**Playgrounds And Battlefields** Francisco Martínez, Klemen Slabina, Mihhail Lotman, Siobhan Kattago, Kevin Ryan, Tom Frost, Flo Kasearu, Marcos Farias-Ferreira, Jaanika Puusalu, Dita Bezdíčková, Emeli Theander, Patrick Laviolette, Alastair Bonnett, Oleg Pachenkov and Lilia Voronkova, Anne Vatén, Helena Holgersson, Patricia García Espín and Manuel García Fernández, Benjamin Noys, Kristina Norman, Madli Maruste, Pille Runnel and Ehti Järv, Alessandro Testa, Sean Homer, Tarmo Jüristo, 2014 This book explores whether the metaphors of 'playground' and 'battlefield' might be analytically meaningful terms for understanding contemporary society. The duality of playgrounds and battlefields is presented as a space of continuous becoming, related to the recreation, domination and experience of a place, as well as to corresponding practices of excess, interaction and enjoyment. We believe that a discussion about engagement and responsibility in a modern social setting is possible only through new concepts that avoid binary formulations. Playgrounds and battlefields are thus used as a trigger enabling a fresh approach to a contemporaneity that is highly influenced by the way in which societies deal with their past and future. In this sense, the 'Playgrounds and Battlefields' volume is a thematic one, mapping the field and offering grammar of possibility.

**Celebrating 100 Years of the Texas Folklore Society, 1909-2009** Kenneth L. Untiedt, 2009 The Texas Folklore Society is one of the oldest and most prestigious organizations in the state. Its secret for longevity lies in those things that make it unique, such as its annual meeting that seems more like a social event or family reunion than a formal academic gathering. This book examines the Society's members and their

substantial contributions to the field of folklore over the last century. Some articles focus on the research that was done in the past, while others offer studies that continue today. This book does more than present a history of the Texas Folklore Society: it explains why the TFS has lasted so long, and why it will continue.

**Communities of Play** Celia Pearce, 2011-09-30 The odyssey of a group of “refugees” from a closed-down online game and an exploration of emergent fan cultures in virtual worlds. Play communities existed long before massively multiplayer online games; they have ranged from bridge clubs to sports leagues, from tabletop role-playing games to Civil War reenactments. With the emergence of digital networks, however, new varieties of adult play communities have appeared, most notably within online games and virtual worlds. Players in these networked worlds sometimes develop a sense of community that transcends the game itself. In *Communities of Play*, game researcher and designer Celia Pearce explores emergent fan cultures in networked digital worlds—actions by players that do not coincide with the intentions of the game’s designers. Pearce looks in particular at the Uru Diaspora—a group of players whose game, *Uru: Ages Beyond Myst*, closed. These players (primarily baby boomers) immigrated into other worlds, self-identifying as “refugees”; relocated in *There.com*, they created a hybrid culture integrating aspects of their old world. Ostracized at first, they became community leaders. Pearce analyzes the properties of virtual worlds and looks at the ways design affects emergent behavior. She discusses the methodologies for studying online games, including a personal account of the sometimes messy process of ethnography. Pearce considers the “play turn” in culture and the advent of a participatory global playground enabled by networked digital games

every bit as communal as the global village Marshall McLuhan saw united by television. Countering the ludological definition of play as unproductive and pointing to the long history of pre-digital play practices, Pearce argues that play can be a prelude to creativity.

Speculative Everything Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

### **Learning and Connecting in School Playgrounds** Llyween Couper, Dean

Sutherland, 2019-03-04 Play is critical to children's well-being and development. All students should have access to and adequate time for positive play experiences every day. Learning and Connecting in School Playgrounds invites parents, teachers, principals and education administrators to take another look at their school playgrounds as spaces crucial to learning, well-being and development. This book combines research findings, commentary and the authors' personal experiences and observations together with the views of teachers, principals, parents and students related to play and play spaces. Key content includes consideration of the role of adults in the school playground, the influence of technology on play, the challenges experienced by children transitioning to new school environments and consideration of strategies to support students' access and participation in the playground. Cases are presented to illustrate the use of an audit tool to enhance school playgrounds. The future of school playgrounds is also considered through the reported hopes and dreams of adults and students and a range of recommendations are made for the review and development of schools' outdoor play spaces. Learning and Connecting in School Playgrounds is written with a sense of urgency, calling for the recognition of positive play experiences as invaluable to children's education. It includes important and challenging insights to inform and guide decision-making and will be an essential resource for all stakeholders who share responsibility for children's participation and learning during school break-times.

