**The Longevity Code** Kris Verburgh, 2019-12-24 Slow down the aging process and live well for longer Do you know exactly how and why you age? And what you can do— whatever your current age—to slow that process and have a longer, healthier life? In The Longevity Code, medical doctor Kris Verburgh illuminates the biological mechanisms that make our bodies susceptible to heart attacks, dementia, diabetes, and other aging-related diseases. With the facts laid out, he provides the tools we need to slow down the aging process. His scientifically backed Longevity Staircase outlines a simple yet innovative step-by-step method offering better health and a longer life span— especially the crucial role of proper nutrition and exercise. But diet and exercise might not be the only way to crack the “longevity code”: With each passing day, advances in biotechnology that were once the stuff of science fiction are emerging. Dr. Verburgh discusses how new types of vaccines, mitochondrial DNA, CRISPR proteins, and stem cells may help us slow and even reverse aging—now and in the future—and when paired with the right lifestyle, lead to longer, healthier lives than we’ve ever imagined.

**Managing the Wild** Charles M. Peters,2018-02-20 Drawn from ecologist Charles M. Peters's thirty+five years of fieldwork around the globe, these absorbing stories argue that the best solutions for sustainably managing tropical forests come from the people who live in them. As Peters says, "Local people know a lot about managing

tropical forests, and they are much better at it than we are.” With the aim of showing policy makers, conservation advocates, and others the potential benefits of giving communities a more prominent conservation role, Peters offers readers fascinating backstories of positive forest interactions. He provides examples such as the Kenyah Dayak people of Indonesia, who manage subsistence orchards and are perhaps the world’s most gifted foresters, and communities in Mexico that sustainably harvest agave for mescal and demonstrate a near+‘heroic commitment to good practices. No forest is pristine, and Peters’s work shows that communities have been doing skillful, subtle forest management throughout the tropics for several hundred years.

**The Forever Now** Laura J. Hoptman, 2014 Timeless Painting presents the work of 17 contemporary painters whose works reflect a singular approach that is peculiarly of our time: they are a-temporal, a term coined by William Gibson and Bruce Sterling, the originators of the cyberpunk aesthetic. A-temporality or timelessness manifests itself in painting as an ahistoric free-for-all, where contemporaneity as an indicator of new form is nowhere to be found, and all eras co-exist. Published to accompany an exhibition at The Museum of Modern Art that explores the impact of this cultural condition on contemporary painting, this publication features work by an international roster of artists including Joe Bradley, Kerstin Brätsch, Matt Connors, Nicole Eisenman, Mark Grotjahn, Charline von Heyl, , Julie Mehretu, Oscar Murillo, Laura Owens and Josh Smith, among others. An overview essay by curator Laura Hoptman is divided into thematic chapters that explore topics such as re-animation and reenactment, recontextualization, 'Zombie' painting, and the concomitant 'Frankenstein approach', which describes a process of stitching together pieces of the history of painting to create a work of art that would be dead but for its juxtaposed parts, all working in association with one another to propel the work into life.
