The Old Yellow House Joyce Wright, 2018-11-11 Tyro, Mississippi. Once a thriving community, but like most rural towns go, it dwindled to just close neighbors and a few churches. The oldest house there had fallen into ruin. The man who farmed upon the land had passed. The heirs came together to sell the property. A young family saw an opportunity to homestead in this quiet, loving area. Everyone was so welcoming. But since the house was in shambles, it took close to a year, just to get it livable. After moving into the house, they decided to cheer it up by painting it yellow and trimming it in white. Upon a hill it sat fairly close to the main road leading through Tyro. Little did the young couple know that they were not the only ones to occupy the house. Unseen and seen forces began to plague them and their visitors. This truer than life story discloses events that at times stretches the imagination from believing to speculation.

Underground Escape Masanobu Tsuji, 1952 A former Japanese officer's account of his experience as a fugitive in the years following World War II. Tsuji was an ardent Japanese nationalist and opponent of the U.S. He had planned the successful Japanese invasion of Malaya as well as the later campaign against Guadalcanal. After the Japanese defeat, he went into hiding in Thailand, assuming the guise of a Buddhist monk. From there he made his way to China, where he was aided by the Chinese Nationalists and considered an intelligence asset. He remained in China from 1945-1948, during which time some of his colleagues were tried and executed at the Tokyo War Crimes Tribunal. He returned to Japan in 1949 and wrote about his war experiences. He was elected to the Diet in 1952 and re-elected twice. In 1961 he went missing in Laos and was declared dead in 1968.

The Honorable Picnic Thomas Raucat,1927 Occidental in Japan arranges picnic with a girl. A Japanese merchant acts as their chaperone.

President Roosevelt and the Coming of the War, 1941 Charles Beard,2017-09-29 Conceived by Charles Beard as a sequel to his provocative study of American Foreign Policy in the Making, 1932-1940, President Roosevelt and the Coming of the War outraged a nation, permanently damaging Beard's status as America's most influential historian. Beard's main argument is that both Democratic and Republican leaders, but Roosevelt above all, worked quietly in 1940 and 1941 to insinuate the United States into the Second World War. Basing his work on available congressional records and administrative reports, Beard concludes that FDR's image as a neutral, peace-loving leader was a smokescreen, behind which he planned for war against Germany and Japan even well before the attack on Pearl Harbor. Beard contends that the distinction between aiding allies in Europe like Great Britain and maintaining strict neutrality with respect to nations like Germany and Japan was untenable. Beard does not argue that all nations were alike, or that some did and others did not merit American support, but rather that Roosevelt chose to aid Great Britain secretly and unconstitutionally rather than making the case to the American public. President Roosevelt shifted from a policy of neutrality to one of armed intervention, but he did so without surrendering the appearance, the fiction of neutrality. This core argument makes the work no less explosive in 2003 than it was when first issued in 1948.

War and National Reinvention Frederick R. Dickinson,1999 For Japan, as one of the victorious allies, World War I meant territorial gains in China and the Pacific. At the end of

the war, however, Japan discovered that in modeling itself on imperial Germany since the nineteenth century, it had perhaps been imitating the wrong national example. Japanese policy debates during World War I, particularly the clash between proponents of greater democratization and those who argued for military expansion, thus became part of the ongoing discussion of national identity among Japanese elites. This study links two sets of concerns--the focus of recent studies of the nation on language, culture, education, and race; and the emphasis of diplomatic history on international developments--to show how political, diplomatic, and cultural concerns work together to shape national identity.

Threshold of War Waldo Heinrichs, 1990-03-01 As the first comprehensive treatment of the American entry into World War II to appear in over thirty-five years, Waldo Heinrichs' volume places American policy in a global context, covering both the European and Asian diplomatic and military scenes, with Roosevelt at the center. Telling a tale of ever-broadening conflict, this vivid narrative weaves back and forth from the battlefields in the Soviet Union, to the intense policy debates within Roosevelt's administration, to the sinking of the battleship Bismarck, to the precarious and delicate negotiations with Japan. Refuting the popular portrayal of Roosevelt as a vacillating, impulsive man who displayed no organizational skills in his decision-making during this period, Heinrichs presents him as a leader who acted with extreme caution and deliberation, who always kept his options open, and who, once Hitler's invasion of the Soviet Union stalled in July, 1941, acted rapidly and with great determination. This masterful account of a key moment in American history captures the tension faced by Roosevelt, Churchill, Stimson, Hull, and numerous

others as they struggled to shape American policy in the climactic nine months before Pearl Harbor.

Knowing One's Enemies Ernest R. May, 2014-07-14 In essays that illuminate not only the recent past but shortcomings in today's intelligence assessments, sixteen experts show how prospective antagonists appraised each other prior to the World Wars. This cautionary tale, warns that intelligence agencies can do certain things very well-but other things poorly, if at all. Originally published in 1985. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Origins of the Second World War in Asia and the Pacific Akira Iriye, 2014-06-06 Professor Iriye analyses the origins of the 1941 conflict against the background of international relations in the preceding decade in order to answer the key question: Why did Japan decide to go to war against so formidable a combination of powers?

