From Digital Natives to Digital Wisdom Marc R. Prensky, 2012-01-18 An expert perspective on 21st century education What can you learn on a cell phone? Almost anything! How does that concept fit with our traditional system of education? It doesn't. Best-selling author and futurist Marc Prensky's book of essays challenges educators to "reboot" and make the changes necessary to prepare students for 21st century careers and living. His "bottom-up" vision includes students' ideas about what they need from teachers, schools, and education. Also featured are easy-to-do, high-impact classroom strategies that help students acquire "digital wisdom." This thought-provoking text is organized into two sections that address: Rethinking education (including what and how we teach and measuring learning) 21st century learning and technology in the classroom (including games, YouTube, and more)

Well Played 1.0 Drew Davidson, 2009-01-01 Video games can be well played in two senses. On the one hand, well played is to games as well read is to books. On the other hand, well played as in well done. This book is full of in-depth close readings of video games that parse out the various meanings to be found in the experience of playing a game. 22 contributors (developers, scholars, reviewers and bloggers) look at video games through both senses of well played. The goal is to help develop and define a literacy of games as well as a sense of their value as an experience. Video games are a complex medium that merits careful interpretation and insightful analysis

Strategies for Supporting Inclusion and Diversity in the Academy Gail Crimmins,2020-06-29 This book explores tried and tested strategies that support student and faculty engagement and inclusion in the academy. These strategies are anchored by a brief exploration of the history and effect/s of exclusion and deprivelege in higher education. However, while many publications exploring academic inequality focus on the causes and impacts of structural, psychological and cultural exclusion based on racism, sexism, classism and ableism, they rarely engage in interventions to expose and combat such de/privilege. Capturing examples of inclusive practices that are as diverse as student and faculty populations, these strategies can be easily translated and employed by organisations, collectives and individuals to recognise and combat social and academic exclusion within higher education environments.
