**RAF Wings over Florida** Will Largent, 2020-08-01 From 1941 through 1945, British cadets in the Royal Air Force trained in the United States through the Lend-Lease Act, President Roosevelt's ingenious plan to help beleaguered Great Britain while maintaining the semblance of neutrality. This book tells the saga of two Florida training fields during this turbulent time. In their own words, British pilots tell of their Florida experiences. Many of them still in their late teens, away from home for the first time, pale and thin from years of rationing, these young men encountered immense challenges and overwhelming generosity during their training in Florida. Now retired, these former pilots still smell the scent of orange blossoms when they glance through the log books they kept while flying their Stearmans and Harvards over Florida citrus groves. They fondly remember the times

when they buzzed over the homes of their Florida “families” to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress.

War and Algorithm Max Liljefors, Gregor Noll, Daniel Steuer, Research Fellow at the Centre for Applied Philosophy, Politics and Ethics, University of Brighton, 2019-10-11 This book looks at the changing forms of violence and likely consequences of a fully digitalized world.

Don "The Snake" Prudhomme: My Life Beyond the 1320 Elana Scherr, Don Prudhomme, 2020-10-16 Don The Snake Prudhomme reveals for the first time ever his incredible life and career on and off of the drag strip.

Imagine spending a year with Don The Snake Prudhomme, having coffee together and talking about his life, his racing, his friends, and his family. He'd tell you about how he rose from being a high school drop-out who was painting cars to a respected Top Fuel dragster driver and successful businessman. You'd hear how he toured the country with Tommy Ivo and The Hawaiian Roland Leong, racing all the legends from Big Daddy Don Garlits to The Golden Greek [Chris] Karamesines. He'd say how he met Tom McEwen and recall how they became the Snake and the Mongoose, leading to a career in Funny Cars that netted him four championships in a row. He'd talk about the thrill of first wins and owning his own teams but also the struggles of bad seasons, crashes and fires, broken parts, and broken contracts. Along the way, he'd speak about the people in his life, such as engine-builder Keith Black and NHRA president Wally Parks, and those who were killed in the wild and unpredictable sport of nitro racing. It wouldn't be only racing, though. Prudhomme would share lessons he learned about business and life from such varied sources as a neighbor in Granada Hills to Ford GT40 driver Dan Gurney. He also would talk about the importance of family: how his wife, Lynn, and daughter, Donna, changed his world and how finding out about his African-American roots opened his eyes to a culture and inheritance he'd always wanted. This is the experience you'll get in *Don The Snake Prudhomme: My Life Beyond the 1320*.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Adventures among Ants Mark W. Moffett, 2010-05-05 Intrepid international explorer, biologist, and photographer Mark W. Moffett, the Indiana Jones of entomology, takes us around the globe on a strange and colorful journey in search of the hidden world of ants. In tales from Nigeria, Indonesia, the Amazon, Australia, California, and elsewhere, Moffett recounts his entomological exploits and provides fascinating details on how ants live and how they dominate their ecosystems through strikingly human behaviors, yet at a different scale and a faster tempo. Moffett's spectacular close-up photographs shrink us down to size, so that we can observe ants in familiar roles; warriors, builders, big-game hunters, and slave owners. We find them creating marketplaces and assembly lines and dealing with issues we think of as uniquely human—including hygiene, recycling, and warfare. *Adventures among Ants* introduces some of the world's most awe-inspiring species and offers a startling new perspective on the limits of our own perception. • Ants are world-class road builders, handling traffic problems on thoroughfares that dwarf our highway systems in their complexity • Ants with the largest societies often deploy complicated military tactics • Some ants have evolved from hunter-gatherers into farmers, domesticating other insects and growing crops for food

The Hypomaniac Edge John D. Gartner, 2011-06-18 Why is America so rich and powerful? The answer lies in our genes, according to psychologist John Gartner. Hypomania, a genetically based mild form of mania, endows many of us with unusual energy, creativity, enthusiasm, and a propensity for taking risks. America has an extraordinarily high number of hypomanics—grandiose types who leap on every wacky idea that occurs to them, utterly convinced it will change the world. Market bubbles and ill-considered messianic crusades can be the downside. But there is an enormous upside in terms of spectacular entrepreneurial zeal, drive for innovation, and material success. Americans may have a lot of crazy ideas, but some of them lead to brilliant inventions. Why is America so hypomaniac? It is populated primarily by immigrants. This self-selection process is the boldest natural experiment ever conducted. Those who had the will, optimism, and daring to take the leap into the unknown have passed those traits on to their descendants. Bringing his audacious and persuasive thesis to life, Gartner offers case histories of some famous Americans who represent this phenomenon of hypomania. These are the real stories you never learned in school about some of those men who made America: Columbus, who discovered the continent, thought he was the messiah. John Winthrop, who settled and defined it, believed Americans were God's new chosen people. Alexander Hamilton, the indispensable founder who envisioned America's economic future, self-destructed because of pride and impulsive behavior. Andrew Carnegie, who began America's industrial revolution, was sure that he was destined personally to speed up human evolution and bring world peace. The Mayer and Selznick families helped create the peculiarly American art form of the Hollywood film, but familial bipolar disorders led to the fall of their empires. Craig Venter decoded the human genome, yet his arrogance made him despised by most of his scientific colleagues, even as he spurred them on to make great discoveries. While these men are extraordinary examples, Gartner argues that many Americans have inherited the genes that have made them the most successful citizens in the world.

**How Do I Feel?** Rebekah Lipp, 2023-05-18 (PAPERBACK VERSION) Finalist in the New Zealand Children & Young Adults Books Awards 2022 Storylines Notable Books 2021 - Non-Fiction Winner #1 NZ Bestseller With 60+ definitions to help improve emotional literacy, *How Do I Feel?*, is all about helping our children learn to recognise and label emotions and feelings. Join Aroha and her friends as they share how different emotions might feel in the body and how each emotion might be helpful. This emotions dictionary is all about helping children find the words for how they truly feel. Learning to recognise and label our emotions correctly is such an important skill for life. Giving our children this language helps to build emotional literacy. It is a gift to give children the tools to know how to recognise what they truly feel and that it is okay to feel all emotions. When they know that no emotion is 'good' or 'bad' and that all emotions provide messages, then it takes away any attachment to that emotion being part of who they are. We may have experienced this ourselves being labelled 'naughty' or 'out of control' due to feeling angry a lot. However, this behaviour is just a way for a child to communicate. Diving deeper into why they are acting that way, why they may be feeling the things they are, can help us find some answers with our child. It can also help us find ways to help them empower themselves with tools to feel better. Use this book to start conversations about different emotions. If you can, give examples of things you have experienced. When you see a child experiencing an emotion, help your child label it. Are you feeling ... right now? This book can be used with children from 5 years of age up to 100+ as everyone might get something from the book. There are over 200 emotions and so we couldn't include them all in just one book, however, this book is the most extensive book about emotions for children. Paperback - full colour Pages - 142 Size - 216mm x 280mm (Landscape) Recommended Age - 5 years - 100 years+
