**Creating Value Through Corporate Restructuring** Stuart C. Gilson, 2010-04-05 An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to classic buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, vulture investing, equity spin-offs, asset divestitures, and much more Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should pull the trigger From hedge funds to financial fraud to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever.

**Dreamspy** Jacqueline Lichtenberg, 2013-02-13 In THOSE OF MY BLOOD, humans exploring a galactic spacecraft that had crashed on Earth's moon wakened an alien, a luren, who desperately tried to prevent the contamination of human culture with galactic technology--by lying to Earth's vampires. DREAMSPY reveals the truth behind those lies, presenting the story of Elias, a musician kidnapped from Earth into a tangle of galactic espionage, amidst a galactic war over the destruction of the fabric of space. When Kyllikki, a powerful telepath, rescues Elias from his captors amidst a space battle, they must run for their lives across enemy territory aided by Zuchmul, a distant relative of the luren who'd died on the Earth's moon. Can Elias admit his love for a woman who could enslave his soul--even if the fate of Earth depends on it? Another marvelous tale of intrigue, romance, and magic set in the Earth's future!

**Water+Ink Coloring Book Winter 2020** Kim Winberry, 2019-07-22 I begin my paintings with a sketch and application of colorful/bright pigment and water to the paper. I disrupt the blends with salt or water, watching as one color blossoms in water, as another color starts to travel across the paper. I utilize India Ink to demarcate changes, also adding swirls other artifacts, in the aim to achieve whimsy. My coloring books are my paintings! I run the paintings through filters and drop the color from them, leaving the lines so that you can add your own color. But wait, there's more... I've added an Augmented Reality component to this. Wonder what colors I used for that piece in the corner there? Take out your phone, download the Zappar app from your app store and zap the code. What happens? At the very least an image of the original painting will pop up and you can see what it looks like, side by side with the coloring page. Beyond that, you'll meet Mist, my liaison to the AR world. She will be a recurring character in all my AR work. Stay tuned and enjoy.

*Introductory Grammar of Amharic* Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

**This Book Is a Camera** Kelli Anderson, 2015-11-20 This is a working camera that pops up from the pages of a book..The book concisely explains--and actively demonstrates--how a structure as humble as a folded piece of paper can tap into the intrinsic properties of light to produce a photograph.The book includes:- a piece of paper folded into a working 4x5 camera- a lightproof bag- 5 sheets of photo-paper film- development instructions (from complete DIY to outsource it)- a foil-stamped cover- a satisfying demonstration of the connection between design & science / structures & functions

**Superperformance Stocks** Richard S. Love, 2022-05-27 The Author writes about the superperformance stocks of the time, and the common denominators of those stocks. What traits do they have in common, how to find them? Definition of a superperformance stock: One that at least tripled in price and increased at a minimum rate of three times during a two-year period. A move was considered ended if the price failed to reach a new high in less than six months, or if there was a price reaction of 25 percent or more. Stocks that have a chance to become superperformance stocks share some of these characteristics: \* Large increases of earnings, especially if the large increase comes as a surprise. \* Mergers and acquisitions. \* New management. \* New products. The best results come after the market has experienced a severe correction or a bear market, because that is the time when there would be many bargain opportunities in that environment. History often repeats itself in the stock market. The names of the stocks change, but the overall situation is always similar. Acceleration of earning power is the most important thing to look for when examining the potential of a stock to become a superperformance stock. And the superperformance move will most often coincide with the bull market cycle of the general market.

