Paper Knives, Paper Crowns: Political Prints in the Dutch Republic Maureen Warren, 2022-10-04 Prescient prints from the golden age of Dutch satire This volume explores the satirical visual strategies that early modern Netherlandish printmakers--such as Joan Blaeu, Romeyn de Hooghe, Willem Jacobsz and Claes Jansz Visscher--used to memorialize historical events, lionize (or demonize) domestic and international leaders, and instigate collective action. While some of their prints employ visual puns that even the illiterate could enjoy, others were captioned in Latin, French or Dutch, prompting educated elites across Europe to consider the relationship between text and image in earnest. Published for an exhibit at Krannert Art Museum, Paper Knives, Paper Crowns provides a chronological arc and thematic overview of Netherlandish political prints, addressing multiple types of printmaking as well as the medium's relationship to other art forms, engaging with art historical scholarship and studies of early modern political history and theory in the process.

The Winter of Democracy Pierre Baudewyns, Marleen Brans, Min Reuchamps, Benoît Rihoux, Virginie Van Ingelgom, 2022-06-23 In itself, partitocracy can be simply defined as a political regime where power is – in an excessive degree – in the hands of political parties. In Belgium, partitocracy has perhaps reached its highest level of elaboration, with complex interactions between citizens, candidates and elected representatives, parties as well as parliaments and governments. The Winter of Democracy: Partitocracy in Belgium aligns a dozen of scientific contributions that tackle the multifaceted concept of partitocracy from multiple perspectives. The book also celebrates the academic career of Lieven De Winter,

almost five decades of a rich research commitment that spanned both at Université catholique de Louvain and at the Katholieke Universiteit Leuven, as well as across numerous institutions, projects and networks all around Europe. Lieven De Winter has significantly contributed to the study of all dimensions that constitute the core object of this book: Partitocracy in Belgium.

Engines of Order Bernhard Rieder, 2020-05-15 Software has become a key component of contemporary life and algorithmic techniques that rank, classify, or recommend anything that fits into digital form are everywhere. This book approaches the field of information ordering conceptually as well as historically. Building on the philosophy of Gilbert Simondon and the cultural techniques tradition, it first examines the constructive and cumulative character of software and shows how software-making constantly draws on large reservoirs of existing knowledge and techniques. It then reconstructs the historical trajectories of a series of algorithmic techniques that have indeed become the building blocks for contemporary practices of ordering. Developed in opposition to centuries of library tradition, coordinate indexing, text processing, machine learning, and network algorithms instantiate dynamic, perspectivist, and interested forms of arranging information, ideas, or people. Embedded in technical infrastructures and economic logics, these techniques have become engines of order that transform the spaces they act upon.

European Pack for Visiting Auschwitz-Birkenau Memorial and Museum Alicja Białecka, 2010-01-01 Taking groups of students To The Auschwitz-Birkenau Memorial and

Museum is a heavy responsibility, but it is a major contribution to citizenship if it fosters understanding of what Auschwitz stands for, particularly when the last survivors are at the end of their lives. It comes with certain risks, however. This pack is designed for teachers wishing to organise student visits to authentic places of remembrance, and for the guides, academics and others who work every day with young people at Auschwitz. There is nothing magical about visiting an authentic place of remembrance, and it calls for a carefully thought-out approach. To avoid the risk of inappropriate reactions or the failure to benefit from a large investment in travel and accommodation, considerable preparation and discussion is necessary before the visit and serious reflection afterwards. Teachers must prepare students for a form of learning they may never have met before. This pack offers insights into the complexities of human behaviour so that students can have a better understanding of what it means to be a citizen. How are they concerned by what happened at Auschwitz? Is the unprecedented process of exclusion that was practised in the Holocaust still going on in Europe today? In what sense is it different from present-day racism and anti-Semitism? The young people who visit Auschwitz in the next few years will be witnesses of the last witnesses, links in the chain of memory. Their generation will be the last to hear the survivors speaking on the spot. The Council of Europe, The Polish Ministry of Education And The Auschwitz-Birkenau Memorial and Museum are jointly sponsoring this project aimed at preventing crimes against humanity through Holocaust remembrance teaching.

The Winter Vault Anne Michaels, 2009-04-16 The Winter Vault is a stunning, richly

layered, and timeless novel that is everything we could hope for for Michaels's second novel—and more. Set in Canada and Egypt, and with flashbacks to England and Poland after the war, *The Winter Vault* is a spellbinding love story that juxtaposes momentous historical events with the most intimate moments of individual lives. In 1964, a newly married Canadian couple settle into a houseboat on the Nile just below Abu Simbel. At the time of the building of the Aswam dam, Avery Escher is one of the engineers responsible for the dismantling and reconstruction of a sacred temple, a “machine-worshipper” who is nonetheless sensitive to their destructive power. Jean is a botanist by avocation, passionately interested in everything that grows. They met on the banks of the St. Lawrence River, witnessing the construction of the Seaway as it swallowed towns, homes, and lives. Now, at the edge of another world about to be inundated in the name of progress, much of what they most believe in is tested. When a tragic event occurs, nearing the end of Avery's time in Egypt, he and Jean return to separate lives in Toronto; Avery to school to study architecture and Jean into the orbit of Lucjan, a Polish émigré artist whose haunting tales of occupied Warsaw pull her further from her husband, while offering her the chance to assume her most essential life. Breathtaking, vivid in its exploration of both the physical and emotional worlds of its characters, intensely moving and lyrical, *The Winter Vault* is a radiant work of fiction and contains all the elements for which Anne Michaels is celebrated.

