Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Lalylala's Beetles, Bugs And Butterflies Lydia Tresselt,2017-10-01 Hello bug lovers and crochet adventurers! Grab your research equipment (magnifying glass, flask of tea, crochet hook, scissors and yarn) and follow us into a world full of magic and science, a microcosm of tiny creatures and big dreams! In this book you will find not only a charming selection of crochet patterns to create scrabbling beetles, beautiful bugs and fluttering butterfly crochet amigurumi, but also a wonderful story to read out loud and ponder on: a tale about growing up; accepting change and the power of dreams. Watch tiny creatures hatching from their eggs, look on as they munch through a green world, and be astonished at their marvelous transformations when they finally slip out of their cocoons. The wings and hats are interchangeable so you can use the patterns in this book to create new outfits for your little insect friends. Give your caterpillar a new set of wings for every day of the week, or cover your beetle in the most colourful wing suits. Be inspired by nature to make creatures of your own creation. It's a great little world full of possibilities. We wish you lots of fun on your journey of discovery and learning!

Return of the Living Jonathan Wojcik,2020-09-10 It's been centuries since life ended on Earth, leaving only a haunted wasteland. So how could it be possible for one ghost to see a living being? Will she be able to convince her fellow specters that the living are back? Will she and her friends be able to avoid mysteriously disappearing like a growing number of spirits?

Our Bessie Rosa Nouchette Carey,2022-08-10 Most people under similar circumstances would have used stronger expressions, would have bemoaned themselves loudly, or at least inwardly, with all the pathos of self-pity. To be nearly at the end of one's journey, almost within sight and sound of home fires and home welcomes, and then to be snowed up, walled, imprisoned, kept in durance vile in an unexpected snowdrift—well, most human beings, unless gifted with angelic patience, and armed with special and peculiar fortitude, would have uttered a few groans under such depressing circumstances. Fortunately, Bessie Lambert was not easily depressed. She was a cheerful young person, an optimist by nature; and, thanks to a healthy organization, good digestion, and wholesome views of duty, was not given to mental nightmares, nor to cry out before she was hurt.
