*The Architecture of the City* Aldo Rossi,1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. The Architecture of the City is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

Microfinance Handbook Joanna Ledgerwood,1998-12-01 The purpose of the 'Microfinance Handbook' is to bring together in a single source guiding principles and tools that will promote sustainable microfinance and create viable institutions.

**The Major Transitions in Evolution** John Maynard Smith,Eörs Szathmáry,1997-10-30 During evolution there have been several major changes in the way genetic information is organized and transmitted from one generation to the next. These transitions include the origin of life itself, the first eukaryotic cells, reproduction by sexual means, the appearance of multicellular plants and animals, the emergence of cooperation and of animal societies. This is the first book to discuss all these major transitions and their implications for our understanding of evolution. Clearly written and illustrated with many original diagrams, this book will be welcomed by students and researchers in the fields of evolutionary biology, ecology, and genetics.

Intelligent Hybrid Systems Da Ruan,1997-09-30 Intelligent Hybrid Systems: Fuzzy Logic, Neural Networks, and Genetic Algorithms is an organized edited collection of contributed chapters covering basic principles, methodologies, and applications of fuzzy systems, neural networks and genetic algorithms. All chapters are original contributions by leading researchers written exclusively for this volume. This book reviews important concepts and models, and focuses on specific methodologies common to fuzzy systems, neural networks and evolutionary computation. The emphasis is on development of cooperative models of hybrid systems. Included are applications related to intelligent data analysis, process analysis, intelligent adaptive information systems, systems identification, nonlinear systems, power and water system design, and many others. Intelligent Hybrid Systems: Fuzzy Logic, Neural Networks, and Genetic Algorithms provides researchers and engineers with up-to-date coverage of new results, methodologies and applications for building intelligent systems capable of solving large-scale problems.

**Tracking and Disrupting the Illicit Antiquities Trade with Open Source Data** Matthew Sargent,James V. Marrone,Alexandra T. Evans,Bilyana Lilly,Erik Nemeth,Stephen Dalzell,2020-05-12 The illicit antiquities market is fueled by a well-documented rise in looting at archaeological sites and a fear that the proceeds of such looting may be financing terrorism or rogue states. In this report, the authors compile evidence from numerous open sources to outline the major policy-relevant characteristics of that market and to propose the way forward for

developing policies intended to disrupt illicit networks.

Pollutants from Energy Sources Rashmi Avinash Agarwal,Avinash Kumar Agarwal,Tarun Gupta,Nikhil Sharma,2018-11-01

This book discusses different aspects of energy consumption and environmental pollution, describing in detail the various pollutants resulting from the utilization of natural resources and their control techniques. It discusses diagnostic techniques in a simple and easy-to-understand manner. It will be useful for engineers, agriculturists, environmentalists, ecologists and policy makers involved in area of pollutants from energy, environmental safety, and health sectors.

By Any Greens Necessary Tracye Lynn McQuirter,2010-05-01 \* The first vegan guide geared to African American women \* More than forty delicious and nutritious recipes highlighted with color photographs \* Menus and advice on transitioning from omnivore to vegan \* Resource information and a comprehensive shopping list for restocking the fridge and pantry African American women are facing a health crisis: Heart disease, stroke, and diabetes occur more frequently among them than among women of other races. Black women comprise the heftiest group in the nation—80 percent are overweight, and 50 percent obese. Decades of studies show that these chronic diseases can be prevented and even reversed with a plant-based diet. But how can you control your weight and health without sacrificing great food and gorgeous curves? Just ask Tracye Lynn McQuirter. With attitude, inspiration, and expertise, in *By Any Greens Necessary* McQuirter shows women how to stay healthy, hippy, and happy by eating plenty of fresh fruits and vegetables, whole grains, and legumes as part of an active lifestyle. The book is a call to action that all women should heed.

