Made to Stick Chip Heath,Dan Heath,2007-01-02 NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. “Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book.”—The Washington Post Mark Twain once observed, “A lie can get halfway around the world before the truth can even get its boots on.” His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them “stick.” In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “kidney theft ring” hoax to a coach’s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It’s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

How Canadians Communicate V David Taras,Christopher Waddell,2016-03-15 Fewer Canadians than ever are lacing up skates, swimming lengths at the pool, practicing their curve ball, and experiencing the thrill of competition. However, despite a decline in active participation, Canadians spend enormous amounts of time and money on sports, as fans and followers of sporting events and sports culture. Never has media coverage of sports been more exhaustive, and never has it been more driven by commercial interests and the need to fuel consumerism, on which corporate profits depend. But the power plays now occurring in the arena of sports are by no means solely a matter of money. At issue as well in the media capture of sports are the values that inform our daily lives, the physical and emotional health of the population, and the symbols so long central to a sense of Canadian identity. Writing from a variety of perspectives, the contributors to this collection set out to explore the impact of the media on our reception of, and attitudes toward, sports—to unpack the meanings that sports have for us as citizens and consumers. Some contributors probe the function of sports as spectacle—the escalation of violence, controversies over drug use, and the media’s coverage of tragic deaths—while others shed light on the way in which the media serve to transform sports into a vehicle for the expression of identity and nationalism. The goal is not to score points but to prompt critical discussion of why sports matter in Canadian life and culture and how they contribute to the construction of identity.

Possible Worlds in Video Games: From Classic Narrative to Meaningful Actions Antonio José Planells de la Maza,2017-11-21 In current digital games, classic fictional worlds are transformed into ludofictional worlds, spaces rich in characters and emotions that are especially affected by the intervention of a player. In this book, we propose a model, inspired by the Semantics of Fiction and Possible Worlds, which is oriented to the analysis of video games as integrated systems.

What Should Schools Teach? Alka Sehgal Cuthbert ,Alex Standis,2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in *What Should Schools Teach?* The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what

to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

Spawn #230 Jonathan David Goff,Todd McFarlane,2013-04-01 As a small online community continues to look into Jim's connection with the Curse of the Hellspawn, the fervor around the world's new messiah begins to reach an apex. Meanwhile, the Vatican makes a house call, taking the first steps in their efforts to test Jim's true origin. Sinner or Saint, the church has no intention of allowing his gifts to be used against them.

Narrative Mechanics Beat Suter,René Bauer,Mela Kocher,2021-05-31 What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Ultimate History of Video Games, Volume 2 Steven L. Kent,2021-08-24 The definitive behind-the-scenes history of video games’ explosion into the twenty-first century and the war for industry power “A zippy read through a truly deep research job. You won’t want to put this one down.”—Eddie Adlum, publisher, RePlay Magazine As video games evolve, only the fittest companies survive. Making a blockbuster once cost millions of dollars; now it can cost hundreds of millions, but with a \$160 billion market worldwide, the biggest players are willing to bet the bank. Steven L. Kent has been playing video games since Pong and writing about the industry since the Nintendo Entertainment System. In volume 1 of The Ultimate History of Video Games, he chronicled the industry’s first thirty years. In volume 2, he narrates gaming’s entrance into the twenty-first century, as Nintendo, Sega, Sony, and Microsoft battle to capture the global market. The home console boom of the ’90s turned hobby companies like Nintendo and Sega into Hollywood-studio-sized business titans. But by the end of the decade, they would face new, more powerful competitors. In boardrooms on both sides of the Pacific, engineers and executives began, with enormous budgets and total secrecy, to plan the next evolution of home consoles. The PlayStation 2, Nintendo GameCube, and Sega Dreamcast all made radically different bets on what gamers would want. And then, to the shock of the world, Bill Gates announced the development of the one console to beat them all—even if Microsoft had to burn a few billion dollars to do it. In this book, you will learn about • the cutthroat environment at Microsoft as rival teams created console systems • the day the head of Sega of America told the creator of Sonic the Hedgehog to “f**k off” • how “lateral thinking with withered technology” put Nintendo back on top • and much more! Gripping and comprehensive, The Ultimate History of Video Games: Volume 2 explores the origins of modern consoles and of the franchises—from Grand Theft Auto and Halo to Call of Duty and Guitar Hero—that would define gaming in the new millennium.

A Body in Fukushima Eiko Otake, William Johnston, 2021-05-11 On March 11, 2011 the most powerful earthquakes in Japan's recorded history devastated the north east of Japan, triggering a massive tsunami with waves as high as 130 feet and traveled as far as six miles inland. As a result, three reactors in the Fukushima Daiichi Nuclear Power Plant complex experienced level seven meltdowns. The triple disaster, known as 3.11, had 15,899 confirmed deaths with 3529 people still missing. On five separate journeys, Japanese-born performer and dancer Eiko Otake and historian and photographer William Johnston, visited multiple locations across the Fukushima prefecture. The powerful photographs, selected from tens of thousands that Otake and Johnston created, document the irradiated landscape and how Eiko placed her lone body in those spaces. Each photograph is a performance across time and space, rewarding a viewer's intent gaze. The book includes essays and commentary reflecting on art, disaster, grief, and violated dignity of an irradiated Fukushima.

Drawing against oblivion Manfred Bockelmann, 2013 Der Künstler Manfred Bockelmann, porträtiert seit Jahren junge Menschen, die dem Nationalsozialismus zum Opfer fielen. Bockelmann möchte damit 'Zeichen gegen das Vergessen' setzen und zumindest einigen wenigen Namen und Nummern Gesichter geben, Menschen aus der Anonymität der Statistik herausheben. Die porträtierten Kinder und Jugendlichen wurden am Wiener Spiegelgrund und in den Konzentrationslagern Auschwitz-Birkenau, Theresienstadt sowie anderen zu Opfern des Nationalsozialismus. Gerade in diesen Bildern der damals so genannten 'Unreinen' zeigt sich eine reine Menschlichkeit. Der Anspruch des Künstlers, 'gegen das Vergessen' zu zeichnen, meint nicht nur diese ganz besonderen jungen Menschen, die einen Namen und eine Biografie haben, sondern zielt darauf ab, den Wert einer empathischen Mitmenschlichkeit nicht zu vergessen. Anteil zu nehmen, nicht wegzusehen, sich zu identifizieren - das ist die Botschaft. Exhibition: Leopold Museum, Wien, Austria (17.05.-02.09.2013).
