London's Urban Landscape Christopher Tilley,2019-05-07 London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Sundaland: Tracing The Cradle of Civilizations Dhani Irwanto,2019-02-22 Sundaland is a bio-geographical region of Southeastern Asia which encompasses the Sunda Shelf, the part of the Asian continental shelf that was exposed during the Last Ice Age. It included the Malay Peninsula on the Asian mainland, as well as the large islands of Kalimantan, Java and Sumatera, and their surrounding islands. Sundaland is in the tropics, surrounded by oceans, and within the Ring of Fire. Benefitting from the heavy precipitation, volcanic deposits in Sundaland develop into some of the richest forestry and agricultural lands, and developed into some of the richest fauna on Earth. The vast majority of scholars accept that every living human being is descended from a small group in Africa, who then dispersed into the wider world. Archaeological and fossil evidence support an early migration of modern humans left Africa and followed the coastlines of Africa, Arabia, India and Sundaland. After migrating from the semi-deserted savannas of Africa, man first found a place in Sundaland where food was abundant and it was there that they left hunter-gatherer culture and invented farming, agriculture, trading and civilization, which made humanity first flourished. All this took place during the Last Glacial period. The sea levels continued to rise gradually to peak levels about 5,500 years ago, causing land loss on tropical coasts with flat continental shelves. Cracks in the earth's crust as the weight of the ice shifted to the seas set off catastrophic events compounded by earthquakes, volcano eruptions, super waves and floods drowned the coastal cultures and all the flat continental shelves of Southeast Asia, and wiped out many populations. As the sea rolled in, there was a mass migration from the sinking continent. Genetic studies show that there has been a sharp decline in the population of the world, and population turnovers from Southeast, East and South Asia to Europe, Near East and the Caucasus beginning at the the end of the Younger Dryas period. The Younger Dryas disasters are also documented as legends, myths or tales in almost every region on Earth, observable with tremendous similarities. They are common across a wide range of cultures, extending back into Bronze Age and Neolithic prehistory. The overwhelming consistency among legends and myths of flood and the repopulation of man from a flood hero similar to the Noah Flood are found in distant parts of the Earth. The myths similar to the Garden of Eden, Paradise or Divine Land echo among the populations around the world. Memories of their origin are documented in their legends, such as the stories of Atlantis, Neserser, Land of Punt, Land of Ophir, Kumari Kandam, Kangdez and Taprobana. Pyramids spread in many parts of the world and emerged separately from one another by oceans who supposedly never discovered each other's existence. Those indicate that they were derived from a common origin. Further, scholastic belief by etymologists and linguists are positive that all world languages sprang from a common source.