**Manual for the Production of Statistics on the Digital Economy** United Nations Publications,2021 The United Nations Conference on Trade and Development (UNCTAD) is a founding member of the Partnership on Measuring ICT for Development, which is an international, multi-stakeholder initiative to improve the availability and quality of ICT data and indicators. One of its key achievements is the development of a core list of ICT indicators for the production of internationally comparable statistics. This list was first endorsed by the United Nations Statistical Commission at its 38th session in March 2007 and has since been updated regularly. The Commission encouraged countries to use that list in their data collection programmes; a first version of the *Manual for the Production of Statistics on the Information Economy* was published at the end of 2007. An updated version was published in 2009. The current edition, entitled *Manual for the Production of Statistics on the Digital Economy*, was prepared to reflect the many changes that have taken place in the past decade in terms of access and use of ICTs. Compared to earlier versions, it expands the coverage of the measurement of e-commerce, trade in ICT services and trade in ICT-enabled (or digitally delivered) services. It contains more model questionnaires and reflects the most recent revisions of the Partnership's list of core ICT indicators. The *Manual* is intended to guide statisticians from developing countries through all the steps involved in the production and dissemination of statistics related to e-commerce and the digital economy.

The Book of Payments Bernardo Batiz-Lazo, Leonidas Efthymiou, 2016-12-04 This book examines the nature of retail financial transaction infrastructures. Contributions assume a long-term outlook in their exploration of the key financial processes and systems that support a global transition to a cashless economy. The volume offers both modern and historic accounts that demonstrate the constantly changing role of payment instruments. It brings together different theoretical approaches to the study, re-examining and forecasting changes in retail payment systems. Chapters explore a global transition to a cashless society and contemplate future alternatives to cash, cheques and plastic, featuring the perspectives of academics from different disciplines in conversation and industry participants from six continents. Readers are invited to discover the innovation in payment systems and how it co-evolves with changes in society and organisations through personal, corporate and governmental processes.

The JOBS Act William Michael Cunningham, 2012-12-20 On April 5, 2012, President Barack Obama signed the Jumpstart Our Business Startups Act, better known as the JOBS Act. The act is designed to “reopen American capital markets to small companies,” defined in the act as Emerging Growth Companies. This is one of the most significant legislative initiatives in finance since the Securities and Exchange Acts of 1933 and 1934, and it opens up funding to a slew of companies previously shut out of the capital markets. Here’s the good news: Small businesses and startups will be able to raise up to \$1 million in equity (or debt) funding online via what are called Crowdfunding Platforms—online communities and websites. Imagine an eBay-like site that allows you to post your idea for a commercial venture online and then allows investors to purchase equity shares or stakes in it. As one journalist put it, it’s “social media meets venture capital.” How can you get in on the new funding opportunities? That’s what The JOBS Act: Crowdfunding for Small Businesses and Startups is all about. Investment expert William Michael Cunningham shows how the new law will enable you to use the internet to raise significant amounts of capital funding for your startup. After discussing briefly the development and implementation of the law, what it means, and how it will impact the business startup marketplace, he delivers the nuts and bolts of how to take advantage of the JOBS Act to access new sources of capital for your small business or startup. As you’ll see, the act has the power to unleash a new wave of innovation, increase employment, and set many more average entrepreneurs and investors on the road to wealth. Not just for entrepreneurs, The JOBS Act: Crowdfunding for Small Businesses and Startups will benefit investors, securities lawyers, community development specialists, educators, venture capitalists, and those offering services in the new crowdfunding arena. It is, simply, the most current and most comprehensive compendium of information on the law and its impact on this new market.

**Benner's Commentary on the Torah** Jeff A. Benner, 2021-06-28 Mr. Benner shares his over 20 years of research and studies of the Torah. This work explains the linguistic and cultural background of many verses, topics, names and words in the Torah. When the Torah is understood from the perspective of an Ancient Hebrew, rather from a Modern Westerner, the text comes to life and new revelations are discovered throughout the text.

**Strategic Latency Unleashed** Zachary Davis, Frank Gac, Philip Reiner, Christopher Rager, Jennifer Snow, 2021-01-30 The

world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

**Electronic Commerce 2018** Efraim Turban, Jon Outland, David King, Jae Kyu Lee, Ting-Peng Liang, Deborah C. Turban, 2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

**Applied Automata Theory** Julius T. Tou, 2013-10-22 Applied Automata Theory provides an engineering style of presentation of some of the applied work in the field of automata theory. Topics covered range from algebraic foundations and recursive functions to regular expressions, threshold logic, and switching circuits. Coding problems and stochastic processes are also discussed, along with content addressable memories, probabilistic reliability, and Turing machines. Much emphasis is placed on engineering applications. Comprised of nine chapters, this book first deals with the algebraic foundations of automata theory, focusing on concepts such as semigroups, groups and homomorphisms, and partially ordered sets and lattices, as well as congruences and other relations. The reader is then introduced to regular expressions; stochastic automata and discrete systems theory; and switching networks as models of discrete stochastic processes. Subsequent chapters explore applications of automata theory

in coding; content addressable and distributed logic memories; recursive functions and switching-circuit theory; and synthesis of a cellular computer. The book concludes with an assessment of the fundamentals of threshold logic. This monograph is intended for graduates or advanced undergraduates taking a course in information science or a course on discrete systems in modern engineering curriculum.

