**Future Noir: The Making of Blade Runner** Paul M. Sammon, 1996-05-01 The 1992 release of the Director's Cut only confirmed what the international film cognoscenti have known all along: Ridley Scott's *Blade Runner*, based on Philip K. Dick's brilliant and troubling SF novel *Do Androids Dream of Electric Sheep*, still rules as the most visually dense, thematically challenging, and influential SF film ever made. *Future Noir* is the story of that triumph. The making of *Blade Runner* was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry. A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, *Future Noir* is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.

*Speculative Everything* Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour

through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

**Multimedia** Tay Vaughan, 1996 Thoroughly updated for new breakthroughs in multimedia  
The internationally bestselling *Multimedia: Making it Work* has been fully revised and expanded to cover the latest technological advances in multimedia. You will learn to plan and manage multimedia projects, from dynamic CD-ROMs and DVDs to professional websites. Each chapter includes step-by-step instructions, full-color illustrations and screenshots, self-quizzes, and hands-on projects.

*The Consolations of Philosophy* Alain De Botton, 2013-01-23 From the author of *How Proust Can Change Your Life*, a delightful, truly consoling work that proves that philosophy can be a supreme source of help for our most painful everyday problems. Perhaps only Alain de Botton could uncover practical wisdom in the writings of some of the greatest thinkers of all time. But uncover he does, and the result is an unexpected book of both solace and humor. Dividing his work into six sections -- each highlighting a different psychic ailment and the appropriate philosopher -- de Botton offers consolation for unpopularity

from Socrates, for not having enough money from Epicurus, for frustration from Seneca, for inadequacy from Montaigne, and for a broken heart from Schopenhauer (the darkest of thinkers and yet, paradoxically, the most cheering). Consolation for envy -- and, of course, the final word on consolation -- comes from Nietzsche: Not everything which makes us feel better is good for us. This wonderfully engaging book will, however, make us feel better in a good way, with equal measures of wit and wisdom.

The Innovators Walter Isaacson, 2014 Following his blockbuster biography of Steve Jobs, *The Innovators* is Walter Isaacson's revealing story of the people who created the computer and the Internet. It is destined to be the standard history of the digital revolution and an indispensable guide to how innovation really happens. What were the talents that allowed certain inventors and entrepreneurs to turn their visionary ideas into disruptive realities? What led to their creative leaps? Why did some succeed and others fail? In his masterly saga, Isaacson begins with Ada Lovelace, Lord Byron's daughter, who pioneered computer programming in the 1840s. He explores the fascinating personalities that created our current digital revolution, such as Vannevar Bush, Alan Turing, John von Neumann, J.C.R. Licklider, Doug Engelbart, Robert Noyce, Bill Gates, Steve Wozniak, Steve Jobs, Tim Berners-Lee, and Larry Page. This is the story of how their minds worked and what made them so inventive. It's also a narrative of how their ability to collaborate and master the art of teamwork made them even more creative. For an era that seeks to foster innovation, creativity, and teamwork, *The Innovators* shows how they happen--

**Well-Being and Higher Education** Sally Pingree, Julie Kidd, John Bronsteen, Carol Ryff, Barry Schwartz, Henry Giroux, William Sullivan, Kazi Joshua, Elizabeth Minnich, Jerzy Axer, Todd

Gitlin,Alexander Astin,Corey Keyes,David Schoem,Sara Dahill-Brown,Eranda Jayawickreme,Laurie Schreiner,Tricia Seifert,Andrew Seligsohn,Elsa Nunez,Thia Wolf,Amalia Rodas,Brian Murphy,Mona Taylor-Phillips,Nance Lucas,Paul Rogers,Heidi Elmendorf,Joan Riley,James Pawelski,Jonathan Metzl,Amanda Hyberger,John Wilson,Theodore Long,Kevin Kruger,Stephanie Gordon,Robert Frank,Eric Lister,Peter Leyden,Carol Geary Schneider,Randall Bass,2016-08-16 Well-Being and Higher Education explores the multiple connections of well-being to higher education and why those connections matter—for the individual lives of students and those who teach; for the institution; and for whether or not the unique promise of higher education to a democratic society can be advanced and realized. The publication's thirty-five original essays and provocations—by some of the most highly respected voices within and beyond the academy—address the theoretical underpinnings and practical expressions of these connections. Well-Being and Higher Education opens the discussion on learning's connection to well-being; responds to current challenges against the state of higher education today; and brings to the forefront a conversation considering the greater purposes of higher education and the need to preserve and revive the institution's role to look beyond itself to a greater good.

