The Fleet that Had to Die Richard Hough,2000 Richard Hough recounts the fleet's extraordinary seven-month journey from the Baltic to the Far East, which eventually became a mission of heroic futility when Port Arthur, and with it the entire Russian Pacific Fleet, fell. As Admiral Rozhdestvensky's fleet lumbered through the Straits of Tsushima towards Vladivostok on 27 May 1905, the Japanese, in one of the most crushing naval victories of all time, utterly destroyed the Russian armada. The humiliating and total defeat of Russia was confirmed, giving rise to a new and dynamic superpower in the East.--BOOK JACKET.

**A Man and His Ship** Steven Ujifusa, 2013-06-04 "A fascinating historical account...A snapshot of the American Dream culminating with this country's mid-century greatness" (The Wall Street Journal) as a man endeavors to build the finest, fastest, most beautiful ocean liner in history. The story of a great American Builder at the peak of his power, in the 1940s and 1950s, William Francis Gibbs was considered America's best naval architect. His quest to build the finest, fastest, most beautiful ocean liner of his time, the SS United States, was a topic of national fascination. When completed in 1952, the ship was hailed as a technological masterpiece at a time when "made in America" meant the best. Gibbs was an American original, on par with John Roebling of the Brooklyn Bridge and Frank Lloyd Wright of Fallingwater. Forced to drop out of Harvard following his family's sudden financial ruin, he overcame debilitating shyness and lack of formal training to become the visionary creator of some of the finest ships in history. He spent forty years dreaming of the ship that became the SS United States. William Francis Gibbs was driven, relentless, and committed to excellence. He loved his ship, the idea of it, and the realization of it, and he devoted himself to making it the epitome of luxury travel during the triumphant post-World War II era. Biographer Steven Ujifusa brilliantly describes the way Gibbs worked and how his vision transformed an industry. A Man and His Ship is a tale of ingenuity and enterprise, a truly remarkable journey on land and sea.

Secret Aircraft Designs of the Third Reich David Myhra, 1998 In Secret Aircraft Designs of the Third Reich aircraft biographer David Myhra gives the reader much more than pictures of proposed German aircraft projects, although this work is richly illustrated by state-of-the-art digital images by Mario Merino. The total number of German projects is in excess of 400. Blohm und Voss tops the list with over 200 project designs. The reader is introduced to the men behind these proposed aircraft. One will discover Woldemar Voight's frustration with his Me P.1101 and why it simply would not jell. The reader will learn why Dr. G  thert of Gotha lobbied the RLM to take his Go P.60 designs and scrap the Horten Ho 229. We see why critics of design genius Alexander Lippisch said that he was a man who had a new design almost every day but fails to put most of them into the air. Myhra describes the shameful handling of Hugo Junkers, the father of German aviation, by the Gestapo. It was Junkers who said that ideas for advanced aircraft projects were about as cheap as blueberries. To an idea must be added materials, resources, and time. And time in all the secret projects was short, very short. Although over 400 aircraft projects

were on the drawing board when the war in Europe ended in May 1945, only a handful were in the prototype stage. This outstanding book also offers a superb collection of photographs of scale models from contributors throughout the world, and digital images by Mario Merino and Andreas Ott that offer a one-of-a-kind look at secret German designs.

*The Cult of Pythagoras* Alberto A. Martinez, 2013-06-26 Martínez discusses various popular myths from the history of mathematics. Some stories are partly true, others are entirely false, but all show the power of invention in history. Martínez inspects a wealth of primary sources, in several languages, over a span of many centuries. By exploring disagreements and ambiguities in the history of the elements of mathematics, *The Cult of Pythagoras* dispels myths that obscure the actual origins of mathematical concepts. Chosen as a major selection by Scientific American Book Club (Library of Science(R))

**Achtung-Panzer!** Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Postwar Aircraft* Jerry Scutts, 2000-10-27 Postwar military aviation is dominated by the multi-role jet aircraft. This book looks at military jets from the F-86 Sabre of the Korean War through to the Tornados and F-18s of today and the key issues associated with accurate detailing, markings and camouflage schemes.