**Sequences and Their Applications - SETA 2010** Claude Carlet, Alexander Pott, 2010-09 This volume contains the refereed proceedings of the Sixth International Conference on Sequences and Their Applications (SETA 2010), held in Paris, France, September 13-17, 2010. The previous 5 conferences were held in Singapore (Republic of Singapore), Bergen (Norway), Seoul (South Korea), Beijing (China) and Lexington (USA). Topics of SETA include: – Randomness of sequences – Correlation (periodic and aperiodic types) and combinatorial aspects of sequences (difference sets) – Sequences with applications in coding theory and cryptography – Sequences over finite fields/rings/function fields – Linear and nonlinear feedback shift register sequences – Sequences for radar distance ranging, synchronization, identification, and hardware testing – Sequences for wireless communication – Pseudorandom sequence generators – Boolean and vectorial functions for sequences, coding and/or cryptography – Multidimensional sequences and their correlation properties – Linear and nonlinear complexity of sequences The Technical Program Committee of SETA 2010 refereed 56 submitted papers. Each paper was reviewed by at least 2 referees (at least 3 when an author was a TPC member) and the TPC selected 33 papers to be presented at the conference. In addition, we had 4 invited papers, by Robert Calderbank (Princeton University, USA), James Massey (retired from ETH Zurich, Switzerland), Jong-Seon No (Seoul National University, South Korea) and Arne Winterhof (Österreichische Akademie der Wissenschaften, Austria). The Co-chairs of the TPC were Claude Carlet (Université Paris 8, France) and Alexander Pott (Otto-von-Guericke-Universität, Magdeburg, Germany). They wish to thank the other members of the Program Committee: Thierry P.

**Introduction to Electronic Commerce and Social Commerce** Efraim Turban, Judy Whiteside, David King, Jon Outland, 2017-04-23 This is a complete update of the best-selling undergraduate textbook on Electronic Commerce (EC). New to this 4th Edition is the addition of material on Social Commerce (two chapters); a new tutorial on the major EC support technologies, including cloud computing, RFID, and EDI; ten new learning outcomes; and video exercises added to most chapters. Wherever appropriate, material on Social Commerce has been added to existing chapters. Supplementary material includes an Instructor's Manual; Test Bank questions for each chapter; Powerpoint Lecture Notes; and a Companion Website that includes EC support technologies as well as online files. The book is organized into 12 chapters grouped into 6 parts. Part 1 is an Introduction to E-Commerce and E-Marketplaces. Part 2 focuses on EC Applications, while Part 3 looks at Emerging EC Platforms, with two new chapters on Social Commerce and Enterprise Social Networks. Part 4 examines EC Support Services, and Part 5 looks at E-Commerce Strategy and Implementation. Part 6 is a collection of online tutorials on Launching Online Businesses and EC Projects, with tutorials focusing on e-CRM; EC Technology; Business Intelligence, including Data-, Text-, and Web Mining; E-Collaboration; and Competition in Cyberspace. the following tutorials are not related to any

*Communication Systems* Marcelo S. Alencar,Valdemar C. da Rocha,2005-11-22 Presents main concepts of mobile communication systems, both analog and digital Introduces concepts of probability, random variables and stochastic processes and their applications to the analysis of linear systems Includes five appendices covering Fourier series and transforms, GSM cellular systems and more

**Successful Innovation Systems** Ludovit Garzik,2021-11-26 This book places a central question: why are some regions in the world more successful in innovation than others? It aims to increase readers 'understanding of how innovation processes are accelerated or hindered by regional characteristics. A deep dive into differences of innovation ecosystems across global regions will provide a detailed mosaic of strengths and weaknesses. The audience will also learn to assess the resources and elements of regional innovation systems and to compare and contrast structures and processes in innovation management in Africa, Asia, Europe, and the Americas. The speciality of the book lies in its focus on the patterns that are behind the development of many successful innovation regions and it defines the ingredients for right planning and policy development.
