Fangs of the Lone Wolf Dodge

Billingsley, 2013-10-19 Stories of combat from a man who embedded with Chechen guerrilla forces: "His insights . . . are second to none." –Thomas de Waal, author of Black Garden Books on guerrilla war are seldom written from the tactical perspective, and even less seldom from the guerrilla's perspective. *Fangs of the Lone Wolf: Chechen Tactics in the Russian-Chechen Wars 1994-2009* is an exception. These are the stories of low-level guerrilla combat as told by the survivors. They cover fighting from the cities of Grozny and Argun to the villages of Bamut and Serzhen-yurt, and finally the hills, river valleys, and mountains that make up so much of Chechnya. The author embedded with Chechen guerrilla forces and knows the conflict, country, and culture. Yet, as a Western outsider, he is able to maintain perspective and objectivity. He traveled extensively to interview Chechen former combatants now displaced, some in hiding or on the run from Russian retribution and justice. Crisp narration, organization by type of combat, accurate color maps, and insightful analysis and commentary help to convey the complexity of "simple guerrilla tactics" and the demands on individual perseverance and endurance that guerrilla warfare exacts. The book is organized into vignettes that provide insight on the nature of both Chechen and Russian tactics utilized during the two wars. They show the chronic problem of guerrilla logistics, the necessity of digging in fighting positions, the value of the correct

use of terrain and the price paid in individual discipline and unit cohesion when guerrillas are not bound by a military code and law. Guerrilla warfare is probably as old as man, but has been overshadowed by maneuver war by modern armies and recent developments in the technology of war. As Iraq, Afghanistan, the Philippines, and Chechnya demonstrate, guerrilla war is not only still viable, but increasingly common. Fangs of the Lone Wolf provides a unique insight into what is becoming modern and future war. Includes maps and photographs

Battle for Budapest Krisztián Ungváry, 2011-08-30
This title is presented with a new foreword by Istvan Deak. The battle of Budapest in the bleak winter of 1944-45 was one of the longest and bloodiest city sieges of World War II. From the appearance of the first Soviet tanks on the outskirts of the capital to the capture of Buda Castle, 102 days elapsed. In terms of human trauma, it comes second only to Stalingrad, comparisons to which were even being made by soldiers, both German and Soviet, fighting at the time. This definitive history covers their experiences, and those of the 800,000 non-combatants around whom the battle raged.

Basics of Geomatics Mario A. Gomasasca, 2009-09-18
Geomatics is a neologism, the use of which is becoming increasingly widespread, even if it is not still universally accepted. It includes several disciplines and techniques for the study of the Earth's surface and its environments, and computer science plays a decisive role. A more meaningful and appropriate

expression is Geo-spatial Information or GeoInformation. Geo-spatial Information embeds topography in its more modern forms (measurements with electronic instrumentation, sophisticated techniques of data analysis and network compensation, global satellite positioning techniques, laser scanning, etc.), analytical and digital photogrammetry, satellite and airborne remote sensing, numerical cartography, geographical information systems, decision support systems, WebGIS, etc. These specialized fields are intimately interrelated in terms of both the basic science and the results pursued: rigid separation does not allow us to discover several common aspects and the fundamental importance assumed in a search for solutions in the complex survey context. The objective pursued by Mario A. Gomarasca, one that is only apparently modest, is to publish an integrated text on the surveying theme, containing simple and comprehensible concepts relevant to experts in Geo-spatial Information and/or specifically in one of the disciplines that compose it. At the same time, the book is rigorous and synthetic, describing with precision the main instruments and methods connected to the multiple techniques available today.

Block by Block William Glenn Robertson, Lawrence A. Yates, 2003 First published by the Combat Studies Institute Press. The resulting anthology begins with a general overview of urban operations from ancient times to the midpoint of the twentieth century. It then details ten specific case studies of U.S., German, and Japanese

operations in cities during World War II and ends with more recent Russian attempts to subdue Chechen fighters in Grozny and the Serbian siege of Sarajevo. Operations range across the spectrum from combat to humanitarian and disaster relief. Each chapter contains a narrative account of a designated operation, identifying and analyzing the lessons that remain relevant today.

