by large-scale development projects.
