Building and Flying Model Aircraft Robert

Schleicher, James R. Barr, 2012-01-27 Richly illustrated manual introduces beginners to basic aerodynamic principles and all aspects of model-building — from paint and tissue covering to the secrets of selecting the best engine, fuel, and radio-control rig for each plane.

Apollo's Warriors Michael E. Haas, 1998-05

Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

Masterpieces of Swiss Entrepreneurship Jean-Pierre

Jeannet, Thierry Volery, Heiko Bergmann, Cornelia Amstutz, 2021-04-21 This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly

active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich

Special Air Warfare and the Secret War in Laos Air University Press, Joseph D Celeski, 2019-07-02 The story of special air warfare and the Air Commandos who served for the ambassadors in Laos from 1964 to 1975 is captured through extensive research and veteran interviews. The author has meticulously put together a comprehensive overview of the involvement of USAF Air Commandos who served in Laos as trainers, advisors, and clandestine combat forces to prevent the communist takeover of the Royal Lao Government. This book includes pictures of those operations, unveils what had been a US government secret war, and adds a substantial contribution to understanding the wider war in Southeast Asia.

Aerodynamics, Aeronautics, and Flight Mechanics

Barnes W. McCormick, 1995 Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability

and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Hmong Story Cloths Linda Gerdner, 2015 Hmong story cloths provide a visual documentation of the historical and cultural legacy of the Hmong people from the country of Laos. The Hmong first began making the story cloths during their time in refugee camps, and featured here are 48 vibrant story cloths that provide a comprehensive look at their lives and culture. The creation of a story cloth begins with the selection of fabric and images outlined onto the fabric. Long satin stitches of multi-colored threads fill in the image, while details are applied with intricate satin stitches and borders pieced together and hand-stitched. Topics include history, traditional life in Laos, Hmong New Year, folk tales, and neighboring people. The quality and diversity of content of the story cloths build upon one another to provide a holistic understanding of the Hmong culture and history. Augmented with personal stories and artifacts, this book is perfect for history buffs and textile artisans alike.

From weather observations to atmospheric and climate sciences in Switzerland Saskia Willemse, Markus Furger, 2016-06-02 In 2016 the Swiss Society for Meteorology (Schweizerische Gesellschaft für Meteorologie, SGM) celebrates its 100th anniversary. Compared to other meteorological societies it is not among the oldest ones. Nevertheless, meteorology has gone through such a remarkable evolution in the past 100 years that it is worthwhile to take a look back and recapitulate the developments of both science and SGM – and to reveal their interaction. The idea of this book is to give an overview of what

has happened in the field of atmospheric sciences in Switzerland since the first systematic long-term meteorological observations until today.

Adventure and Extreme Sports Injuries Omer Mei-Dan, Mike Carmont, 2012-11-13 Adventure and extreme sports are increasing in popularity and it is not surprising that commercial adventure tourism and the accompanying life style and fashion, have become increasingly important to world economy. These unique sports involve not only major physical endurance and mental challenges but interaction and bonding with nature. They also tend to attract and excite audiences, both at the event and in the media. They are exciting to watch and redraw the boundaries of human achievement with the accompanying risks of injury and death. Adventure sports are usually performed in beautiful, exciting and remote locations or in extreme environments far away from medical assistance. Extreme sports usually involve an element of increased risk. These risks are highlighted by the media, usually after a reported accident or fatality but may vary according to the involvement of the participant; the weekend recreational adventure sports athlete or the experienced professional. A wide variety of sports fall into the category of adventure and extreme sports and with an increasing number of disciplines, this field is ever expanding. Sports are performed in contact with the "ground"; mountain running and biking, rock climbing, ice climbing and mountaineering. In the air: skydiving and base jumping. On water: surfing, white water kayaking and rafting, board sailing and diving. And also involve mechanical vehicles and animals! Some sports may be performed as a combination of few disciplines, such as water and air, e.g. kite surfing, and as so involve very unique mechanisms of injury. Sports events can also be merged to form a multi-sport race comprising many disciplines lastly from single to multi day races.

