The book's primary goal is to draw the attention of readers to the absolute importance of light and how to make the best use of it, with an emphasis on being in the right place at the right time, anticipating fine light and ensuring that for the short duration that those qualities are present, they are successfully recorded to film or pixel. However, composition and technical expertise are also vitally important and Ian outlines the best field techniques for choosing the correct exposure, discusses depth of field, hyper-focal focusing, exposure bracketing and the use of appropriate filters.

The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. Adams is a clear-thinking writer whose concepts cannot but help the serious photographer. - New York Times A master-class kind of guide from an undisputed master. - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. **Beyond Memory** Diane Neumaier,2004 Photography possesses a powerful ability to bear witness, aid remembrance, shape, and even alter recollection. In *Beyond Memory: Soviet Nonconformist Photography and Photo-Related Works of Art*, the general editor, Diane Neumaier, and twenty-three contributors offer a rigorous examination of the medium's role in late Soviet unofficial art. Focusing on the period between the mid-1950s and the late 1980s, they explore artists' unusually inventive and resourceful uses of photography within a highly developed Soviet dissident culture. During this time, lack of high-quality photographic materials, complimented by tremendous creative impulses, prompted artists to explore experimental photo-processes such as camera and darkroom manipulations, photomontage, and hand-coloring. Photography also took on a provocative array of forms including photo installation, artist-made samizdat (self-published) books, photo-realist painting, and many other surprising applications of the flexible medium. *Beyond Memory* shows how innovative conceptual moves and approaches to form and content--echoes of Soviet society's coded communication and a Russian sense of absurdity--were common in the Soviet cultural underground. Collectively, the works in this anthology demonstrate how late-Soviet artists employed irony and invention to make positive use of difficult circumstances. In the process, the volume illuminates the multiple characters of photography itself and highlights the leading role that the medium has come to play in the international art world today. *Beyond Memory* stands on its own as a rigorous examination of photography's place in late Soviet unofficial art, while also serving as a supplement to the traveling exhibition of the same title.

*Uncommon Places* Stephen Shore,2015 Originally published in 1982, Stephen Shore's legendary *Uncommon Places* has influenced more than a generation of photographers. Shore was among the first artists to take color beyond the domain of advertising and fashion photography, and his large-format color work on the American vernacular landscape stands at the root of what has become a vital photographic tradition over the past forty years. *Uncommon Places: The Complete Works*, published by Aperture in 2004, presents a definitive collection of the landmark series, and in the span of a decade, has become a contemporary classic. Now, for this lushly produced reissue, the artist has added twenty rediscovered images and a statement explaining what it means to expand a series now many decades old. Like Robert Frank and Walker Evans before him, Shore discovered a hitherto unarticulated vision of America via highway and camera. Approaching his subjects with cool objectivity, Shore in these images retains precise internal systems of gestures in composition and light, through which a parking lot emptied of people, a hotel bedroom, or a building on a side

street assumes both an archetypal aura and an ambiguously personal importance. In contrast to his signature landscapes with which *Uncommon Places* is often associated, this expanded survey reveals equally remarkable collections of interiors and portraits. -- Publisher's description.

*Building and Using Binoscopes* Norman Butler,2014-10-25 Provides easy to understand information and guidelines about the design and construction of binoscopes Focusing on both homemade and commercial products, this book provides the reader with simple and straightforward information about the modelling and building of binoscopes. Binoscopes can be thought of as binoculars enlarged to the size of telescopes: essentially, a combination of the two. Constructing a binoscope is easier than most people think, but it still demands attention to detail and proper background knowledge. The author goes on to provide additional information about how to understand the products currently on the market, should the reader choose to purchase a binoscope instead of building one. Lastly, the book also compares binoscopes with telescopes in great detail, outlining the differences the reader can expect to see in the night sky from using both. The celestial views obtained with a binoscope, compared to a single telescope of the same aperture, are a very different experience and well worth the effort.

