The Evolution of the Cruise Missile Kenneth P. Werrell, 1985

Facing the Heat Barrier T. A. Heppenheimer, 2009-08 Hypersonics is the study of flight at speeds where aerodynamic heating dominates the physics of the problem. It is an engineering science with close links to supersonics and engine design. Within this field, many of the most important results have been experimental. The principal facilities have been wind tunnels and related devices, which have produced flows with speeds up to orbital velocity. Why is this important? Hypersonics has had two major applications. The first has been to provide thermal protection during atmospheric reentry. Success in this enterprise has supported ballistic-missile nose cones, has returned strategic reconnaissance photos from orbit and astronauts from the Moon, and has even dropped an instrument package into the atmosphere of Jupiter. The second application has involved high-speed propulsion and has sought to develop the scramjet as an advanced airbreathing ramjet. Atmospheric entry today is fully mature as an engineering discipline, but work with its applications continues to reach for new achievements. Studies of scramjets still seek full success, in which such engines can accelerate a vehicle without the use of rockets. Hence, there is much to do in this area as well.

In rescuing ground-based air defense systems from long neglect, Werrell delves into such topics as tactics, leadership, change, and innovation

Principles of Guided Missiles and Nuclear Weapons United States. Bureau of Naval Personnel, 1966 Fundamentals of missile and nuclear weapons systems are presented in this book which is primarily prepared as the second text of a three-volume series for students of the Navy Reserve Officers' Training Corps and the Officer Candidate School. Following an introduction to guided missiles and nuclear physics, basic principles and theories are discussed with a background of the factors affecting missile flight, airframes, missile propulsion systems, control components and systems, missile guidance, guided missile ships and systems, nuclear weapons, and atomic warfare defense. In the area of missile guidance, further explanations are made of command guidance, beam-rider methods, homing systems, preset guidance, and navigational guidance systems. Effects of nuclear weapons are also described in categories of air, surface, subsurface, underwater, underground, and high-altitude bursts as well as various kinds of damages and injuries. Besides illustrations for explanation purposes, a table of atomic weights and a glossary of general terms are provided in the appendices.

Sidewinder Ron Westrum, 2013-08-15 In the mid-1950s a small group of overworked, underpaid scientists and engineers on a remote base in the Mojave Desert developed a weapon no one had asked for but everyone in the weapons industry desired. This is the story of how that unorthodox team, led by visionary Bill McLean, overcame U.S. Navy bureaucracy and other more heavily funded projects to develop the world's best air-to-air missile. Author Ron Westrum examines that special time and place—when the old American work ethic and “can do” spirit were a vital part of U.S. weapons development—to discover how this dedicated team was able to create a simple and inexpensive missile. Today, many decades after its invention, the Sidewinder missile is still considered one of the best that America has to offer. In a time of billion-dollar weapons development contracts, astronomical cost overruns, and defense acquisitions scandals, this revealing, highly

readable tale about one of the most successful weapons in history should be of interest to anyone concerned with national security.=

The Cutting Edge Mark A. Lorell,Hugh P. Levauux,United States. Air Force,Project Air Force (U.S.),1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.

Golden Son Pierce Brown,2015-01-06 NEW YORK TIMES BESTSELLER • Red Rising hit the ground running and wasted no time becoming a sensation. Golden Son continues the stunning saga of Darrow, a rebel forged by tragedy, battling to lead his oppressed people to freedom. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR, BUZZFEED, AND BOOKLIST • “Gripping . . . On virtually every level, this is a sequel that hates sequels—a perfect fit for a hero who already defies the tropes. [Grade:] A”—Entertainment Weekly As a Red, Darrow grew up working the mines deep beneath the surface of Mars, enduring backbreaking labor while dreaming of the better future he was building for his descendants. But the Society he faithfully served was built on lies. Darrow’s kind have been betrayed and denied by their elitist masters, the Golds—and their only path to liberation is revolution. And so Darrow sacrifices himself in the name of the greater good for which Eo, his true love and inspiration, laid down her own life. He becomes a Gold, infiltrating their privileged realm so that he can destroy it from within. A lamb among wolves in a cruel world, Darrow finds friendship, respect, and even love—but also the wrath of powerful rivals. To wage and win the war that will change humankind’s destiny, Darrow must confront the treachery arrayed against him, overcome his all-too-human desire for retribution—and strive not for violent revolt but a hopeful rebirth. Though the road ahead is fraught with danger and deceit, Darrow must choose to follow Eo’s principles of love and justice to free his people. He must live for more. Praise for Golden Son “Stirring . . . Comparisons to The Hunger Games and Game of Thrones series are inevitable, for this tale has elements of both.”—Kirkus Reviews “Brown writes layered, flawed characters . . . but plot is his most breathtaking strength. . . . Every action seems to flow into the next.”—NPR Don’t miss any of Pierce Brown’s Red Rising Saga: RED RISING • GOLDEN SON • MORNING STAR • IRON GOLD • DARK AGE • LIGHT BRINGER

Invisible Romans Robert C. Knapp,2011 Robert Knapp brings invisible inhabitants of Rome and its vast empire to life. He seeks out the ordinary men, housewives, prostitutes, freedmen, slaves, soldiers, and gladiators, who formed the fabric of everyday life in the ancient Roman world, and the outlaws and pirates who lay beyond it. He finds their own words preserved in literature, letters, inscriptions and graffiti and their traces in the nooks and crannies of the histories, treatises, plays and poetry created by members of the elite. He tracks down and pieces together these and other tell-tale bits of evidence cast off by the visible mass of Roman history and culture, and in doing so recreates a world lost from view for two millennia. We see how everyday Romans sought to survive and thrive under the afflictions of disease, war, and violence, and to control their fates before powers that variously oppressed and ignored them. Chapters on each of the main groups reveal how their worlds were linked in need, dependence, exploitation, hope and fear. Slaves and ex-soldiers merge into the world of the outlaw; slaves become freedmen; the sons of freedmen enlist as soldiers;

and the concerns of women transcend every boundary. We see them all at last in the tumult of a great empire that shaped their worlds as it reshaped the wider world around them.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.