The Lesser Terror Michael Parrish, 1996-05-16
This is the first major study based on Soviet documents and revelations of the Soviet state security during the period 1939-1953—a period about which relatively little is known. The book documents the role of Stalin and the major players in massive crimes carried out during this period against the Soviet people. It also provides the first detailed biography of V. S. Abakumov, Minister of State Security, 1946-1951. Based on Glasnost revelations and recently released archival material, this study covers the operations of Soviet state security from Beria's appointment in 1938 until Stalin's death. The book pays particular attention to the career of V. S. Abakumov, head of SMERSH counterintelligence during the war and minister in charge of the MGB (the predecessor of the KGB) from 1946 until his removal and arrest in July 1951. The author argues that terror remained the central feature of Stalin's rule even after the Great Terror and he provides examples of how he micromanaged the repressions. The book catalogs the major crimes committed by the security organs and the leading perpetrators and provides evidence that the crimes were similar to those for which the Nazi leaders

were punished after the war. Subjects covered include Katyn and its aftermath, the arrest and execution of senior military officers, the killing of political prisoners near Orel in September 1941, and the deportations of various nationalities during the war. The post-war period saw the Aviator and Leningrad affairs as well as the anti-cosmopolitan campaign whose target was mainly Jewish intellectuals. Later chapters cover Abakumov's downfall, the hatching of the Mingrelian and Doctors plots and the events that followed Stalin's death. Finally, there are chapters on the fate of those who ran Stalin's machinery of terror in the last 13 years of his rule. These and other topics will be of concern to all students and scholars of Soviet history and those interested in secret police and intelligence operations.

War on the Eastern Front James Lucas, 2014-10-30
This classic WWII history presents a comprehensive yet vividly detailed account of the Third Reich's epic and bitter clash with the Red Army. The opening onslaughts of Operation Barbarossa began on June 22nd, 1941, as German forces stormed into the Soviet Union. Few of them were to survive the five long years of bitter struggle. A posting to the Eastern Front during the Second World War was rightly regarded with dread by the German soldiers. They faced the unrelenting hostility of the climate, the people and even, at times, their own leadership. There were epic conflicts, such as the battles of Stalingrad and Kursk. But surrounding these famous events was a daily war of attrition which ultimately ground Hitler's war

machine to a halt. In this classic account, military historian James Lucas examines the Eastern Front from trench warfare to a bicycle-mounted antitank unit fighting against the oncoming Russian hordes. Told through the experiences of the German soldiers who endured these nightmarish years of warfare, *War on the Eastern Front* is a unique record of this cataclysmic campaign.

What You See Is What You Hear Dario

Martinelli, 2020-01-01 *What You See Is What You Hear* develops a unique model of analysis that helps students and advanced scholars alike to look at audiovisual texts from a fresh perspective. Adopting an engaging writing style, the author draws an accessible picture of the field, offering several analytical tools, historical background, and numerous case studies. Divided into five main sections, the monograph covers problems of definitions, history, and most of all analysis. The first part raises the main problems related to audiovisuality, including taxonomical and historical questions. The second part provides the bases for the understanding of audiovisual creative communication as a whole, introducing a novel theoretical model for its analysis. The next three parts focus on the model in all its constituents and with plenty of case studies taken from the field of cinema, TV, music videos, advertising and other forms of audiovisuality. Methodologically, the book is informed by different paradigms of film and media studies, multimodality studies, structuralism, narratology, "auteur theory" in the broad sense, communication

studies, semiotics, and the so-called "Humanities." What You See Is What You Hear enables readers to better understand how to analyze the structure and content of diverse audiovisual texts, to discuss their different idioms, and to approach them with curiosity and critical spirit.

Combating Desertification in Asia, Africa and the Middle East G. Ali Heshmati, Victor R.

Squires, 2013-07-01 This book is about the 'how' of desertification control as opposed to an analysis of the 'why' and fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands. There are numerous illustrations to show the successful techniques. This compilation demonstrates that desertification and land degradation can be controlled and reversed with existing techniques in such widely varying environments as the Sahel of Africa to Sri Lanka and the Philippines in SE Asia, from mountains in Lesotho to low lands on desert margins in Mongolia. Proven approaches include technical interventions, changes in governance and to the legislative framework and policy reform. The book fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands.

The Petroleum Handbook Shell, 1986-12-01 Those connected with the petroleum industry will need no introduction to The Petroleum Handbook. It is a

technically-oriented manual whose aim is to provide explanations of the processes of today's petroleum industry, from crude oil exploration to product end use, with some historical background and explanation of the economic context in which the oil, gas and petrochemical businesses operation. Much of the material in this sixth edition is completely new and includes the latest information on world oil and gas reserves, future prospects, transportation, storage, refining, marketing, research, and environmental conservation.

