An Inquiry Into the Principles and Policy of the Government of the United States ... John Taylor, 1814

Meaningful Making 2 Paulo Blikstein, Sylvia Libow Martinez, Heather Allen Pang, 2019-03-08 Meaningful Making 2 is a second volume of projects and strategies from the Columbia University FabLearn Fellows. This diverse group of leading K-12 educators teach in Fab Labs, makerspaces, classrooms, libraries, community centers, and museums--all with the goal of making learning more meaningful for every child. A learning revolution is in the making around the world. Enthusiastic educators are using the new tools and technology of the maker movement to give children authentic learning experiences beyond textbooks and tests. The FabLearn Fellows work at the forefront of this movement in all corners of the globe. In this book, the FabLearn Fellows share all new inspirational lesson ideas, strategies, and recommended projects across a broad range of age levels. Illustrated with color photos of real student work, the Fellows take you on a tour of the future of learning, where children make sense of the world by making things that matter to them and their communities. To read this book is to rediscover learning as it could be and should be-- a joyous, mindful exploration of the world, where the ultimate discovery is the potential of every child.

Journal of Inventions Jaspre Bark, 2009 A collection of pop-ups and illustrations based on the personal notebooks and sketches of Leonardo da

Vinci. Includes 3-D pop-ups of six of da Vinci's most famous ideas that never took physical form - until now.

Peculiar Deaths of Famous Mathematicians Ioanna Georgiou, 2022-06-30 Some mathematicians will not only be remembered for their mathematical advancements, but also for their peculiar deaths; some of those gravely miscalculated! But one of the stories is distorted--can you guess which one? Peculiar Deaths combines short stories about key mathematicians from the past, with details of the mathematical advances that they made. To the puzzle of which death is made up, there is also a visual puzzle in each chapter. A great way to learn about mathematics of the past, and for Middle, Junior High, and High School students to enjoy learning and understand key concepts. 1. Can Beans Kill You? - Pythagoras 2. Death by Square Root - Hippasus 3. You should not be Disturbing my Circles! - Archimedes 4. What? A Woman Mathematician? Die! - Hypatia 5. A bit of Gambling Killed No-one, Ever - Gerolamo Cardano 6. A Very Rich Way to Die - Tycho Brahe 7. Death by Time Calculation - Abraham De Moivre 8. Just a Bit Too Young - Evariste Galois 9. At the Mental Asylum - Andre Bloch 10. Self-imposed Starvation and other Difficulties - Kurt Gödel

Toys from Trash Arvind Gupta, 2001 Get the junk out of the trunk and fashion it into cool toys that promise endless hours of fun. Create over 50 toys- a cool stick figure from ice cream sticks, a snazzy goody bag from an old plastic bottle, a simple spoon propeller from plastic spoons and even a complicated water turbine from a water

bottle and drinking straws. All out of readily available material. The step-by-step instructions and simple and clear illustrations make this a handy book to have at home to tide over long vacations.

Origami for the Connoisseur Kunihiko

Kasahara, Toshie Takahama, 1998-10 Here at last is an origami book intended solely for the advanced paperfolder. Groundbreaking in concept and challenging in content, it presents sixty-five ingenious projects by respected masters working in a variety of themes and origami genres. From Toshikazu Kawasaki's Unique Iso-area Folding Method to David Briil's remarkable bottle to Peter Engel's playful kangaroo, the featured designs have been carefully chosen to test the refined sensibilities and stimulate the artistic appetites of the origami devotee. If you are an accomplished paperfolder you will be inspired by the beauty and logic of the geometric form as discovered in such designs as Hourglass, Rotating Tetrahedon, Brain Ticklers, and Extraterrestrial Being. You will delight in the wit and poetry of representational origami as you create delicate and winsome patterns for Kitten, Goose, Pelican, Giraffe, Camellia, Spiral Snail Shell, Ground Beetle, Pine Cone, Fox, and many more designs. What's more, you will find the key to successfully mastering numerous intricate techniques and complex paper fold...with ease! This is no ordinary origami workbook. Complicated processes are made highly accessible-yet remain daring-through clear, concise instructions and highly detailed diagrams. One of the unexpected joys of the book is that its

mentally invigorating text will serve as an ongoing inspiration to novel approaches and new origami adventures - even after you have completed a project.

