Architectural Origami Ingrid Siliakus, María Victoria Garrido Bianchini, Joyce Aysta, 2009 With just a little skill in cutting and folding, you can make perfect miniature paper replicas of great architecture - small enough to fit into an envelope as a greetings card, beautiful enough to put on display. *Architectural Origami* offers easy-to-use templates for 15 structures, from the Taj Mahal to the Rialto Bridge, all demonstrated by leading architectural origami artists. There are basic principles to start you off and advanced guidance on designing buildings of your own, plus detailed architectural narratives and graphics describing the original buildings. A craft knife, pencil, a ruler and a cutting board are all you need to undertake this intriguing craft. You'll find it as absorbing as drawing and as reflective as origami. When you've absorbed all the basic principles and tried your hand at all the buildings in the book, you'll find that you've learned enough to start you off on designing origami architecture of your own. About the authors Maria Victoria Garrido Bianchini is an origamic architecture designer with a degree in Architecture and Urbanism, whose work has been exhibited in New York. Ingrid Siliakus has been an origamic architecture designer/artist for over ten years. Her work has been displayed in exhibitions all over the world.

The Traditional Crafts of Egypt Menha el-Batraoui, Minḥah Baṭrāwī, 2016 Many traditional crafts practiced in contemporary Egypt can be traced back hundreds, if not thousands, of years. Scenes inscribed on the walls of ancient temples and tombs depict the earliest Egyptians making pottery and papyrus and working with stone, wood, and other materials. The eleven chapters of this volume explore these and other crafts that continue to flourish in Egypt. From copper and glass works to jewelry, woodwork, and hand-woven carpets and fabric, each chapter offers an in-depth look at one material or craft and the artisans who keep its traditions alive. The authors, drawing on historical sources and documentary research, sketch the evolution of each craft, looking into its origins, the development of tools and methods used in the craft, and the diverse influences that have shaped the form and function of craft items produced today, ranging widely through the pharaonic, Coptic, Islamic, and modern periods. This historical examination is complemented by extensive field research and interviews with craftsmen and women, which serve to set these crafts into a living cultural context and offer a window into the modern craft economy, the lives of craftspeople, and the local communities and traditions they express and sustain. The volume is amply illustrated with vivid photographs of contemporary craft items and artisans at work, from the coastal town of Damietta to the far-flung deserts and the ancient alleyways of Cairo. It is a narrative and visual tour that provides valuable insight into contemporary Egypt as seen through its material culture and the legions of unsung artists who nourish and enrich it.

Vertical Urbanism Zhongjie Lin,José L. S. Gámez,2018-04-27 Studies of compact cities have evolved along with the rising awareness of climate change and sustainable development. Relevant debates, however, reveal that the prevailing definitions and practices of compact cities are tied primarily to traditional Western urban forms. This book reinterprets compact city, and develops a ground-breaking discourse of Vertical Urbanism, a concept that has never been critically articulated. It emphasizes Vertical Urbanism as a dynamic design strategy instead of a static form, distinguishing it from the stereotyped concept of vertical city or towers in the park dominant in China and elsewhere, and suggests its adaptability to different geographic and cultural contexts. Using Chinese cities as laboratories of investigation, this book explores the design, ecological, and sociocultural dimensions of building compact cities, and addresses important global urban issues through localized design solutions, such as the relationship between density and vitality, the integration of horizontal and vertical dimensions of design, and the ecological and social adaptability of combinatory mega-forms. In addition, through discussions with scholars from the United States, China, and Japan, this book provides an insight into the theoretical debates surrounding compact city and Vertical Urbanism in the global context. Scholars and students in architecture and urban planning will be attracted by this book. Also, it will appeal to readers with an interest in urban development and Asian studies.
