Typographic Systems of Design Kimberly Elam, 2007-05-03 Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In Typographic Systems, Kim Elam, author of our bestselling books, Geometry of Design and Grid Systems, explores eight major structural frameworks beyond the grid including random, radial, modular, and bilateralsystems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each system from the structured axis to the nonhierarchical radial array is explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. Typographic Systems is the seventh title in our bestselling Design Briefs series, which has sold more than 100,000 copies worldwide.

Generation X, Y and the Baby Boomers Olivia R. James, 2017 To aid with a serious shortage of empirical studies on generational human resource management (HRM) preferences, Chapter One aims to add to the discussion in two ways. Firstly, by providing an extensive theoretical systematisation of HRM practices which are likely to be the most effective for achieving high performance from the two prevailing generations in the contemporary workforce (Xers and Yers), and secondly by exposing empirical evidence from a comprehensive study on the topic. Chapter Two explores the engagement levels of Generation X and Y HR practitioners in South Africa. However, reference was also be made to the Baby Boomers in order to indicate the cross-impact among the three cohorts. Shifting to a focus on health between generations, Chapter Three covers the use of online health resources and levels of eHealth literacy among random samples of 996 Baby Boomers from the US, UK, and New Zealand (NZ). In conclusion, Chapter Four argues that in order to have sound mental health, a baby boomer will need to develop ways of challenging the brain and protecting short term and long term memory by regular brain activity and social interactions. Every individual is different but the general guiding principles can be personalised for each individual and practiced as a routine in daily life.
