The Silence of the Lambs Thomas Harris, 2009-12-28 An ingenious, masterfully written novel, Thomas Harris's *The Silence of the Lambs* is a classic of suspense and storytelling and the basis for the Oscar award-winning horror film starring Jodie Foster as Clarice Starling and Anthony Hopkins as Dr. Hannibal Lecter. A serial murderer known only by a grotesquely apt nickname—Buffalo Bill—is stalking particular women. He has a purpose, but no one can fathom it, for the bodies are discovered in different states. Clarice Starling, a young trainee at the F.B.I. Academy, is surprised to be summoned by Jack Crawford, Chief of the Bureau's Behavioral Science section. Her assignment: to interview Dr. Hannibal Lecter, a brilliant psychiatrist and grisly killer now kept under close watch in the Baltimore State Hospital for the Criminally Insane. Lecter's insight into the minds of murderers could help track and capture Buffalo Bill. Smart and attractive, Starling is shaken to find herself in a strange, intense relationship with the acutely perceptive Lecter. His cryptic clues—about Buffalo Bill and about her—launch Clarice on a search that every reader will find startling, harrowing, and totally compelling.

The Brief Wondrous Life of Oscar Wao Junot Díaz, 2008-09-04 Things have never been easy for Oscar. A ghetto nerd living with his Dominican family in New Jersey, he's sweet but disastrously overweight. He dreams of becoming the next J.R.R. Tolkien and he keeps falling hopelessly in love. Poor Oscar may never get what he wants, thanks to the Fukú - the curse that has haunted his family for generations. With dazzling energy and insight Díaz immerses us in the tumultuous lives of Oscar; his runaway sister Lola; their beautiful mother Belicia; and in the family's uproarious journey from the Dominican Republic to the US and back. Rendered with uncommon warmth and humour, *The Brief Wondrous Life of Oscar Wao* is a literary triumph, that confirms Junot Díaz as one of the most exciting writers of our time.

Fanged Noumena Nick Land, 2011-04-01 A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as “rabid nihilism,” “mad black deleuzianism,” and “cybergothic,” developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of “continental philosophy”—a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British “speculative realist” philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. *Fanged Noumena* gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

Red Dragon Thomas Harris, 2009-01-06 THE NEW YORK TIMES BESTSELLER Feed your fears with the terrifying classic that introduced cannibalistic serial killer Hannibal Lecter. FBI agent Will Graham once risked his sanity to capture Hannibal Lecter, an ingenious killer like no other. Now, he's following the bloodstained pattern of the Tooth Fairy, a madman who's already wiped out two families. To find him, Graham has to understand him. To understand him, Graham has only one place left to go: the mind of Dr. Lecter.

The Anatomy of Evil Michael H. Stone, The crimes of Charles Manson, Ted Bundy, Jeffrey Dahmer, John Wayne Gacy, Dennis Rader, and other high-profile killers are so breathtakingly awful that most people would not hesitate to label them evil. In this groundbreaking book, renowned psychiatrist Michael H. Stone-host of Discovery Channel's former series Most Evil-uses this common emotional reaction to horrifying acts as his starting point to explore the concept and reality of evil from a new perspective. In an in-depth discussion of the personality traits and behavior that constitute evil across a wide spectrum, Dr. Stone takes a clarifying scientific approach to a topic that for centuries has been inadequately explained by religious doctrines. Basing his analysis on the detailed biographies of more than 600 violent criminals, Stone has created a 22-level hierarchy of evil behavior, which loosely reflects the structure of Dante's Inferno. He traces two salient personality traits that run the gamut from those who commit crimes of passion to perpetrators of the worst crimes-sadistic torture and murder. One trait is narcissism, as exhibited in people who are so self-centered that they have little or no ability to care about their victims. The other is aggression, the use of power over another person to inflict humiliation, suffering, and death. Stone then turns to the various factors that, singly or intertwined, contribute to pushing certain people over the edge into committing heinous crimes. They include heredity, adverse environments, violence-prone cultures, mental illness or brain injury, and abuse of mind-altering drugs. All are considered in the search for the root causes of evil behavior. What do psychology, psychiatry, and neuroscience tell us about the minds of those whose actions could be described as evil? And what will that mean for the rest of us? Stone discusses how an increased understanding of the causes of evil will affect the justice system. He predicts a day when certain persons can safely be declared salvageable and restored to society and when early signs of violence in children may be corrected before potentially dangerous patterns become entrenched. Michael H. Stone, MD (New York, NY) is professor of clinical psychiatry at the Columbia College of Physicians and Surgeons. He is the author of ten books, most recently Personality Disorders: Treatable and Untreatable, and over two hundred professional articles and book chapters. He is also the host of Discovery Channel's former series Most Evil and has been featured in the New York Times, Psychology Today, the Christian Science Monitor, CNN, ABC News, CBS News, NBC News, the New York Post, the London Times, the BBAC, and Newsday, among many other media outlets.

