Renaissance Fun Philip Steadman, 2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was 'artificial music', three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we visit the lost 'garden of marvels' at Pratolino with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi – one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argument, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making – much less well known, then and now – describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.

The Intellectual Education of the Italian Renaissance Artist Angela Dressen, 2021-09-02 Scholars have traditionally viewed the Italian Renaissance artist as a gifted, but poorly educated craftsman whose complex and demanding works were created with the assistance of a more educated advisor. These assumptions are, in part, based on research that has focused primarily on the artist's social rank and workshop training. In this volume, Angela Dressen explores the range of educational opportunities that were available to the Italian Renaissance artist. Considering artistic formation within the history of education, Dressen focuses on the training of highly skilled, average artists, revealing a general level of learning that was much more substantial than has been assumed. She emphasizes the role of mediators who had a particular interest in augmenting artists' knowledge, and highlights how artists used Latin and vernacular texts to gain additional knowledge that they avidly sought. Dressen's volume brings new insights into a topic at the intersection of early modern intellectual, educational, and art history.

Botticelli Past and Present Ana DeBenedetti, Caroline Elam, 2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. Botticelli Past and Present engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

European Drawings 2 George R. Goldner, Lee Hendrix, Kelly Pask, 1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

The Imagined Immigrant Ilaria Serra, 2009 Using original sources--such as newspaper articles, silent movies, letters, autobiographies, and interviews--Ilaria Serra depicts a large tapestry of images that accompanied mass Italian migration to the U.S. at the turn of the twentieth century. She chooses to translate the Italian concept of *immaginario* with the Latin *imago* that felicitously blends the double English translation of the word as imagery and imaginary. *Imago* is a complex knot of collective representations of the immigrant subject, a mental production that finds concrete expression; impalpable, yet real. The imagined immigrant walks alongside the real one in flesh and rags.

Encyclopedia of Ancient and Forbidden Secrets Robert Nye, 2019-09-04 Encyclopedia of Ancient and Forbidden Secrets colorings, the S.S. has its own rites, festivals, rituals and burial customs. The spiritual center of the S.S. - dedicated entirely to the development of these and other public rituals, is the Ancestral Heritage Office. Reichsfuhrer S.S., Himmler, is an avid student of the occult. An SS occult research department, the Ahnenerbe (Ancestral Heritage) was established in 1935 with SS Colonel Wolfram von Sievers at its head. Occult research took SS researchers as far afield as Tibet. As soon as the Nazi movement had sufficient funds, it began to organize a number of expeditions to Tibet and these succeeded one another practically without interruption through the present day. It is conjectured that the Nazis wish to find Shambala, an ancient center of power which is said to be accessible through hidden tunnels in Tibet. The strongest influence on Hitler in this regard was Dietrich Eckart (1868-1923). Most biographers have underestimated the influence that Eckart exerted on Hitler. He was the wealthy publisher and editor-in-chief of an anti-semitic journal which he called *In Plain German*. Eckart was also a committed occultist and a master of magic. As an initiate, Eckart belonged to the inner circle of the Thule Society as well as other esoteric orders. There can be no doubt that Eckart - who had been alerted to Hitler by other Thulists - trained Hitler in techniques of self confidence, self projection, persuasive oratory, body language and discursive sophistry. With these tools, in a short period of time he was able to move the obscure workers party from the club and beer hall atmosphere to a mass movement. The emotion charged lay speaker became an expert orator, capable of mesmerizing a vast audience.

United States Code United States, 2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926,

the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

Arab Paper Joseph von Karabacek, 2001 Bibliophiles in Europe at the end of the nineteenth century began to take a serious interest in the manuscripts of the Middle East and the paper on which they were written. Perhaps the most important of these men were C.-M. Briquet working in Geneva, and J. Wiesner and J. von Karabacek working in Vienna. All three were concerned with the burning topic of the moment: Was oriental paper made of cotton? Within the space of two years these three writers published seminal articles for the European study of Arab paper. *Das Arabische Papier* is one of those articles. The late Don Baker's inspiration to set about the translation and interpretation of this work was 'simply the desire to know the contents of this much quoted article'. Students, historians, curators, collectors, conservators and all those interested in the historical development and spread of papermaking will realise why Don Baker wished to make this important text available to English readers. This Archetype edition is a revised edition of the volume, which Don Baker produced in 1991.

The Order Has Been Carried Out Alessandro Portelli, 2016-06-01 On March 24, 1944, Nazi occupation forces in Rome killed 335 unarmed civilians in retaliation for a partisan attack the day before. Portelli has crafted an eloquent, multi-voiced oral history of the massacre, of its background and its aftermath. The moving stories of the victims, the women and children who survived and carried on, the partisans who fought the Nazis, and the common people who lived through the tragedies of the war together paint a many-hued portrait of one of the world's most richly historical cities. *The Order Has Been Carried Out* powerfully relates the struggles for freedom under Fascism and Nazism, the battles for memory in post-war democracy, and the meanings of death and grief in modern society.