Plato's 'Republic': An Introduction Sean McAleer,2020-11-09 It is an excellent book – highly intelligent, interesting and original. Expressing high philosophy in a readable form without trivialising it is a very difficult task and McAleer manages the task admirably. Plato is, yet again, intensely topical in the chaotic and confused world in which we are now living. Philip Allott, Professor Emeritus of International Public Law at Cambridge University This book is a lucid and accessible companion to Plato's Republic, throwing

light upon the text's arguments and main themes, placing them in the wider context of the text's structure. In its illumination of the philosophical ideas underpinning the work, it provides readers with an understanding and appreciation of the complexity and literary artistry of Plato's Republic. McAleer not only unpacks the key overarching questions of the text – What is justice? And Is a just life happier than an unjust life? – but also highlights some fascinating, overlooked passages which contribute to our understanding of Plato's philosophical thought. Plato's 'Republic': An Introduction offers a rigorous and thought-provoking analysis of the text, helping readers navigate one of the world's most influential works of philosophy and political theory. With its approachable tone and clear presentation, it constitutes a welcome contribution to the field, and will be an indispensable resource for philosophy students and teachers, as well as general readers new to, or returning to, the text.

**Dorothy Heathcote** Betty Jane Wagner, 1999 Heathcote's techniques in the classroom, the pedagogy of drama, are explained in this book, along with analyses of her improvisations with young people. The author's goal is to share with teachers how they, using Heathcote's methods, can generate significant learning experiences.

**Architectonics of Game Spaces** Andri Gerber, Ulrich Götz, 2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory

nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

**The Information** James Gleick, 2011-03-01 From the bestselling author of the acclaimed *Chaos* and *Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. A New York Times Notable Book A Los Angeles Times and Cleveland Plain Dealer Best Book of the Year Winner of the PEN/E. O. Wilson Literary Science Writing Award

**Discovering Advanced Algebra** Jerald Murdock, Ellen Kamischke, 2010 Changes in society and the workplace require a careful analysis of the algebra curriculum that we teach. The curriculum, teaching, and learning of yesterday do not meet the needs of today's students.

The Modernist Papers Fredric Jameson, 2016-03-08 Cultural critic Fredric Jameson, renowned for his

incisive studies of the passage of modernism to postmodernism, returns to the movement that dramatically broke with all tradition in search of progress for the first time since his acclaimed *A Singular Modernity*. *The Modernist Papers* is a tour de force of analysis and criticism, in which Jameson brings his dynamic and acute thought to bear on the modernist literature of the nineteenth and twentieth centuries. Jameson discusses modernist poetics, including intensive discussions of the work of Baudelaire, Rimbaud, Mallarmé, Wallace Stevens, Joyce, Proust, and Thomas Mann. He explores the peculiarities of the American literary field, taking in William Carlos Williams and the American epic, and examines the language theories of Gertrude Stein. Refusing to see modernism as simply a Western phenomenon he also pays close attention to its Japanese expression; while the complexities of a late modernist representation of twentieth-century politics are articulated in a concluding section on Peter Weiss's novel *The Aesthetics of Resistance*. Challenging our previous understanding of the literature of this period, this monumental work will come to be regarded as the classic study of modernism.

Minor Histories Mike Kelley, 2004-02-06 The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the blazing network of focused confluences from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in voices that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. *Statements* consists of twenty pieces produced

between 1984 and 2002 (most of which were written to accompany exhibitions), including *Ajax*, which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; *Some Aesthetic High Points*, an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of creative writings that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. *Video Statements and Proposals* are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. *Image-Texts* offers writings that accompany or are part of artworks and installations. This section includes *A Stopgap Measure*, Kelley's zestful millennial essay in social satire, and *Meet John Doe*, a collage of appropriated texts. *Architecture* features an discussion of Kelley's *Educational Complex* (1995) and an interview in which he reflects on the role of architecture in his work. Finally, *Ufology* considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

Learning and Behavior Paul Chance, 2013-02-26 *LEARNING AND BEHAVIOR*, Seventh Edition, is stimulating and filled with high-interest queries and examples. Based on the theme that learning is a biological mechanism that aids survival, this book embraces a scientific approach to behavior but is written in clear, engaging, and easy-to-understand language.

