Train DK,2014-10-01 This glorious visual celebration of train travel keeps you on the right track with stop-offs at the most important and incredible rail routes from all over the world. Your first stop in The Train Book is the groundbreaking steam locomotives of the 19th century and your final destination is the high-speed bullet trains of today. From the Union-Pacific Railroad to the Trans-Siberian Railway, you'll cross the continents to experience epic journeys and staggering scenery. You'll pick a seat on the most iconic locomotives, including the Orient Express, the Blue Train, and the Eurostar. You can also inspect the engines of famous British trains, such as Rocket, Mallard, and Javelin, and international trains, such as India's Palace on Wheels and America's Thatcher Perkins. You'll meet the true pioneers of train and track, including Father of the Railways George Stephenson, engineering legend Isambard Kingdom Brunel, and Métro maestro Fulgence Bienvenüe. For train-spotters and transport enthusiasts everywhere, this is your trip of a lifetime.

Notes from the Hyena's Belly Nega

Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Underwater Dogs Seth Casteel,2012-10-23 The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the

currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In *Underwater Dogs*, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.

Sun Bread Elisa Kleven, 2004-03-30 Winter's gray chill has set in and everyone misses the sun- especially the baker. So she decides to bring some warmth to the town by making sun bread. And as the bread bakes, rising hot and delicious, everyone comes out to share in its goodness. Everyone, including the sun itself. With a lilting, rhyming text, colorful illustrations, and a recipe for baking your own sun bread, this tasty treat from the illustrator of the best-selling *Abuela* is just right for all ages to enjoy.

Road Transport Policy European Commission. Directorate-General for Energy and Transport, 2006 Examines the European Unions regulatory framework for the road transport sector. The brochure provides a history of the regulatory framework and outlines potential future actions to enhance regulatory harmonization.

Vehicle Propulsion Systems Lino Guzzella, Antonio Sciarretta, 2007-09-21 The authors of this text have written a comprehensive introduction to the modeling and optimization problems encountered when designing new propulsion systems for passenger cars. It is intended for persons interested in the analysis and optimization of vehicle propulsion systems. Its focus is on the control-oriented mathematical description of the physical processes and on the model-based optimization of the system structure and of the supervisory control algorithms.

The New Economic History of the Railways

(Routledge Revivals) Patrick O'Brien, 2014-11-13

The book, first published in 1977, contrasts new and older approaches to the history of transport and outlines a critical exposition of the methods used to quantify the contribution of railways to economic growth by means of counterfactual speculation and the measurement of social savings. The author also outlines and appraises an alternative measure of the impact of railways, namely the social rate of return on capital invested in railways. The final chapters are concerned with the effects on growth generated by the construction and diffusion of railways through expenditure on labour, capital goods and industrial inputs and through their effects on the integration of markets, and patterns of location.

Politics and Industrialization Colleen A. Dunlavy, 1994 Dunlavy examines the rich political context of a seeming paradox: authoritarian, centralized Prussia adopted a largely hands-off policy toward the railroads, but the more liberal, fragmented American government sought vigorously both to promote and to regulate the new industry. By also fragmenting interests and technological

choices, the American structure impeded the emergence of the railroad as a system, while the centralized Prussian structure facilitated it.

Lancashire Railways Mark Jones, 2012 Lancashire has always counted itself among the pioneers of Britain's railway network. As early as 1826 George Stephenson was appointed to build the Liverpool and Manchester Railway. From the beginning, though, the county's railways were constructed not for the purpose of passenger traffic but to move freight, principally coal, direct from the mines to its customers. As the demand for coal expanded to power the ever-increasing new industrial machines so the need for good railway connections grew to match it. By the mid 1850s some 250,000 navvies were working across the county on railway projects. In this well-researched and highly readable book local author Mark Jones offers a feast of nostalgia as he tells the story of Lancashire's railways in their heyday.