Hometown Killer Carol J. Rothgeb, 2011-01-28 Child Killer Springfield, Ohio was an All-American town. A town rocked in 1992 by the discovery of two adolescent girls, brutally raped and murdered. Investigators soon learned that four local misfits had been accomplices. Yet DNA tests proved that the true culprit was still on the loose. Deadly Deceiver Inexplicably, the four men continued to mislead police throughout the years of the investigation, periodically supplying false clues and leads. While a cold-blooded killer remained at large, 31-year-old Belinda Anderson was raped and murdered, and Helen Preston, 38, was raped, beaten, and left for dead. Not until 1996, when a prostitute managed to survive a terrifying ordeal at the hands of her would-be slayer, were police able to catch the man who'd been stalking Springfield's women and children. Family Man He was William K. Sapp, husband, father of two young boys and a baby girl of his own. Behind his mask of seeming normalcy lay a murderous rage toward women. Here is the

startling true story of a town besieged-and of the relentless manhunt that tracked Sapp through the years, finally bringing him to justice. Includes 16 Pages Of Shocking Photos

No One Can Hurt Him Anymore Scott Cupp,Carol J. Rothgeb,2014-08-26 Family Tragedy On Sunday May 2, 1993 in Lantana, Florida, a town in the Palm Beach area, the naked body of ten-year-old Andrew A.J. Schwarz was found floating facedown in the family's backyard swimming pool. But how could he have drowned when the water level was only four feet deep? And why was his body covered with cuts and bruises from head to toe? Wicked Stepmother Suspicion soon fastened on the dead boy's stepmother, Jessica Schwarz, who boastfully described herself as loud and crude. She was a brute and a bully--but was she a torturer and child killer? Investigators unearthed a pattern of nightmarish physical and mental abuse that she had inflicted on the boy, one that left even hardened police sleuths sickened. Day Of Reckoning During her trials, Jessica Schwarz was smugly defiant, until convictions for criminal child abuse and second degree murder wiped the smirk off her face. She is now serving a seventy-year prison term. Carol J. Rothgeb, author of Hometown Killer, and Scott H. Cupp, the prosecutor who successfully convicted Jessica Schwarz, now tell the riveting inside story of how a brutal killer's reign of terror was finally brought to an end. 16 Pages Of Photos

Inside the Minds of Serial Killers Katherine Ramsland,2006-08-30 There are many cultural myths about serial killers, often propagated even by mental health professionals. Many assume there is a profile of a serial killer, that serial killers always go for the same victim type or always use the same MO, that they are more clever than ordinary people, and that they are inevitably charming and attractive. The truth is not as simple as that. There are different types of serial killers, and while there are many books that discuss the serial killer phenomenon especially in relationship to victim types or context, researchers have not yet been able to come up with a definition, or type, that covers the broad spectrum of serial killers and their complex psychological dynamics. Ramsland looks at the variety of serial killer types, illustrating that it is difficult to accurately depict these elusive, intriguing, and dangerous killers. There are many cultural myths about serial killers, often propagated even by mental health professionals. Many assume there is a profile of a serial killer, that serial killers always go for the same victim type or always use the same MO, that they are more clever than ordinary people, and that they are inevitably charming and attractive. There are different types of serial killers and while there are many books that discuss the serial killer phenomenon especially in relationship to victim types or context, researchers have not yet been able to come up with a definition, or type, that covers the broad spectrum of serial killers and their complex psychological dynamics. Ramsland looks at serial killer types, illustrating that it is difficult to accurately depict these elusive, intriguing, and dangerous killers. This book examines a variety of serial killers, from sexual predators to psychotic killers, from murder teams to odd eccentric stalkers, in order to present the distinct psychological dynamics that set serial killers apart from other violent murderers. Among the motives addressed are lust, control, glory, profit, thrill, delusions, rage, the desire for company, the need to please a partner, and even murder as an intellectual exercise. Serial killers live double lives, hiding their violence even from those who live with them, so along with a study of motives are chapters devoted to how close associates have described killers, including parents, siblings, co-workers, lovers, and survivors. There is no profile of a serial killer, and this book establishes that in vivid and frightening detail.

The Human Predator Katherine Ramsland,2013-02-05 When we think of serial killing, we tend to think of it as a perversion of contemporary society. The Human Predator makes an eye-opening case for the existence of serial killers throughout time—the motives

and methods, the societies that spawned them, and the historical periods in which they lived . . . and killed. From Ancient Rome and the Dark Ages to the open roads of America, from the exploits of French religious zealot Gilles de Rais to such high-profile monsters as Jeffrey Dahmer and Aileen Wuornos, Katherine Ramsland offers a complete chronological record of the serial-killer phenomenon—and the parallel development of psychology, forensic science, and FBI profiling in the serial killer's evolving manifestation throughout human history. Fighting Against Western Imperialism Andre Vltchek, 2014-06-20 FIGHTING AGAINST WESTERN IMPERIALISM compiles ten modified essays that were written during just a few months of the onslaught of the Western imperialism all over the world. Andre Vltchek had traveled the world searching for parallels, similarities; comparing scenarios. He tried to grasp, and then to explain, how the Empire really works, how it selects its targets, which countries it decides to destroy and why? He studied the 'opposition movements' manufactured by Washington and London, and how they get implanted in so many different parts of the world; basically wherever people and their governments still dare to insist on defending their own national interests and choosing their own political as well as economic systems.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates

on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The Telling Ursula K. Le Guin, 2000-09-11 Suttu, an Observer from Earth for the interstellar Ekumen, has been assigned to a new world—a world in the grips of a stern monolithic state, the Corporation. Embracing the sophisticated technology brought by other worlds and desiring to advance even faster into the future, the Akans recently outlawed the past, the old calligraphy, certain words, all ancient beliefs and ways; every citizen must now be a producer-consumer. Their state, not unlike the China of the Cultural Revolution, is one of secular terrorism. Traveling from city to small town, from loudspeakers to bleating cattle, Suttu discovers the remnants of a banned religion, a hidden culture. As she moves deeper into the countryside and the desolate mountains, she learns more about the Telling—the old faith of the Akans—and more about herself. With her intricate creation of an alien world, Ursula K. Le Guin compels us to reflect on our own recent history.
