The Emperor of All Maladies Siddhartha Mukherjee, 2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Out Of Control Kevin Kelly, 2009-04-30 Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

The Chinatown Death Cloud Peril Paul Malmont, 2007-06-05 Set in the colorful world of the 1930s and peopled with writers H.P. Lovecraft, L. Ron Hubbard, Lester Dent, and Walter Gibson, this swashbuckling literary thriller propels the characters into a genuine pulp adventure in which they try to thwart a madman intent on creating a new global empire.

This book is intended to serve as your one-stop how-to animation guide. Whether you're new to animation or a very experienced digital animator, here you'll find fundamentals, key classical techniques, and professional advice that will strengthen your work and well-roundedness as an animator. Speaking from experience, White presents time-honored secrets of professional animators with a warm, masterly, and knowledgeable approach that has evolved from over 30 years as an award-winning animator/director. The book's enclosed downloadable resources presents classic moments from animation's history through White's personal homage to traditional drawn animation, *Endangered Species*. Using movie clips and still images from the film, White shares the 'making of' journal of the film, detailing each step, with scene-by-scene descriptions, technique by technique. Look for the repetitive stress disorder guide on the downloadable resources, called, *Mega-hurts*. Watch the many movie clips for insights into the versatility that a traditional, pencil-drawn approach to animation can offer.

Mastering the Core Teachings of the Buddha Daniel Ingram, 2020-01-20 The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. It's easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

The Language of Architecture Andrea Simitch, Val Warke, 2014-06-01
DIV Learning a new discipline is similar to learning a new language; in order to master the foundation of architecture, you must first master the basic building blocks of its language – the definitions, function, and usage. Language of Architecture provides students and professional architects with the basic elements of architectural design, divided into twenty-six easy-to-comprehend chapters. This visual reference includes an introductory, historical view of the elements, as well as an overview of how these elements can and have been used across multiple design disciplines.

The Divine Reality Hamza Andreas Tzortzis, 2019-09-30
In *The Divine Reality*, (Newly Revised Edition 2019) Hamza Andreas Tzortzis provides a compelling case for the rational and spiritual foundations of Islam, whilst intelligently and compassionately deconstructing atheism. Join him on an existential, spiritual and rational journey that articulates powerful arguments for the existence of God, the Qur'an, the Prophethood of Muhammad and why we must know, love and worship God. He addresses academic and popular objections while showing how contemporary atheism is based on false assumptions about reality, which leads to incoherent answers to life's important questions. Does hope, happiness and human value make sense without the Divine? Do we have an ultimate purpose? Can we have consciousness and rational minds without God? Did the universe come from nothing? Does evil and suffering negate Divine mercy? Has scientific progress led to the denial of God? Are revelation and prophethood myths? Is God worthy of our worship? If you want to know how the Islamic intellectual and spiritual tradition answers these questions then this is the book for you. Hamza Andreas Tzortzis's new book presents a much needed comprehensive account of Islamic theism that draws upon Western and Islamic thought. Hamza Tzortzis is an international speaker, writer and instructor. He has a PgCert and an MA in philosophy and is currently continuing his postgraduate studies in the field. Hamza has studied Islamic thought and theology under qualified scholars. He has delivered workshops and courses on topics related to Islamic thought and philosophy. Hamza has debated prominent academics and thinkers on Islam and atheism.

Frame by Frame Hannah Frank, 2019-04-09
At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. In this beautifully written and deeply researched study, Hannah Frank provides an original way to understand American animated cartoons from the Golden Age of animation (1920–1960). In the pre-digital age of the twentieth century, the making of cartoons was mechanized and standardized: thousands of drawings were inked and painted onto individual transparent celluloid sheets (called “cels”) and then photographed in succession, a labor-intensive process that was divided across scores of artists and technicians. In order to see the art, labor, and technology of cel animation, Frank slows cartoons down to look frame by frame, finding hitherto unseen aspects of the animated image. What emerges is both a methodology and a highly original account of an art formed on the assembly line.

The Onion Book of Known Knowledge The Onion, 2012-10-23
Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: The Onion's compendium of all things known. Replete with an astonishing assemblage of facts, illustrations, maps, charts, threats, blood, and additional fees to edify even the most simple-minded book-buyer, THE ONION BOOK OF KNOWN KNOWLEDGE is packed with valuable information—such as the life stages of an Aunt; places to kill one's self in Utica, New York; and the dimensions of a female bucket, or pail. With hundreds of entries for all 27 letters of the alphabet, THE ONION BOOK OF KNOWN KNOWLEDGE must be purchased immediately to avoid the sting of eternal ignorance.