The Commander's Handbook on the Law of Land Warfare (FM 6-27) (MCTP 11-10C) Headquarters Department Of The Army,2019-09-17 DOD policy requires [m]embers of the DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and in all other military operations (Department of Defense Directive [DODD] 2311.01E). This publication addresses topics that are also addressed in the DOD Law of War Manual. In the event of a conflict or discrepancy regarding the legal standards addressed in this publication and the DOD Law of War Manual, the latter takes precedence. In many cases, any apparent conflict or discrepancy may be due to this publication's

efforts to provide guidance to Commanders by describing legal concepts more generally rather than exhaustively as found the DOD Law of War Manual. In certain instances, this publication will set out a current policy or practice for Army and Marine forces rather than a legal requirement.

Hitler's War (The War That Came Early, Book One)

Harry Turtledove, 2010-06-22 A stroke of the pen and history is changed. In 1938, British prime minister Neville Chamberlain, determined to avoid war, signed the Munich Accord, ceding part of Czechoslovakia to Hitler. But the following spring, Hitler snatched the rest of that country, and England, after a fatal act of appeasement, was fighting a war for which it was not prepared. Now, in this thrilling alternate history, another scenario is played out: What if Chamberlain had not signed the accord? In this action-packed chronicle of the war that might have been, Harry Turtledove uses dozens of points of view to tell the story: from American marines serving in Japanese-occupied China and ragtag volunteers fighting in the Abraham Lincoln Battalion in Spain to an American woman desperately trying to escape Nazi-occupied territory—and witnessing the war from within the belly of the beast. A tale of powerful leaders and ordinary people, at once brilliantly imaginative and hugely entertaining, Hitler's War captures the beginning of a very different World War II—with a very different fate for our world today.

Language and Speech in Synchrony and Diachrony

Galina T. Polenova, Tatiana G. Klikushina, 2017 This collection arises from the Fifth International

Scientific Conference, Language and Speech in Synchrony and Diachrony, held in Taganrog, Russia, devoted to the memory of Russian linguist and philosopher Professor P.V. Chesnokov. It examines the functioning of different levels of linguistic units and categories of speech with regard to intra-and cross-cultural communication in pragmatics of speech. The theory of language and speech is represented not only in synchrony, but in diachrony, in the comparative and typological aspects of languages from various groups, including non-literate Yenisei languages. A further subject of discussion within is the problem of translation, and the relation of language and speech, text and discourse. The volume consists of six parts: Part I: Language and its grammatical categories in diachronic aspect; Part II: Grammar and other subsystems of the language; Part III: Cross-cultural communication and translation; Part IV: Problems of linguistic and diachronic typology; Part V: Pragmalinguistics and speech; and Part VI: Text, discourse, speech in anthropocentric paradigm. The book will be of interest to scholars of philology, linguistics, culture and humanities, as well as those interested in issues of language, culture and language teaching methods.

The State as Investment Market Johan Engvall, 2011

Power in the New Testament Pieter De Villiers, Annette Merz, 2021-12-31 Influential research by authors like Foucault and Arendt

revealed the significant role of power in shaping relationships in society and faith communities. This volume contributes to this research trend by analysing the formative role of power in early Christian documents and communities. An introductory essay investigates theoretical approaches to power and the nexus between power and religion. It functions as orientation for the exegetical analyses of individual texts in the rest of the volume. Two contributions analyse power dynamics in the Bible generally and nine others investigate its use in specific early Christian texts. They attend to the vocabulary of power as well as the networks and actors involved in the execution of diverse forms of power. They focus on how these dynamics operate specifically in the Gospels, Pauline texts and traditions and the Apocalypse. They show that power can be abusive and dangerous, but it also is a positive, restraining force.

Socialism and Communism Nikita Sergeevich Khrushchev, 1963

The Red Effect Harvey Black, 2013-04-01 1983: The Cold War has been in existence since the end of World War Two. Although tensions have always been fraught between the Western nations and the members of the Soviet-led Warsaw Pact, common sense has prevailed. Until, as a consequence of the Cuban missile crisis in 1962, the shooting down of a Korean passenger aircraft in 1983, and the relentless build up of Soviet military strength, everything is about to change. In a

panoramic novel, readers travel from centres of power to the front lines - a war is brewing and events are happening at every angle. Is the Cold War about to turn hot? Can NATO forces endure a mass strike by thousands of Soviet tanks? Can the West survive? Follow the series of gripping events that culminated in 'The Red Effect', in the first instalment of Harvey Black's The Cold War trilogy.
