For Whom the Bell Tolls Ernest Hemingway, 2003 This masterpiece of time and place tells a profound and timeless story of courage and commitment, love and loss, that takes place over a fleeting 72 hours. Drawing on Hemingway's own involvement in the Spanish Civil War, *For Whom the Bell Tolls* reflects his passionate feelings about the nature of war and the meaning of loyalty.

Multimedia Applications, Services and Techniques - ECMAS'T'99 Ecmast 9,1999-05-19 This book constitutes the refereed proceedings of the 4th European Conference on Multimedia Applications, Services and Techniques, ECMAS'T'99, held in Madrid, Spain in May 1999. The 37 revised full papers presented were carefully reviewed and selected from a total of 71 submissions. The book is divided in sections on services and applications, multimedia terminals, content creation, physical broadcast infrastructure, multimedia over the Internet, metadata, 3D imaging, multicast protocols, security and protection, and mobility.

Marketing for Sustainable Tourism Umberto Martini, Federica Buffa, 2020-05-13 The aim of the Special Issue is to discuss the main current topics concerning marketing for sustainable tourism with reference to territories (i.e., tourism destinations, protected areas, parks and/or natural sites, UNESCO World Heritage Sites, rural regions/areas, etc.) and tourism enterprises and/or organisations (i.e., destination management organisations, hospitality enterprises, restaurant enterprises, cableway companies, travel agencies,

etc.). In destinations where natural resources are pull factors for tourism development, the relationships among local actors (public, private, and local community), as well as marketing choices, are essential to develop sustainable tourism products. To this end, the Special Issue encourages papers that analyse marketing strategies adopted by tourism destinations and/or tourism enterprises to avoid overtourism, to manage mass sustainable tourism (as defined by Weaver, 2000), and to encourage and promote sustainable tourism in marginal areas or in territories suffering lack of integration in the tourism offer. Special attention will be given to contributions on the best practices to manage territories and/or enterprises adopting sustainable marketing strategies.

Rock Slope Engineering Evert Hoek, Jonathan D. Bray, 1981-06-30 This classic handbook deals with the geotechnical problems of rock slope design. It has been written for the non-specialist mining or civil engineer, with worked examples, design charts, coverage of more detailed analytical methods, and of the collection and interpretation of geological and groundwater information and tests for the mechanical properties of rock.

The Earth and Its Inhabitants Elisée Reclus, 1884

Republic of Egos Michael Seidman, 2002-11-23 Most histories of the Spanish Civil War (1936–1939) have examined major leaders or well-established political and social groups to explore class, gender, and ideological struggles. The war in Spain was marked by momentous conflicts between

democracy and dictatorship, Communism and fascism, anarchism and authoritarianism, and Catholicism and anticlericalism that still provoke our fascination. In *Republic of Egos*, Michael Seidman focuses instead on the personal and individual experiences of the common men and women who were actors in a struggle that defined a generation and helped to shape our world. By examining the roles of anonymous individuals, families, and small groups who fought for their own interests and survival—and not necessarily for an abstract or revolutionary cause—Seidman reveals a powerful but rarely considered pressure on the outcome of history. He shows how price controls and inflation in the Republican zone encouraged peasant hoarding, black marketing, and unrest among urban workers. Soldiers of the Republican Army responded to material shortages by looting, deserting, and fraternizing with the enemy. Seidman's focus on average, seemingly nonpolitical individuals provides a new vision of both the experience and outcome of the war.

Seven Days in May Fletcher Knebel, Charles Waldo Bailey, 1963

Measurement and Assessment in Teaching M. David Miller, Robert L. Linn, Norman Gronlund, 2013 In a presentation that assumes no previous knowledge of assessment or measurement, the text provides crystal clear step-by-step instruction on such topics as constructing test questions, aligning assessment with learning goals, and interpreting standardized tests.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Sustainable Technologies for Fashion and Textiles Rajkishore

Nayak,2019-12-01 Sustainable Technologies for Fashion and Textiles combines the latest academic research and industrial practices to shed light on a wide range of activities that influence how the textiles industry affects the natural environment. Pressure from regulators, customers and other stakeholders has pressed companies to translate general sustainability concepts and ideas into business practices. This is leading to improvements in how the industry consumes water, electricity and chemicals, and to a reduction in the amount of waste generated by textile processes. This book groups approaches to these topics under four themes, fiber, yarn and fabric

production, chemical processing, garment manufacturing and recycling. Addresses sustainability challenges that occur throughout the supply chain, from the sourcing of raw materials, to recycling finished products Provides introductions to sustainability—both in general and within the textiles industry—making this topic accessible for readers of all backgrounds Compares the advantages and disadvantages of different approaches to sustainability, helping readers avoid pitfalls when devising their own strategies

Urban Livelihoods Tony Lloyd-Jones, Carole Rakodi, 2014-10-14 One of the most promising approaches to poverty reduction in developing countries is to encourage sustainable livelihoods for the poor. This takes account of their opportunities and assets and the sources of their vulnerability. Based on recent and extensive research, this volume thoroughly assesses the value of the livelihoods approach to urban poverty. The book reviews the situation and strategies of the urban poor and identifies the policies and practical programmes that work best. Lasting improvements depend not just on economic development, but on political commitment and structures that are responsive to the claims and needs of different groups of poor people.