Samak the Ayyar, 2021-08-03
The adventures of Samak, a trickster-warrior hero of Persia's thousand-year-old oral storytelling tradition, are beloved in Iran. Samak is an ayyar, a warrior who comes from the common people and embodies the ideals of loyalty, selflessness, and honor—a figure that recalls samurai, ronin, and knights yet is distinctive to Persian legend. His exploits—set against an epic background of palace intrigue, battlefield heroics, and star-crossed romance between a noble prince and princess—are as deeply rooted in Persian culture as are the stories of Robin Hood and King Arthur in the West. However, this majestic tale has remained little known outside Iran. Translated from the original Persian by Freydoon Rassouli and adapted by Prince of Persia creator Jordan Mechner, this timeless masterwork can now be enjoyed by English-speaking readers. A thrilling and suspenseful saga, *Samak the Ayyar* also offers a vivid portrait of Persia a thousand years ago. Within an epic quest narrative teeming with action and supernatural forces, it sheds light on the lives of ordinary people and their social worlds. This is the first complete English-language version of a treasure of world culture. The translation is grounded in the twelfth-century Persian text while paying homage to the dynamic culture of storytelling from which it arose.

Infinite Powers Steven Strogatz, 2019
From preeminent math personality and author of *The Joy of x*, a brilliant and endlessly appealing explanation of calculus - how it works and why it makes our lives immeasurably better. Without calculus, we wouldn't have cell phones, TV, GPS, or ultrasound. We

wouldn't have unraveled DNA or discovered Neptune or figured out how to put 5,000 songs in your pocket. Though many of us were scared away from this essential, engrossing subject in high school and college, Steven Strogatz's brilliantly creative, down-to-earth history shows that calculus is not about complexity; it's about simplicity. It harnesses an unreal number--infinity--to tackle real-world problems, breaking them down into easier ones and then reassembling the answers into solutions that feel miraculous. Infinite Powers recounts how calculus tantalized and thrilled its inventors, starting with its first glimmers in ancient Greece and bringing us right up to the discovery of gravitational waves (a phenomenon predicted by calculus). Strogatz reveals how this form of math rose to the challenges of each age: how to determine the area of a circle with only sand and a stick; how to explain why Mars goes backwards sometimes; how to make electricity with magnets; how to ensure your rocket doesn't miss the moon; how to turn the tide in the fight against AIDS. As Strogatz proves, calculus is truly the language of the universe. By unveiling the principles of that language, Infinite Powers makes us marvel at the world anew.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Hidden Truth - Forbidden Knowledge Steven M. Greer,2006 Greer unveils the actual contact experiences he has had with UFOs and extraterrestrial civilizations, beginning as a young child. Following a prolonged near-death experience at age 17, Greer explains that he experienced cosmic consciousness and found the Rosetta Stone of ET contact -- the power of the unbounded mind within each of us -- that is responsible for much of the work being done by the CSETI (Center for the Study of Extraterrestrial Intelligence) project.

Trigger Happy Steven Poole,2011-11-07 The Edge calls Trigger Happy a seminal piece of work. For the first time ever, an aficionado with a knowledge of art, culture, and a real love of gaming takes a critical look at the future of our videogames, and compares their aesthetic and economic impact on society to that of film. Thirty years after the invention of the simplest of games, more videogames are played by adults than children. This revolutionary book is the first-ever academically worthy and deeply engaging critique of one of today's most popular forms of play: videogames are on track to supersede movies as the most innovative form of entertainment in the new century.

Forensis Lawrence Abu Hamdan,Nabil Ahmed,Maayan Amir,Hisham Ashkar,Emily Dische-Becker,Ryan Bishop,2014 The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of Forensis, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. Forensis, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants

present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

Words Without Pictures Charlotte Cotton,Alex Klein,2010 Words Without Pictures was originally conceived of by curator Charlotte Cotton as a means of creating spaces for thoughtful and urgent discourse around current issues in photography. Every month for a year, beginning in November 2007, an artist, educator, critic, art historian, or curator was invited to contribute a short, un-illustrated, and opinionated essay about an aspect of photography that, in his or her view, was either emerging or in the process of being rephrased. Each piece was available on the Words Without Pictures website for one month and was accompanied by a discussion forum focused on its specific topic. Over the course of its month-long life, each essay received both invited and unsolicited responses from a wide range of interested partiesstudents, photographers active in the commercial sector, bloggers, critics, historians, artists of all kinds, educators, publishers, and photography enthusiasts alikeall coming together to consider the issues at hand. All of these essays, responses, and other provocations are gathered together in a volume designed by David Reinfurt of Dexter Sinister. Previously issued as a print-on-demand title, Aperture is pleased to present Words Without Pictures to the trade for this first time as part of the Aperture Ideas series.

Games and Bereavement Sabine Harrer,2019-03-31 How can videogames portray love and loss? Games and Bereavement answers this question by looking at five videogames and carrying out a participatory design study with grieverers. Sabine Harrer highlights possible connections between grief and videogames, arguing that game design may help make difficult personal feelings tangible. After a brief literary review of grief concepts and videogame theory, the book deep-dives into examples of tragic inter-character relationships from videogame history. Building on these examples, the book presents a case study on pregnancy loss as a potential grief experience that can be validated through game design dialogue.

Paratextualizing Games Benjamin Beil,Gundolf S. Freyermuth,Hanns Christian Schmidt,2021-11-30 Gaming no longer only takes place as a ›closed interactive experience‹ in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?