**The Works of John Greenleaf Whittier, Volume VI. (of VII)** John Greenleaf Whittier, 2014-01-25 Wouldst see A man I' the clouds, and hear him speak to thee? Who has not read Pilgrim's Progress? Who has not, in childhood, followed the wandering Christian on his way to the Celestial City? Who has not laid at night his young head on the pillow, to paint on the walls of darkness pictures of the Wicket Gate and the Archers, the Hill of Difficulty, the Lions and Giants, Doubting Castle and Vanity Fair, the sunny Delectable Mountains and the Shepherds, the Black River and the wonderful glory beyond it; and at last fallen asleep, to dream over the strange story, to hear the sweet welcomes of the sisters at the House Beautiful, and the song of birds from the window of that upper chamber which opened towards the sunrising? And who, looking back to the green spots in his childish experiences, does not bless the good Tinker of Elstow?

**The Forever Now** Laura J. Hoptman, 2014 Timeless Painting presents the work of 17 contemporary painters whose works reflect a singular approach that is peculiarly of our time: they are a-temporal, a term coined by William Gibson and Bruce Sterling, the originators of the cyberpunk aesthetic. A-temporality or timelessness manifests itself in painting as an ahistoric free-for-all, where contemporaneity as an indicator of new form is nowhere to be found, and all eras co-exist. Published to accompany an exhibition at The Museum of Modern Art that explores the impact of this cultural condition on contemporary painting, this publication features work by an international roster of artists including Joe Bradley, Kerstin Brätsch, Matt Connors, Nicole Eisenman, Mark Grotjahn, Charline von Heyl, Julie Mehretu, Oscar Murillo, Laura Owens and Josh Smith, among others. An overview essay by curator Laura Hoptman is divided into thematic chapters that explore topics such as re-animation and reenactment, recontextualization, 'Zombie' painting, and the concomitant 'Frankenstein approach', which describes a process of stitching together pieces of the history of painting to create a work of art that would be dead but for its juxtaposed parts, all working in association with one another to propel the work into life.

**Philip's Planisphere (Latitude 51. 5 North)**, 2012-01-06 Invaluable for both beginners and advanced observers, Philip's Planisphere (Latitude 51.5 North) is a practical hour-by-hour tracker of the stars and constellations, designed for use anywhere in Britain and Ireland, Northern Europe, Northern USA and Canada. Turn the oval panel to the required date and time to reveal the whole sky visible from your location. The map, by the well-known celestial cartographer Wil Tirion, shows stars down to magnitude 5, plus several deep-sky objects, such as the Pleiades, the Andromeda Galaxy (M31) and the Orion Nebula (M42). Because the planets move round the Sun, their positions in the sky are constantly changing and they cannot be marked permanently on the map; however, the back of the planisphere has tables giving the positions of Venus, Mars, Jupiter and Saturn for every month until 2020. The planisphere is supplied in a full-colour wallet that contains illustrated step-by-step instructions for how to use the planisphere, how to locate planets, and how to work out the time of sunrise or sunset for any day of the year. It explains all the details that can be seen on the map - the magnitudes of stars, the ecliptic and the celestial coordinates. In addition, the section 'Exploring the skies, season by season' introduces the novice astronomer to the principal celestial objects visible at different times of the year. Major constellations are used as signposts to navigate the night sky, locating hard-to-find stars and some fascinating deep-sky objects. The movement of the stars is also explained.

**Critical Fabulations** Daniela K Rosner, 2020-12-29 A proposal to redefine design in a way that not only challenges the field's dominant paradigms but also changes the practice of design itself. In Critical Fabulations, Daniela Rosner proposes redefining design as investigative and activist, personal and culturally situated, responsive and responsible. Challenging the field's dominant paradigms and reinterpreting its history, Rosner wants to change the way we historicize the practice, reworking it from the inside. Focusing on the development of computational systems, she takes on powerful narratives of innovation and technology shaped by the professional expertise that has become integral to the field's mounting status within the new industrial economy. To do so, she intervenes in legacies of design, expanding what is considered design to include long-silenced narratives of practice, and enhancing existing design methodologies based on these rediscovered inheritances. Drawing on discourses of feminist technoscience, she examines craftwork's contributions to computing innovation--how craftwork becomes hardware manufacturing, and how hardware manufacturing becomes craftwork.