Grail Diary Henry Jones, 2016-07-28 This is a prop replica of Dr. Henry Jones personal diary filled with notes and sketches from his many years of searching for the Holy Grail. There are 180 screen accurate pages for fans of Indiana Jones to enjoy. PLEASE NOTE: NO additional inserts included with this version and the cover is printed softcover paper, no leather.

The Cult of Pythagoras Alberto A. Martinez, 2013-06-26 Martínez discusses various popular myths from the history of mathematics. Some stories are partly true, others are entirely false, but all show the power of invention in history. Martínez inspects a wealth of primary sources, in several languages, over a span of many centuries. By exploring disagreements and ambiguities in the history of the elements of mathematics, *The Cult of Pythagoras* dispels myths that obscure the actual origins of mathematical concepts. Chosen as a major selection by Scientific American Book Club (Library of Science(R))

Mansfield Park & Pride and Prejudice Jane Austen, 2018-03-21 This eBook edition of Mansfield

Park & Pride and Prejudice has been formatted to the highest digital standards and adjusted for readability on all devices. Pride and Prejudice – Mr. Bennet of the Longbourn estate has five daughters, but his property is entailed, meaning that none of the girls can inherit it. His wife has no fortune, so it is imperative that at least one of the girls marry well in order to support the others on his death. The story charts the emotional development of Elizabeth Bennet who learns the error of making hasty judgments and comes to appreciate the difference between the superficial and the essential. Mansfield Park – Frances Fanny Price, at age 10, is sent from her overburdened family home to live with her uncle and aunt in the country in Northamptonshire. It is a jolting change, from the elder sister of many, to the youngest at the estate of Sir Thomas Bertram, husband of her mother's older sister. Her aunt is kind but her uncle frightens her with his authoritative demeanor. Fanny's mother has another sister, Mrs. Norris, who doesn't like and mistreats Fanny. The story follows Fanny's development from troubling adaptation in the wealthy household, through turbulent adolescence, to marriage.

Mathemagics Arthur Benjamin, Michael Shermer, 1998 Using proven techniques, this volume shows how to add, subtract, multiply and divide faster than is possible with a calculator or pencil and paper, and helps readers conquer their nervousness about math.

Mathematics, Poetry And Beauty Ron Aharoni, 2014-12-23 What does mathematics have to

do with poetry? Seemingly, nothing. Mathematics deals with abstractions while poetry with emotions. And yet, the two share something essential: Beauty. "Euclid alone has looked on beauty bare," says the title of a poem by Edna St. Vincent Millay. A winner of the CHOICE Outstanding Academic Title 2015, "Mathematics, Poetry and Beauty" tries to solve the secret of the similarity between the two domains. It tries to explain how a mathematical argument and a poem can move us in the same way. Mathematical and poetic techniques are compared, with the aim of showing how they evoke the same sense of beauty. The reader may find that, as Bertrand Russell said, "Mathematics, rightly viewed, possesses not only truth, but supreme beauty – a beauty hold and austere, like that of sculpture ... sublimely pure, and capable of a stern perfection such as only the greatest art can show."

Guarding the Art ,2022-03-27 This is an exhibition about the relationship between security guards and the art they protect every day. It shines a light on the perspectives of security officers and offers a collaborative framework for learning about the exhibition process, the security officers' experiences, and provides opportunities for professional growth and mentorship. The exhibition and accompanying catalogue feature works from the BMA collection.

The Science Record Alfred Ely Beach, 1874

Pangeometry Nikolai Ivanovich Lobachevskii, 2010
Lobachevsky wrote Pangeometry in 1855, the year before his death. This memoir is a resume of his work on non-Euclidean geometry and its applications and can be considered his clearest account on the subject. It is also the conclusion of his life's work and the last attempt he made to acquire recognition. The treatise contains basic ideas of hyperbolic geometry, including the trigonometric formulae, the techniques of computation of arc length, of area and of volume, with concrete examples. It also deals with the applications of hyperbolic geometry to the computation of new definite integrals. The techniques are different from those found in most modern books on hyperbolic geometry since they do not use models. Besides its historical importance, Lobachevsky's Pangeometry is a beautiful work, written in a simple and condensed style. The material that it contains is still very alive, and reading this book will be most useful for researchers and for students in geometry and in the history of science. It can be used as a textbook, as a sourcebook, and as a repository of inspiration. The present edition provides the first complete English translation of Pangeometry available in print. It contains facsimiles of both the Russian and the French original versions. The

translation is accompanied by notes, followed by a biography of Lobachevsky and an extensive commentary.