Composite Solutions for Ballistics Yasir Nawab, S.M. Sapuan, Khubab Shaker, 2021-08-05 Academic researchers who are working on the development of composite materials for ballistic protection need a deeper understanding on the theory of material behavior during ballistic impact. Those working in industry also need to select proper composite constituents, to achieve their desired characteristics to make functional products. **Composite Solutions for Ballistics** covers the different aspects of ballistic protection, its different levels and the materials and structures used for this purpose. The emphasis in the book is on the application and use of composite materials for ballistic protection. The chapters provide detailed information on the various types of impact events and the complexity of materials to respond to those events. The characteristics of ballistic composites and modelling and simulation results will enable the reader to better understand impact mechanisms according to the theory of dynamic material behavior. A complete description of testing conditions is also given that includes sensors and high-speed devices to monitor ballistic events. The book includes detailed approaches and schemes that can be implemented in academic research into solutions for ballistic protection in both theoretical and experimental fields, to find solutions for existing and next generation threats. The book will be an essential reference resource for materials

scientists and engineers, and academic and industrial researchers working in composite materials and textiles for ballistic protection, as well as postgraduate students on materials science, textiles and mechanical engineering courses. Discusses the fundamentals of impact response mechanisms and related solutions covering advantages and disadvantages for both existing and next generation applications Includes various methods for evaluation of ballistic constituents according to economic and environmental criteria, types of green ballistics are considered to enhance sustainable production of applications as well as hybrid composites from natural wastes Discusses selection methodologies for ballistic applications and detailed information on the use of textiles for reinforcement fabrication

Strategy and Command Louis Morton, 2015-07-11 For the United States, full involvement in World War II began and ended in the Pacific Ocean. Although the accepted grand strategy of the war was the defeat of Germany first, the sweep of Japanese victory in the weeks and months after Pearl Harbor impelled the United States to move as rapidly as it could to stem the enemy tide of conquest in the Pacific. Shocked as they were by the initial attack, the American people were also united in their determination to defeat Japan, and the Pacific war became peculiarly their own affair. In this great theater it was the United States that ran the war, and had the determining voice in answering questions of strategy and command as they arose. The natural environment made the prosecution of war in the Pacific of necessity an interservice effort, and any real account of it must, as this work does, take into full account the views and actions of the Navy as well as those of the Army and its Air Forces. These are the factors-a predominantly American theater of

war covering nearly one-third the globe, and a joint conduct of war by land, sea, and air on the largest scale in American history-that make this volume on the Pacific war of particular significance today. It is the capstone of the eleven volumes published or being published in the Army's World War II series that deal with military operations in the Pacific area, and it is one that should command wide attention from the thoughtful public as well as the military reader in these days of global tension.

Pearl Harbor Revisited Robert William Love,1995 In one stroke, the Japanese attack on Pearl Harbour brought together the war in Europe between Britain and Russia on the one hand, and Germany on the other, with the ongoing conflict between Japan and China, turning it into the global struggle between two great coalitions we know as World War II. By bringing America into the war, Japan assured not only the destruction of her Asian empire, but also the end of American isolationism, the survival of Soviet communism and the ultimate bankruptcy of the great European colonial systems.

FDR and the US Navy Edward J. Marolda,1998-08-14 Franklin Delano Roosevelt had a lifelong love for the United States Navy. Inspired as a youth by the US Fleet's dramatic impact on the global stage, and its use overseas by his illustrious cousin, Theodore Roosevelt, Franklin quite naturally focused his eyes on the sea. FDR and the US Navy presents the work of prominent biographers and historians who analyzed Franklin D. Roosevelt's long, close, and eventful association with the United States Navy, in war and peace, from the turn of the century to the end of World War II. The contributors show how as President during the 1930s, FDR endeavoured with naval leaders, not always

successfully, to build a combat-capable fleet and to deter the aggressor nations of Europe and Asia. The essays argue that one of Franklin Roosevelt's greatest achievements was his direction as Commander in Chief of the US Navy and the other American armed forces during World War II, when the very survival of the nation was at stake. This book is the product of a day-long conference, entitled 'Franklin D. Roosevelt and the US Navy' that was held on October 22, 1996 at the US Navy Memorial Foundation's Heritage Center on Pennsylvania Avenue in Washington, DC. It is both a powerful tribute and an important historical work on FDR.

A History of War at Sea Helmut Pemsel, 1977 This book presents a thorough chronology and atlas of naval warfare from the Age of Galleys to The Nuclear Age.

Back Door to War Charles Callan Tansill, 2023-05-22 Using a vast array of official documents secured at the highest levels of the US Government, official US Senate historian and history professor Charles Tansill delves deep into the origins of American involvement in the Second World War, and comes to a startling conclusion: that, despite public pronouncements to the contrary, the Franklin Delano Roosevelt Administration actively sought to participate in that conflict. To that end, Professor Tansill shows, US diplomacy in the 1930s was focussed exclusively on forcing first the Japanese Empire into firing the first shot, and in Europe, helping Britain to generate a war fever through solemn undertakings of support (such as those made to Poland) which, the author shows, the US Administration was well aware had no hope whatsoever of being fulfilled. Thus, the author

shows, that the Roosevelt Administration sought to provoke Japan into an attack on American territory, knowing that such an even would inevitably involve Japan's Axis allies, and in this way, America would enter the war through the back door.
