We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. <https://usgovpub.com>

**Chinese Strategy and Military Modernization in 2015** Anthony H. Cordesman, Steven Colley, 2016-01-12 China's emergence as a global economic superpower, and as a major regional military power in Asia and the Pacific, has had a major impact on its relations with the United States and its neighbors. China was the driving factor in the new strategy the United States announced in 2012 that called for a "rebalance" of U.S. forces to the Asia-Pacific region. At the same time, China's actions on its borders, in the East China Sea, and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers.

*Long Hard Road*, 2007 The call to war is often met by young soldiers who lack an understanding of what they are about to encounter. These

young soldiers must be trained, prepared, and then led in battle by those with experience and understanding--the Noncommissioned Officer Corps. In an effort to preserve the history of the US Army Noncommissioned Officer and to provide future noncommissioned officers with an understanding of the actions necessary to prepare soldiers and to lead them in war, the US Army Sergeants Major Academy undertook a program to gather and publish the stories of NCOs who had served in both Afghanistan and Iraq. Most of the papers received were from students of the US Army Sergeants Major Course who had already deployed to either Operation Enduring Freedom or Operation Iraqi Freedom. This work highlights a few of those stories. A wide range of topics have been chosen to allow the reader to understand the preparations, training, and actions needed for NCOs to accomplish their missions ... Many of the selected stories were shortened and edited for clarity; however, every attempt was made to remain true to the author's original intent--Forward.

Chapters include small and large unit actions, reconnaissance, artillery, small arms fire, logistics, communications, medicine and aviation. Much experience is drawn from Soviet efforts in Afghanistan during the 1980s, and modern Russian army training. The text is complemented by numerous maps and diagrams.

*Surrogate Warfare* Isaac J. Peltier,2005-05-26 Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) saw the United States

Army employ Special Forces (SF) on a scale not seen since the Vietnam War.<sup>1</sup> Since 11 September 2001, U.S. Army Special Forces have experienced a renaissance with unconventional warfare (UW), the role for which SF was originally founded in June 1952.<sup>2</sup> In his 12 March 2002 testimony before the Senate Armed Services Committee, General Charles R. Holland, Commander of the U.S. Special Operations Command, stated that the long-standing SOF mission of surrogate warfare was receiving deserved new attention.<sup>3</sup> In fact, according to General Holland, U.S. strategic objectives in Afghanistan would not have been achieved if not for surrogate warfare.<sup>4</sup> Interestingly, however, surrogate warfare is not mentioned in Joint or Army doctrine. This raises the primary research question for this monograph, what does SF need to do to prepare for future surrogate warfare? This monograph will argue that surrogate warfare is indeed a form of unconventional warfare and that U.S. Army Special Forces are clearly the force of choice for conducting it because of their cultural and regional expertise. The attacks of September 11th, 2001, demanded a swift response. President Bush made it clear in his address to the nation that the U.S. would hunt down those responsible and hold them accountable.<sup>5</sup> Intelligence suggested that Osama Bin Ladin and al-Qaeda were operating out of Afghanistan, which meant the military task fell to Central Command (CENTCOM), because it was in its geographic area of responsibility (AOR). In deciding how to respond militarily, Defense Secretary Donald Rumsfeld and CENTCOM Commander General Tommy Franks were keenly aware of the failure of the Soviet Union in Afghanistan in the 1980s, and did not want to repeat that failure. They agreed that the force would have to be small, flexible, and possess the capabilities to operate with precision and lethality.<sup>6</sup> CENTCOM directed its Special Operations Command (SOCCENT) to begin planning. SOCCENT in turn notified the 5th Special Forces Group to begin preparations to conduct UW in Afghanistan. Operation Enduring Freedom saw SF take an unprecedented role as the main effort in the campaign to overthrow the Taliban and root out al-Qaeda. The unconventional war fought in Afghanistan involved working by, with, and through the Northern Alliance to achieve strategic, operational and tactical objectives. The Northern Alliance, under the advisement and direction of SF, served as a surrogate army in place of the large conventional U.S. force that Rumsfeld and Franks wanted to avoid using. SF's success in Afghanistan would foreshadow what was to come a year later in Iraq. In Operation Iraqi Freedom, SF was employed on an even larger scale. When the 4th Infantry Division was not allowed to enter northern Iraq through Turkey, the 10th Special Forces Group was used to open up a second front with surrogate forces. Kurdish militia, which numbered approximately 70,000, were used by SF to disrupt 13 Iraqi divisions, preventing them from interfering with the Combined Forces Land Component Command's (CFLCC) march on Baghdad.

*Field Artillery Manual Cannon Gunnery* Department of the Army, 2017-08-19 Training Circular (TC) 3-09.81, Field Artillery Manual Cannon Gunnery, sets forth the doctrine pertaining to the employment of artillery fires. It explains all aspects of the manual cannon gunnery problem and presents a practical application of the science of ballistics. It includes step-by-step instructions for manually solving the gunnery problem which can be applied within the framework of decisive action or unified land operations. It is applicable to any Army personnel at the battalion or battery responsible to delivered field artillery fires. The principal audience for ATP 3-09.42 is all members of the Profession of Arms. This includes field artillery Soldiers and combined arms chain of command field and company grade officers, middle-grade and senior noncommissioned officers (NCO), and battalion and squadron command groups and staffs. This manual also provides guidance for division and corps leaders and staffs in training for and employment of the BCT in decisive action. This publication may also be used by other Army organizations to assist in their planning for support of battalions. This manual builds on the collective knowledge and experience gained through recent operations, numerous exercises, and the

deliberate process of informed reasoning. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.
