Artillery Strong Boyd L. Dastrup,2018 Artillery Strong tells the story of the US Army's Field Artillery modernization efforts from the Gulf War of 1991 through the first two decades of the 21st Century. This study originated as the US Army Field Artillery School published Operation Desert Storm and Beyond: Modernizing the Field Artillery in 2005. The 2005 edition covered field artillery developments during the 1990s.--Provided by publisher.

Kontum Thomas P. McKenna,2011-09-09 In the spring of 1972, North Vietnam invaded South Vietnam in what became known as the Easter Offensive. Almost all of the American forces had already withdrawn from Vietnam except for a small group of American advisers to the South Vietnamese armed forces. The 23rd ARVN Infantry Division and its American advisers were sent to defend the provincial capital of Kontum in the Central Highlands. They were surrounded and attacked by three enemy divisions with heavy artillery and tanks but, with the help of air power, managed to successfully defend Kontum and prevent South Vietnam from being cut in half and defeated. Although much has been written about the Vietnam War, little of it addresses either the Easter Offensive or the Battle of Kontum. In *Kontum: The Battle to Save South Vietnam*, Thomas P. McKenna fills this gap, offering the only in-depth account available of this violent engagement. McKenna, a U.S. infantry lieutenant colonel assigned as a military adviser to the 23rd Division, participated in the battle of Kontum and combines his personal experiences with years of interviews and research from primary sources to describe the events leading up to the invasion and the battle itself.

Kontum sheds new light on the actions of U.S. advisers in combat during the Vietnam War. McKenna's book is not only an essential historical resource for America's most controversial war but a personal story of valor and survival.

The Field Artillery Boyd L. Dastrup, 1994 This reference book by a well-known historian is the very first to give a short history of the development of the field artillery from the Middle Ages to the present, along with biographical profiles of leading figures, and bibliographical essays about the most important writings on the subject. Dastrup defines the evolution of this combat force and weapons system in terms of technology, organization, tactics, and doctrine. This volume is designed for academic and professional library reference sections and for use in courses in military history and military technology. This guide is suitable for reference and text purposes, and made accessible for varied uses through internal cross-referencing, appendices, and a well-framed general index.

Bastogne - The Story Of The First Eight Days S. L. A. Marshall, 2014-06-13 [This edition benefits from numerous maps of the battlefields that the actions were fought over] “NUTS!” - Among the many military legends that abound from the fighting of the Second World War, the one word reply to a German summons to surrender must rank highly in terms of its resonance, importance and sheer grit. General Mcaulliffe decided that despite the odds and the lack of supplies and ammunition his troops would continue to hold the important communication hub of Bastogne during the Battle of the Bulge. This dramatic, yet authoritative account brings all of the action to the fore as the Battered Bastards of Bastogne wrote their names into legend. THIS STORY OF BASTOGNE was written from interviews with nearly all the commanders and staff officers and many of the men who participated in the defense of Bastogne during the first phase of that now celebrated operation—the days during which the American forces were surrounded by forces of the enemy... Thus it is essentially the account of how a single strong defensive force was built from separate commands of armor, airborne infantry and tank destroyers—a force convinced that it could not be beaten.-Introduction.

U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer, Lt.-Col. Lane Rogers, Dr. V. Keith Fleming Jr., 2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Rethinking Governance of the Army's Arsenals and Ammunition Plants William Michael Hix, 2003 With its large industrial base of ammunition plants and arsenals, the Army has more ordnance manufacturing capacity than it needs. This study proposes a strategic vision for this capacity and explores four options for managing it: privatization, creation of a federal government corporation, consolidation, and recapitalization on multifunction posts. It weighs the options from different perspectives, including feasibility, economic viability, and risk posed to national interests. ISBN: 0-8330-3322-0 Price: \$30.00 Page count: 350

Battle for the Ruhr Derek S. Zumbro, 2006 Derek Zumbro chronicles this key military campaign from a unique and fresh perspective - that of the defeated German soldiers and civilians caught in the final maelstrom of the war's western front. Zumbro chronicles the relentless assault on the Ruhr Pocket through German eyes, as the Allied juggernaut battered the region's cities, villages, and homes into submission. He tells of children pressed into service by a desperate Nazi regime - and of even more desperate parents trying to save their sons from sacrifice at the eleventh hour. He also tells of unspeakable conditions suffered by foreign laborers, POWs, and political opponents in the Ruhr Valley and of the mass graves that gave Allied soldiers a grisly new understanding of their enemy. Zumbro also recounts the story of Field Marshal Walter Model's final hours. His eventual suicide effectively ended the existence of the Wehrmacht's once-formidable Army Group B after being pursued, methodically encircled, and finally destroyed by U.S. and British forces. Through interviews with surviving members of Model's former staff, Zumbro has uncovered the attitudes of beleaguered officers that official records could never convey. Other interviews with former soldiers reveal the extent to which Allied bombing contributed to the rapid deterioration of German combat effectiveness and tell of civilians begging soldiers to abandon the war. Zumbro's research reveals the identities of specific characters discussed in previous works but never identified, describes the final hours of German officers executed for the loss of the bridge at Remagen, and offers new insight into Model's

acquiescence to Hitler in military affairs.--BOOK JACKET.

16 Cases of Mission Command Donald P., Donald Wright, Ph. D., Ph D Donald P Wright, 2013-12 For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual professional development. Mission Command places great responsibility on our Soldiers.

Tactical Nuclear Weapons and NATO Douglas T. Stuart, 2012 is understudied, both inside and outside of government. Tactical weapons, although less awesome than their strategic siblings, carry significant security and political risks, and they have not received the attention that is commensurate to their importance. Second, it is clear that whatever the future of these arms, the status quo is unacceptable. It is past the time for NATO to make more resolute decisions, find a coherent strategy, and formulate more definite plans about its nuclear status. Consequently,

decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO. At the Lisbon Summit in Portugal in November 2010, the Alliance agreed to conduct the Deterrence and Defense Posture Review (DDPR). This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012.

Bastogne S. L. A. Marshall, 2015-08-18 The Center of Military History is pleased to present the second volume in the U.S. Army in Action series, a facsimile reprint of Brigadier General S.L.A. Marshall's *Bastogne: The First Eight Days*. Originally published in 1946, this brief study provides a combat history of a critical battle during the Allied liberation of Europe in World War II. Outnumbered and surrounded for five days, a U.S. Army combined arms force of airborne infantry, armor, engineers, tank destroyers, and artillery conducted a successful defense of the Belgian crossroads town of Bastogne in late December 1944. They separated the German combined arms formations and destroyed the pieces, halting the offensive. The outcome of this battle was critical to the successful Allied defense against the German Ardennes offensive. *Bastogne* offers unique insights, capturing the immediate impressions of the soldiers who fought in this harsh winter engagement. The author penetrates the fog of war with a coherent narrative that clearly captures the strategy, tactics, and leadership of the battle. This action strangled the German logistical flow to their forward assault divisions, disrupting their offensive tempo and slowing their advance. What emerges is a vivid case study of how decisive leadership and incidents of individual heroism can contribute to overcoming enemy forces and weather.