Sports may involve competition with others, against the environment or with oneself, frequently the most ferocious adversary. Adventure sports are becoming increasingly popular in the general public and a few take these sports to an extreme level with the accompanying risks. Those that do, bring such time and dedication that they become professional in terms of training, preparation and finance. More and more people are enjoying adventure sports and unfortunately increased numbers are becoming injured as a result. Future research is progressing alongside the sport development, to allow the sport mechanisms, injury patterns and predisposing factors to be better understood. It is the hope of all researchers to make the sports safer without detracting from their adventurous nature. The aim and scope of our book would be to bring the sports medicine involved in each of these sports into one volume. We would explain each sport including subtle similarities and differences, the common injury mechanisms, patterns of injury and treatment options. Additional chapters would include the mental characteristics of adventure racers and extreme sports athletes, together with the complexities of competing in hot and cold extreme environments. The book will present chapters focussing on the sports listed below, concentrating on published literature and newly formed studies by experts in the fields of injury epidemiology, prevention, management and rehabilitation.

Air America Christopher Robbins, 2012-05-03 The incredible inside story of the world's most extraordinary covert operation. Air America - a secret airline run by the CIA - flew missions no one else would touch, from General Claire Cennault's legendary Flying Tigers in WW II to two brutal decades cruising over the bomb-savaged jungles of Southeast Asia. Their pilots dared all and did all - a high-rolling, fast-playing bunch of has-beens and hellraisers whose motto was 'Anything, Anywhere, Anytime'. Whether it was delivering food and weapons or spooks and opium, Air America was the one airline where you didn't need reservations - just a hell

of a lot of courage and a willingness to fly to the bitter end.

Apartheid Guns and Money Hennie van Vuuren, 2019-03-01 In its last decades, the apartheid regime was confronted with an existential threat. While internal resistance to the last whites-only government grew, mandatory international sanctions prohibited sales of strategic goods and arms to South Africa. To counter this, a global covert network of nearly fifty countries was built. In complete secrecy, allies in corporations, banks, governments and intelligence agencies across the world helped illegally supply guns and move cash in one of history's biggest money laundering schemes. Whistleblowers were assassinated and ordinary people suffered. Weaving together archival material, interviews and newly declassified documents, *Apartheid Guns and Money* exposes some of the darkest secrets of apartheid's economic crimes, their murderous consequences, and those who profited: heads of state, arms dealers, aristocrats, bankers, spies, journalists and secret lobbyists. These revelations, and the difficult questions they pose, will both allow and force the new South Africa to confront its past.

Suitcase of Dreams Tania Blanchard, 2018-10-23 From the bestselling author of *The Girl from Munich*, a sweeping, dramatic tale of love and identity, inspired by a true story. After enduring the horror of Nazi Germany and the chaos of postwar occupation, Lotte Drescher and her family arrive in Australia in 1956 full of hope for a new life. It's a land of opportunity, where Lotte and her husband Erich dream of giving their children the future they have always wanted. After years of struggling to find their feet as New Australians, Erich turns his skill as a wood carver into a successful business and Lotte makes a career out of her lifelong passion, photography. The sacrifices they have made finally seem worth it until Erich's role in the trade union movement threatens to have him branded a communist and endanger their family. Then darker shadows of the past reach out to them from Germany, a world and a lifetime away. As the Vietnam War looms, an unexpected visitor forces Lotte to a turning point. Her decision will change her life

forever . . . and will finally show her the true meaning of home. PRAISE FOR TANIA BLANCHARD 'Captures the intensity of a brutal and unforgiving war, successfully weaving love, loss, desperation and, finally, hope into a gripping journey of self-discovery.' Courier Mail 'An epic tale, grand in scope ... Packs an emotional punch that will reverberate far and wide.' Weekly Times 'A tumultuous journey from order to bedlam, and from naive acceptance of the status quo to the gradual getting of political wisdom.' Sunday Age 'An original and innovative take on the World War II genre that captures the hauntingly desperate essence of the war. Tania Blanchard has written yet another spectacular novel. Don't miss this.' Better Reading 'A sweeping, dramatic tale of love and identity.' Fraser Coast Chronicle

Introduction to Aircraft Performance, Selection, and Design

Francis J. Hale, 1984-03-20 A self-contained in-depth treatment of aircraft performance, designed for a first course in aeronautical or aerospace engineering for undergraduate engineers. Provides an understanding of why conventional aircraft look and fly the way they do. This well written text covers turbofan and turboprop propulsion, subjects often avoided in other texts. New to the text is the treatment of wind effects on aircraft. Includes illustrative examples and references to practical piloting procedures and the significance of parameters.