*Good Pictures* Kim Beil,2020-06-23 A picture-rich field guide to American photography, from daguerreotype to digital. We are all photographers now, with camera phones in hand and social media accounts at the ready. And we know which pictures we like. But what makes a good picture? And how could anyone think those old styles were actually good? Soft-focus yearbook photos from the '80s are now hopelessly—and happily—outdated, as are the low-angle portraits fashionable in the 1940s or the blank stares of the 1840s. From portraits to products, landscapes to food pics, *Good Pictures* proves that the history of photography is a history of changing styles. In a series of short, engaging essays, Kim Beil uncovers the origins of fifty photographic trends and investigates their original appeal, their decline, and sometimes their reuse by later generations of photographers. Drawing on a wealth of visual material, from vintage how-to manuals to magazine articles for working photographers, this full-color book illustrates the evolution of trends with hundreds of pictures made by amateurs, artists, and commercial photographers alike. Whether for selfies or sepia tones, the rules for good pictures are always shifting, reflecting new ways of thinking about ourselves and our place in the visual world.

**Euphemism & Dysphemism** Keith Allan,Kate Burridge,1991 *Euphemism and Dysphemism* In this fascinating study, Keith Allan and Kate Burridge examine the linguistic, social, and psychological aspects of this intriguing universal practice.

**Mountain Ranch** Michael Crouser,2017-05-02 The ranches where Michael Crouser so affectionately captures these scenes tell a story of staying power, of joy in the beauty of the world, of gratitude for the working animals—the dogs and the horses—of midwifery and husbandry, of seeing the seasons through. . . . It is a pleasure to be brought into this out-of-the-way part of the world with such understated passion. —Gretel Ehrlich, from the introduction The mountain ranches of western Colorado preserve a way of life that has nearly vanished from the American scene. Families who have lived on the same land for five or six generations raise cattle much as their ancestors did, following an annual cycle of breeding, birthing, branding, grazing, and selling livestock. Michael Crouser spent more than a decade (2006–2016) photographing family cattle ranches in Colorado, intrigued not by the ways their lives are changing but by the way they have stayed the same. He was, he says, most interested in the traditional elements of these traditional lives, . . . what they call 'cowboying.' Intimate without being sentimental about the realities of ranch work, *Mountain Ranch's* duotone images capture the raw and basic elements of a hard and basic life. In the afterword, Crouser pays verbal tribute to ranch people who are the real deal, whose seasonal round of work forms the subject of the acclaimed nature writer Gretel Ehrlich's foreword. Portraits of eight men and women who eloquently describe their long lives on Colorado mountain ranches complete the volume. The ever-increasing commercial and residential development of traditional ranch land and the economic difficulties facing a new generation of ranchers threaten the future of cattle ranching in the mountains of Colorado. *Mountain Ranch* powerfully records the last vestiges of a tradition that exerts a nearly universal fascination and

mystique—cowboying in the American West.

*Portrait of Myself* Margaret Bourke-White, 2016-08-09 This is the story of the internationally acclaimed American woman Margaret Bourke-White, who for over thirty years made photographic history: as the first photographer to see the artistic and storytelling possibilities in American industry, as the first to write social criticism with a lens, and as the most distinguished and venturesome foreign correspondent-with-a-camera to report wars, politics and social and political revolution on three continents. In this poignant autobiography, Bourke-White details her fight against Parkinson's disease, and recounts tales of her struggles to master her art and craft, of photographing Stalin, Gandhi and many other notables, of being torpedoed off North Africa while reporting World War II, of flying combat missions, of photographing the dread murder camps of Nazi Germany, of touring Tobacco Road to produce the book *You Have Seen Their Faces* with Erskine Caldwell (whom she later married), of adventures—and wonderful picture-taking—in the mines of South Africa, in the frozen North, in war-torn Korea. Illustrated throughout with over 70 of Margaret Bourke-White's fine photographs, this is the great life story of a great American, greatly yet modestly told.

**Grammar of the Film Language** Daniel Arijon, 1991 A unique guide to the visual narrative techniques that form the language of filmmaking. This language is basic to the very positioning and moving of players and cameras, as well as the sequencing and pacing of images. It does not date as new technologies alter the means of capturing images on film and tape. The guidelines offered here will inform almost every choice that the director, the cinematographer, and the editor will make. Through lucid text and more than 1,500 illustrations, Arijon presents visual narrative formulas that will enlighten anyone involved in the motion picture and television industry (including producers, writers, and animators).--From publisher description.

