Beijing Red Alex Ryan,2016-05-10 A bio-terrorist attack unleashes a mysterious disease that ravages western China in this high-octane thrill ride “for fans of special-ops and contagion-driven thrillers” (Booklist) When ex-Navy SEAL Nick Foley travels to China to find purpose and escape the demons of his past, he instead stumbles into a conspiracy his Special Forces training never prepared him for. A mysterious and deadly outbreak ravages a remote area of western China, and Nick finds himself the lead suspect in a bio-terrorism investigation being conducted by China's elite Snow Leopard counter-terrorism unit. To clear his name and avoid prosecution, he must team up with beautiful Chinese CDC microbiologist Dr. Dazhong “Dash” Chen to find who is really behind the attack. As their investigation proceeds, their budding friendship is tested by nationalistic loyalties and suspicion. In a race against time, Nick and Dash must risk everything to stop a mad man before he unleashes the world's next super-weapon in Beijing. “A masterful mix of Tom Clancy and the great Vince Flynn with just enough Brad Thor sprinkled in for good measure. This is high stakes, high action at its level best and an absolute must for all thriller fans.” —Jon Land, USA Today–bestselling author

Communicating Process Architectures 2001 World Occam and Transputer User Group. Technical Meeting,World Occam and Transputer User Group, Technical Meeting,2001 Concurrency is an integral part of everyday life. The concept is so ingrained in our existence that we benefit from it without realizing. When faced with a taxing problem, we automatically involve others to solve it more easily. Such concurrent solutions to a complex problem may, however, not be quite straightforward and communication

becomes crucial to ensure the successful solution of the problem.

Playful User Interfaces Anton Nijholt,2014-02-17 The book is about user interfaces to applications that have been designed for social and physical interaction. The interfaces are 'playful', that is, users feel challenged to engage in social and physical interaction because that will be fun. The topics that will be present in this book are interactive playgrounds, urban games using mobiles, sensor-equipped environments for playing, child-computer interaction, tangible game interfaces, interactive tabletop technology and applications, full-body interaction, exertion games, persuasion, engagement, evaluation and user experience. Readers of the book will not only get a survey of state-of-the-art research in these areas, but the chapters in this book will also provide a vision of the future where playful interfaces will be ubiquitous, that is, present and integrated in home, office, recreational, sports and urban environments, emphasizing that in the future in these environments game elements will be integrated and welcomed.