### **Developing an All-School Model for Elementary Integrative Music Learning**

Carol E. Reed-Jones, 2014-03 The purpose of this study was to investigate the potential for

increasing informal music-making in elementary school culture, and create a model of such music-making. Precedence for this model can be found in the literature of ethnomusicology, educational psychology and learning theory, multicultural music education, and cultural anthropology. Literature from four distinct traditions and contexts of music-making in integrative sociocultural contexts-sub-Saharan African ngoma, and Community Music as manifested in New Orleans second lines, old-time music and dance, and summer camp music-making-was parsed with a philosophical lens to determine and assess possible areas of intersection between these four participatory cultures and North American public school culture. Each of these five areas was examined through a comprehensive review of literature to define their salient characteristics. These characteristics were sorted to determine commonalities between areas, and the zones of intersection became the basis for a speculative model of integrative music learning, featuring the inclusion of musical opportunities and interludes throughout the school day, thus taking school music beyond the confines of the music room. Instruction in music classes would still continue, enhanced in this model by supplemental learning opportunities inspired by the informal learning of traditional world musics, the participatory practice of New Orleans second line parades, old-time music and dance, and summer camp music culture. This model of integrative learning is also informed by current educational best practices such as child-centered learning, peer tutoring, experiential learning, and multicultural perspectives. It acknowledges the diversity of traditions consulted, while aiming for the unity in their seemingly disparate disciplines. Five universal characteristics were uncovered in the search for areas of intersection

between North American elementary school culture, child culture, ngoma music-making, and Community Music-style music-making in New Orleans, old-time music and dance, and summer camp contexts: (a) Song; (b) play; (c) informal learning, as evidenced by oral tradition, peer tutoring, self-learning; (d) kinesthetic learning; and (e) contextualized learning, as evidenced in the sociocultural uses of music and situated learning. This model strives for the enactment of school music as a vital and integral part of daily school culture.

*The Play Ethic* Pat Kane, 2011-08-19 'Fizzes with intellectual curiosity. Kane writes engagingly and with a humility difficult to find among idea-entrepreneurs' James Harkin, Independent We all think we know what play is. Play is what we do as children, what we do outside of work, what we do for no other reason than for pleasure. But this is only half of the truth. The Play Ethic explores the real meaning of play and shows how a more playful society would revolutionize and liberate our daily lives. Using wide and varied sources - from the Enlightenment to Eminem, Socrates to Chaos theory, Kierkegaard to

Karaoke – The Play Ethic shows how play is fundamental to both society and to the individual, and how the work ethic that has dominated the last three centuries is ill-equipped to deal with the modern world. With verve, wit and intelligence, Pat Kane takes us on a tour of the playful world arguing that without it business, the arts, politics, education, even our family and spiritual lives are fundamentally impoverished. The Play Ethic seeks to change the way you look at your daily life, how you interact with others, how you view the world. It is a guidebook to new, exciting – and unsettling – times. Shocking, controversial, yet magnificently argued, The Play Ethic is a book no one who works, or has ever worked, can afford to be without. ‘Kane's Manifesto for a Different Way of Living is a brave attempt to inject a little playfulness . . . into the dull grind of the working stiff’ Iain Finlayson, The Times