Being with Data Nathaniel Tkacz, 2022-06-01 Once the rarified stuff of scientists and statisticians, data are now at the heart of our global digital economy, transforming everything from how we perceive the value of a professional athlete to the intelligence gathering activities of governments. We are told that the right data can turn an election, help predict crime, improve our businesses, our health and our capacity to make decisions. Beginning with a simple question - how do most people encounter and experience data? - Nathaniel Tkacz sets out on a path at odds with much of the contemporary discussion about data. When we encounter data, he contends, it is often in highly routinised ways, through formatted displays and for specific cognitive tasks. What data are and can do is largely a matter of how they are formatted. To understand our 'datafied' societies, we need to turn our attention to data's formats and the powers of formatting. This book offers an account of one such format: the dashboard. From their first appearance with the horse and carriage, Tkacz guides readers on the historical development of this format. Through analyses of car dashboards, early managerial dashboards, and the gradual emergence of dashboards as a computer display technology, Tkacz shows how today's digital dashboards came to be, and how their cultural history conditions the present. Highly original and wide-ranging, this book will change how you think about data.

The Failure of Political Reform in Venezuela Julia Buxton, 2018-01-12 This title was first published in 2001. The victory of former lieutenant colonel Hugo Chavez in the Venezuelan presidential elections of 1998 was criticized as a blow against the country's deep-seated democratic tradition. It is claimed that this simplistic argument fails to recognize the extent of democratic deterioration in the country and the limitations imposed by discredited political actors on a meaningful democratic reform process. The book aims to break new ground in providing unseen evidence of electoral fraud and offers a fresh perspective on the nature of democratic development.

Machine Habitus Massimo Airoidi,2021-12-13 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The ‘machine habitus’ is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing

role of algorithms and AI in our social and cultural life.

The Modem World Kevin Driscoll, 2022-04-19 The untold story about how the internet became social, and why this matters for its future “Whether you’re reading this for a nostalgic romp or to understand the dawn of the internet, *The Modem World* will delight you with tales of BBS culture and shed light on how the decisions of the past shape our current networked world.”—danah boyd, author of *It’s Complicated: The Social Lives of Networked Teens* Fifteen years before the commercialization of the internet, millions of amateurs across North America created more than 100,000 small-scale computer networks. The people who built and maintained these dial-up bulletin board systems (BBSs) in the 1980s laid the groundwork for millions of others who would bring their lives online in the 1990s and beyond. From ham radio operators to HIV/AIDS activists, these modem enthusiasts developed novel forms of community moderation, governance, and commercialization. *The Modem World* tells an alternative origin story for social media, centered not in the office parks of Silicon Valley or the meeting rooms of military contractors, but rather on the online communities of hobbyists, activists, and entrepreneurs. Over time, countless social media platforms have appropriated the social and technical innovations of the BBS community. How can these untold stories from the internet’s past inspire more inclusive visions of its future?

Data Practices Evelyn Ruppert, Stephan Scheel, 2021-11-02 How EU data practices establish and assign people to categories, and how this matters in enacting--making up--Europe as a population and people. What is Europe and who are Europeans? *Data Practices* approaches this contemporary political and theoretical question by treating it as a practical

problem of counting. Only through the myriad data practices that make up methods such as censuses can EU member states know their national populations, and this in turn is utilized by the EU to understand the population of Europe. But this volume approaches data practices not simply as reflecting populations but as performative in two senses: they simultaneously enact--that is, make up--a European population and, by so doing--intentionally or otherwise--also contribute to making up a European people. The book develops a conception of data practices to analyze and interpret findings from collaborative ethnographic multisite fieldwork conducted by an interdisciplinary team of social science researchers as part of a five-year project, *Peopling Europe: How Data Make a People*. The book focuses on data practices that involve establishing and assigning people to categories and how this matters in enacting Europe as a population and people. Five core chapters explore key categories of people--usual residents, refugees, homeless people, migrants, and ethnic minorities--and how they come into being through specific data practices such as defining, estimating, recalibrating and inferring. Two additional chapters address two key subject positions that data practices produce and require: the data subject and the statistician subject.

Young People Re-Generating Politics in Times of Crises Sarah Pickard, Judith Bessant, 2017-07-31 This book provides insight into the diverse ways young people from around the world are regenerating politics in innovative and multifaceted ways. The authors, who include academics and activists, challenge claims that young people are apolitical, apathetic and living up to the 'me generation' stereotype. Contributions cover a rich body of case examples of traditional and new forms of youth politics in response to

situated injustices and political and socio-economic crises. Significant and optimistic, the collection presents strong evidence from across the globe that these developments are not isolated incidences, but are in fact part of a systemic, large-scale transformation leading to a regeneration of the political landscape by young people. The book is aimed at students and scholars in the fields of politics, sociology, policy studies and youth and childhood studies.