The Technology of Binaural Listening Jens Blauert, 2013-06-07 This book reports on the application of advanced models of the human binaural hearing system in modern technology, among others, in the following areas: binaural analysis of aural scenes, binaural de-reverberation, binaural quality assessment of audio channels, loudspeakers and performance spaces, binaural perceptual coding, binaural processing in hearing aids and cochlea implants, binaural systems in robots, binaural/tactile human-machine interfaces, speech-intelligibility prediction in rooms and/or multi-speaker scenarios. An introduction to binaural modeling and an outlook to the future are provided. Further, the book features a MATLAB toolbox to enable readers to construct their own dedicated binaural models on demand.

Handbook of Signal Processing in Acoustics ,2008

Geomorphological Processes E. Derbyshire,2019-03-13 This book originated from a proposal by one author (J. R. H.) who was subsequently joined by a second (E. D.) and then by a third (K. J. G.). It has taken longer to produce than we expected because of the complications imposed by the distances which the authors have succeeded in putting between themselves during the past three years. The basic objective was to produce a short book which would introduce geomorphological processes to students in the first or second year of their higher education courses. We believed that there was a need for such a book reviewing a range of geomorphological processes which would offer a prelude to the symphonies which are available in books devoted to specific processes and their effects, many of which are sign posted in the lists of further reading at the end of each chapter. We are aware that the range of suitable preludes is wide, but we have endeavoured to compose one which expresses at least some of the recent achievements in the study of geomorphological processes. Emphasis is placed on the nature of processes and upon their controls but the effects of processes in creating landforms are not reviewed in any detail. In addition to the selected references at the end of each chapter, we have collected a bibliography of works cited at the end of the book but this is not intended to be as exhaustive as the references collated in more advanced works.

Safe Handling of Tritium International Atomic Energy Agency,1991 This

publication contains information on the dosimetry and monitoring of tritium, the use of protective clothing for work with tritium, safe practices in tritium handling laboratories and details of tritium compatible materials. The information has been compiled from experience in the various applications of tritium and should represent valuable source material to all users of tritium, including those involved in fusion R&D.

Acoustic Array Systems Mingsian R. Bai, Jeong-Guon Ih, Jacob Benesty, 2013-03-07 Presents a unified framework of far-field and near-field array techniques for noise source identification and sound field visualization, from theory to application. Acoustic Array Systems: Theory, Implementation, and Application provides an overview of microphone array technology with applications in noise source identification and sound field visualization. In the comprehensive treatment of microphone arrays, the topics covered include an introduction to the theory, far-field and near-field array signal processing algorithms, practical implementations, and common applications: vehicles, computing and communications equipment, compressors, fans, and household appliances, and hands-free speech. The author concludes with other emerging techniques and innovative algorithms. Encompasses theoretical background, implementation considerations and application know-how Shows how to tackle broader problems in signal processing, control, and transducers Covers both farfield and nearfield techniques in a balanced way Introduces innovative algorithms including

equivalent source imaging (NESI) and high-resolution nearfield arrays
Selected code examples available for download for readers to practice on
their own Presentation slides available for instructor use A valuable
resource for Postgraduates and researchers in acoustics, noise control
engineering, audio engineering, and signal processing.

Targeted Molecular Imaging Michael J. Welch, William C. Eckelman, 2012-02-24
Targeted Molecular Imaging covers the development of novel diagnostic
approaches that use an imaging probe and agent to noninvasively visualize
cellular processes in normal and disease states. It discusses the concept,
development, preclinical studies, and, in many cases, translation to the
clinic of targeted imaging agents. The many case studies that form the core
of this book deal with the development and translation of non-nuclear probes
and radiotracers; other sections address critical topics such as In vitro
studies, small animal research, and the application of targeted probes for
nuclear, optical and MRI imaging. The chapters use a common format to
demonstrate how various investigators approach the comprehensive task of
validating a new targeted probe. Targeted Molecular Imaging is a timely
resource for a rapidly advancing field, and addresses: Various methods of
validating a new targeted probe through examples from human studies with
imaging of breast cancer, cardiovascular disease, and neurodegenerative
diseases Basic principles, disease models, imaging studies in animals,
imaging in initial human studies, and the application of molecular imaging in

pharmacy and drug discovery In vitro studies, small animal studies, and targeted radiopharmaceuticals Using these case studies, investigators can generalize and apply the information to their own specific targeted probe. The insights provided by the contributors, experts who have developed these approaches in their own groups, help guide scientists planning to translate imaging agents from the concept stage to clinical application.

The Social Cancer Jose Rizal, 2009-06-01 Filipino national hero Jose Rizal wrote *The Social Cancer* in Berlin in 1887. Upon his return to his country, he was summoned to the palace by the Governor General because of the subversive ideas his book had inspired in the nation. Rizal wrote of his consequent persecution by the church: My book made a lot of noise; everywhere, I am asked about it. They wanted to anathematize me ['to excommunicate me'] because of it ... I am considered a German spy, an agent of Bismarck, they say I am a Protestant, a freemason, a sorcerer, a damned soul and evil. It is whispered that I want to draw plans, that I have a foreign passport and that I wander through the streets by night ...
