**A Guide to Tribes in Indonesia** Zulyani Hidayah, 2020-04-28 This encyclopedia provides a comprehensive overview of the traditions, cultures, kinship norms, and other significant cultural aspects of the tribes, or otherwise named ethnic groups, of Indonesia, by an Indonesian anthropologist. The entries are supported by illustrations drawn by the late author himself, and are also accompanied by maps indicating the geographic locations and distributions of each tribe throughout the vast archipelago. Originally written and published in Bahasa Indonesian, the text has been translated into English and revised to feature up-to-date information. In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Intended as a short work of reference, it will be indispensable to students and scholars researching Indonesia from anthropological, sociocultural, and ethnographic perspectives.

Leaves of the Same Tree Leonard Y. Andaya, 2008-01-22 Despite the existence of about a thousand ethnolinguistic groups in Southeast Asia, very few historians of the region have engaged the complex issue of ethnicity. *Leaves of the Same Tree* takes on this concept and illustrates how historians can use it both as an analytical tool and as a subject of analysis to add further depth to our understanding of Southeast Asian pasts. Following a synthesis of some of the major issues in the complex world of ethnic theory, the author identifies two general principles of particular value for this study: the ideas that ethnic identity is an ongoing process and that the boundaries of a group undergo continual—if at times imperceptible—change based on perceived advantage. The Straits of Melaka for much of the past two millennia offers an ideal testing ground to better understand the process of ethnic formation. The straits forms the primary waterway linking the major civilizations to the east and west of

Southeast Asia, and the flow of international trade through it was the lifeblood of the region. Privileging ethnicity as an analytical tool, the author examines the ethnic groups along the straits to document the manner in which they responded to the vicissitudes of the international marketplace. Earliest and most important were the Malayu (Malays), whose dominance in turn contributed to the ethnicization of other groups in the straits. By deliberately politicizing differences within their own ethnic community, the Malayu encouraged the emergence of new ethnic categories, such as the Minangkabau, the Acehnese, and, to a lesser extent, the Batak. The Orang Laut and the Orang Asli, on the other hand, retained their distinctive cultural markers because a separate yet complementary identity proved to be economically and socially advantageous for them. Ethnic communities are shown as fluid and changing, exhibiting a porosity and flexibility that suited the mandala communities of Southeast Asia. *Leaves of the Same Tree* demonstrates how problematizing ethnicity can offer a more nuanced view of ethnic relations in a region that boasts one of the greatest diversities of language and culture in the world. Creative and challenging, this book uncovers many new questions that should revitalize and reorient the historiography of Southeast Asia.