Activist Science and Technology Education Larry Bencze, Steve Alsop, 2014-06-05 This collection examines issues of agency, power, politics and identity as they relate to science and technology and education, within contemporary settings. Social, economic and ecological critique and reform are examined by numerous contributing authors, from a range of international contexts. These chapters examine pressing pedagogical questions within socio-scientific contexts, including petroleum economies, food justice, health, environmentalism, climate change, social media and biotechnologies. Readers will discover far reaching inquiries into activism as an open question for science and technology education, citizenship and democracy. The authors call on the work of prominent scholars throughout the ages, including Bourdieu, Foucault, Giroux, Jasanoff, Kierkegaard, Marx, Nietzsche, Rancière and Žižek. The application of critical theoretical scholarship to mainstream practices in science and technology education

distinguishes this book, and this deep, theoretical treatment is complemented by many grounded, more pragmatic exemplars of activist pedagogies. Practical examples are set within the public sphere, within selected new social movements, and also within more formal institutional settings, including elementary and secondary schools, and higher education. These assembled discussions provide a basis for a more radically reflexive reworking of science and technology education. Educational policy makers, science education scholars, and science and technology educators, amongst others, will find this work thought-provoking, instructive and informative.

*Rolleiflex Guide* Walter Daniel Emanuel, 1951

From Third World to First Lee Kuan Yew, 2011-02-08 Few gave tiny Singapore much chance of survival when it was granted independence in 1965. How is it, then, that today the former British colonial trading post is a thriving Asian metropolis with not only the world's number one airline, best airport, and busiest port of trade, but also the world's fourth-highest per capita real income? The story of that transformation is told here by Singapore's charismatic, controversial founding father, Lee Kuan Yew. Rising from a legacy of divisive colonialism, the devastation of the Second World War, and general poverty and disorder following the withdrawal of foreign forces, Singapore now is hailed as a city of the future. This miraculous history is dramatically recounted by the man who not only lived through it all but who fearlessly forged ahead and brought about most of these changes. Delving deep into his own meticulous notes, as well as previously unpublished government papers and official records, Lee details the extraordinary efforts it took for an island city-state in Southeast Asia to survive at that time. Lee explains how he and his cabinet colleagues finished off the communist threat to the fledgling state's security and began the arduous process of nation building: forging basic infrastructural roads through a land that still consisted primarily of swamps, creating an army from a hitherto racially and ideologically divided population, stamping out the last vestiges of colonial-era corruption, providing mass public housing, and establishing a national airline and airport. In this illuminating account, Lee writes frankly about his trenchant approach to political opponents and his often unorthodox views on human rights, democracy, and inherited intelligence, aiming always to be correct, not politically correct. Nothing in Singapore escaped his watchful eye: whether choosing shrubs for the greening of the country, restoring the romance of the historic Raffles Hotel, or openly, unabashedly persuading young men to marry women as well educated as themselves. Today's safe, tidy Singapore bears Lee's unmistakable stamp, for which he is unapologetic: If this is a nanny state, I am proud to have fostered one. Though Lee's domestic canvas in Singapore was small, his vigor and talent assured him a larger place in world affairs. With inimitable style, he brings history to life with cogent analyses of some of the greatest strategic issues of recent times and reveals how, over the years, he navigated the shifting tides of relations among America, China, and Taiwan, acting as confidant, sounding board, and messenger for them. He also includes candid, sometimes acerbic pen portraits of his political peers, including the indomitable Margaret Thatcher and Ronald Reagan, the poetry-spouting Jiang Zemin, and ideologues George Bush and Deng Xiaoping. Lee also lifts the veil on his family life and writes tenderly of his wife and stalwart partner, Kwa Geok Choo, and of their pride in their three children -- particularly the eldest son, Hsien Loong, who is now Singapore's deputy prime minister. For more than three decades, Lee Kuan Yew has been praised and vilified in equal measure, and he has established himself as a force impossible to ignore in Asian and international politics. From Third World to First offers readers a compelling glimpse into this visionary's heart, soul, and mind.

On Photographs David Company, 2020 An intimate meditation on photography for the ages, curated around 120 epochal photographs. In On Photographs, curator and writer David Company presents an exploration of photography in 120 photographs. Proceeding not by chronology or genre or photographer, Company's eclectic selection unfolds according to its own logic. We see work by Henri Cartier-Bresson, William Eggleston, Helen Levitt, Garry Winogrand, Yves Louise Lawler, Andreas Gursky, and Rineke Dijkstra. There is fashion photography by William Klein, one of Vivian

Maier's contact sheets, and a carefully staged scene by Gregory Crewdson, as well as images culled from magazines and advertisements. Each of the 120 photographs is accompanied by Company's lucid and incisive commentary.