*Journalism Studies* Andrew Calcutt, Philip Hammond, 2011-01-31 As the world of politics and public affairs has gradually changed beyond recognition over the past two decades, journalism too has been transformed... yet the study of news and journalism often seems stuck with ideas and debates which have

lost much of their critical purchase. Journalism is at a crossroads: it needs to reaffirm core values and rediscover key activities, almost certainly in new forms, or it risks losing its distinctive character as well as its commercial basis. Journalism Studies is a polemical textbook that rethinks the field of journalism studies for the contemporary era. Organised around three central themes – ownership, objectivity and the public – Journalism Studies addresses the contexts in which journalism is produced, practised and disseminated. It outlines key issues and debates, reviewing established lines of critique in relation to the state of contemporary journalism, then offering alternative ways of approaching these issues, seeking to reconceptualise them in order to suggest an agenda for change and development in both journalism studies and journalism itself. Journalism Studies is a concise and accessible introduction to contemporary journalism studies, and will be highly useful to undergraduate and postgraduate students on a range of Journalism, Media and Communications courses.

*The Worldly Philosophers* Robert L. Heilbroner, 1965 Includes a note on the author, Robert L. Heilbroner, chapter summaries and commentaries, final summary and evaluation of work, and more.

Machines Who Think Pamela McCorduck, 2004-03-17 This book is a history of artificial intelligence, that audacious effort to duplicate in an artifact what we consider to be our most important property—our intelligence. It is an invitation for anybody with an interest in the future of the human race to participate in the inquiry.

**Pharmako/Poeia** Dale Pendell, 2009 Pharmako poeia: plant powers, poisons, and herbcraft focuses on familiar psychoactive plant-derived substances and related synthetics, ranging from the licit (tobacco,

alcohol) to the illicit (cannabis, opium) and the exotic (absinthe, salvia divinorum, nitrous oxide)--Provided by publisher.

*Digital Content Creation* Rae Earnshaw, John Vince, 2012-12-06 The very word digital has acquired a status that far exceeds its humble dictionary definition. Even the prefix digital, when associated with familiar sectors such as radio, television, photography and telecommunications, has reinvented these industries, and provided a unique opportunity to refresh them with new start-up companies, equipment, personnel, training and working practices - all of which are vital to modern national and international economies. The last century was a period in which new media stimulated new job opportunities, and in many cases created totally new sectors: video competed with film, CDs transformed LPs, and computer graphics threatened traditional graphic design sectors. Today, even the need for a physical medium is in question. The virtual digital domain allows the capture, processing, transmission, storage, retrieval and display of text, images, audio and animation without familiar materials such as paper, celluloid, magnetic tape and plastic. But moving from these media to the digital domain introduces all sorts of problems, such as the conversion of analog archives, multimedia databases, content-based retrieval and the design of new content that exploits the benefits offered by digital systems. It is this issue of digital content creation that we address in this book. Authors from around the world were invited to comment on different aspects of digital content creation, and their contributions form the 23 chapters of this volume.

**The Diaries of Paul Klee, 1898-1918** Paul Klee, 1968 Paul Klee was endowed with a rich and many-sided personality that was continually spilling over into forms of expression other than his painting and that

made him one of the most extraordinary phenomena of modern European art. These abilities have left their record in the four intimate Diaries in which he faithfully recorded the events of his inner and outer life from his nineteenth to his fortieth year. Here, together with recollections of his childhood in Bern, his relations with his family and such friends as Kandinsky, Marc, Macke, and many others, his observations on nature and people, his trips to Italy and Tunisia, and his military service, the reader will find Klee's crucial experience with literature and music, as well as many of his essential ideas about his own artistic technique and the creative process.
