Tip of the Spear Russ Diamond,2007 In the summer of 2005, Pennsylvania state government revealed its seedy underbelly when the General Assembly gave itself and others an unconstitutional middle-of-the-night pay raise. In response, the people of the Commonwealth awoke from a long slumber and rose up in defiance of the Political Class. They made history - and the reverberations are still being felt. Things may never be the same again in the Keystone State. Beneath the battles of right versus left, liberal versus conservative and Republican versus Democrat, the Establishment strained to maintain power and continuity. Traditional political ideologies took a back seat as the very fabric of the Political Class was torn apart. In 2005-2006, Pennsylvanians got a taste of what happens when the ivory-towered crowd is running scared. But what we read in the papers and see on television is never the whole story. Follow the journey of one individual who just happened to get caught in the middle of it all and observed it from a unique perspective?

Why the Pharaohs Built the Pyramids with Fake Stones Joseph Davidovits,2009 In this book, Professor Joseph Davidovits explains the intriguing theory that made him famous. He shows how the Pyramids were built by using re-agglomerated stone (a natural limestone treated like a concrete), and not with huge carved blocks, hauled on fragile ramps. Archaeology bears him out, as well as hieroglyphic texts, scientific analysis, religious and historical facts. Several independent scientific studies reveal the ultimate proofs that the pyramids blocks are not natural. You may find various papers or opinions challenging the theory, but all prefer ignoring these analysis. Believing or not in the artificial stone theory is now simply irrelevant. It is a fact, a truth that is still fought by some people for irrational purposes. Here we finally have the first complete presentation on how and why the Egyptian pyramids were built. We discover its brilliant creator, the great scribe and architect, Imhotep. Joseph Davidovits sweeps aside the conventional image which cripples Egyptology and delivers a captivating and surprising view of Egyptian civilisation. He charts the rise of this technology, its apogee with the Pyramids at Giza, and the decline. Everything is logical and brilliant, everything fits into place. Chapter by chapter, the revelations are sensational, especially when Joseph Davidovits explains why the pharaohs stopped building great pyramids because of an over-exploitation of raw materials and a likely environmental disaster. We understand why Cheops and Ramses II represent two Egyptian civilisations completely different in their beliefs. On the one hand, the God Khnum mandates Cheops to build his pyramid in agglomerated stone, while on the other hand, the God Amun orders Ramses to carve stone for the temples of Luxor and Karnak. 30 years after the best seller book: The Pyramids: an enigma solved, after 30 years of new research, and new discoveries, you will understand why the theory is more alive than ever, why more and more scientists and archaeologists agree, simply because it is the truth.

Klemm, Rosemarie Klemm, 2010 During the Egyptian Old Kingdom (2650-2135 BC), the most impressive of all monuments were built in the form of the pyramids and their associated temples.