Play Matters Miguel Sicart, 2014-08-15 Why play is a productive, expressive way of being human, a form of understanding, and a fundamental part of our well-being. What do we think about when we think about play? A pastime? Games? Childish activities? The opposite of work? Think again: If we are happy and well rested, we may approach even our daily tasks in a playful way, taking the attitude of play without the activity of play. So what, then, is play? In Play Matters, Miguel Sicart argues that to play is to be in the world; playing is a form of understanding what surrounds us and a way of engaging with others. Play goes beyond games; it is a mode of being human. We play games, but we also play with toys, on playgrounds, with technologies and design. Sicart proposes a theory of play that doesn't derive from a particular object or activity but is a portable tool for being—not tied to objects but brought by people to the complex interactions that form their daily

lives. It is not separated from reality; it is part of it. It is pleasurable, but not necessarily fun. Play can be dangerous, addictive, and destructive. Along the way, Sicart considers playfulness, the capacity to use play outside the context of play; toys, the materialization of play—instruments but also play pals; playgrounds, play spaces that enable all kinds of play; beauty, the aesthetics of play through action; political play—from Maradona's goal against England in the 1986 World Cup to the hacktivist activities of Anonymous; the political, aesthetic, and moral activity of game design; and why play and computers get along so well.

**Creative Economies, Creative Communities** Saskia Warren, Phil Jones, 2016-03-09 Investigating how people and places are connected into the creative economy, this volume takes a holistic view of the intersections between community, policy and practice and how they are co-constituted. The role of the creative economy and broader cultural policy within community development is problematised and, in a significant addition to work in this area, the concept of 'place' forms a key cross cutting theme. It brings together case studies from the European Union across urban, rural and coastal areas, along with examples from the developing world, to explore tensions in universal and regionally-specific issues. Empirically-based and theoretically-informed, this collection is of particular interest to academics, postgraduates, policy makers and practitioners within geography, urban and regional studies, cultural policy and the cultural/creative industries.

Gaming Rhythms Tom Apperley, 2011-06-16 Global gaming networks are heterogenous collectives of localized practices, not unified commercial products. Shifting the analysis of

digital games to local specificities that build and perform the global and general, Gaming Rhythms employs ethnographic work conducted in Venezuela and Australia to account for the material experiences of actual game players. This book explores the materiality of digital play across diverse locations and argues that the dynamic relation between the everyday life of the player and the experience of digital game play can only be understood by examining play-practices in their specific situations. -- Website.

The Talent Code Daniel Coyle, 2009-04-28 What is the secret of talent? How do we unlock it? This groundbreaking work provides readers with tools they can use to maximize potential in themselves and others. Whether you're coaching soccer or teaching a child to play the piano, writing a novel or trying to improve your golf swing, this revolutionary book shows you how to grow talent by tapping into a newly discovered brain mechanism. Drawing on cutting-edge neurology and firsthand research gathered on journeys to nine of the world's talent hotbeds—from the baseball fields of the Caribbean to a classical-music academy in upstate New York—Coyle identifies the three key elements that will allow you to develop your gifts and optimize your performance in sports, art, music, math, or just about anything.

- Deep Practice Everyone knows that practice is a key to success. What everyone doesn't know is that specific kinds of practice can increase skill up to ten times faster than conventional practice.
- Ignition We all need a little motivation to get started. But what separates truly high achievers from the rest of the pack? A higher level of commitment—call it passion—born out of our deepest unconscious desires and triggered by certain primal cues. Understanding how these signals work can help you ignite passion and catalyze skill development.
- Master Coaching What are the secrets of the world's

most effective teachers, trainers, and coaches? Discover the four virtues that enable these “talent whisperers” to fuel passion, inspire deep practice, and bring out the best in their students. These three elements work together within your brain to form myelin, a microscopic neural substance that adds vast amounts of speed and accuracy to your movements and thoughts. Scientists have discovered that myelin might just be the holy grail: the foundation of all forms of greatness, from Michelangelo’s to Michael Jordan’s. The good news about myelin is that it isn’t fixed at birth; to the contrary, it grows, and like anything that grows, it can be cultivated and nourished. Combining revelatory analysis with illuminating examples of regular people who have achieved greatness, this book will not only change the way you think about talent, but equip you to reach your own highest potential.
