**Greece in the Twentieth Century** Fotini Bellou, Theodore A. Couloumbis, Theodore C.

Kariotis, 2013-01-11 This collective study examines the transformation (metamorphosis) that Greece has experienced over the course of the 20th century by exploring its gradual evolution into a consolidated democracy, an advanced economy in the Eurozone and a balanced partner in the EU and NATO promoting a stabilizing role in southeastern Europe. The book examines the variables contributing to the profiling of contemporary Greece, emphasizing the conceptual inertia bedevilling the studies of Greece in recent years by focusing on the elements that indicated the slow pace in the country's modernization. In conclusion, there is a need for Greece's constant commitment to functional adjustments regarding the country's economic, political and strategic priorities in order to promote effectively the role of regional stabilizer acting in concert with NATO and EU partners.

**Ship Design** Apostolos Papanikolaou, 2014-09-16 This book deals with ship design and in particular with methodologies of the preliminary design of ships. The book is complemented by a basic bibliography and five appendices with useful updated charts for the selection of the main dimensions and other basic characteristics of different types of ships (Appendix A), the determination of hull form from the data of systematic hull form series (Appendix B), the detailed description of the relational method for the preliminary estimation of ship weights (Appendix C), a brief review of the historical evolution of shipbuilding science and technology from the prehistoric era to date (Appendix D) and finally a historical review of regulatory developments of ship's damage stability to date (Appendix E). The book can be used as

textbook for ship design courses or as additional reading for university or college students of naval architecture courses and related disciplines; it may also serve as a reference book for naval architects, practicing engineers of related disciplines and ship officers, who like to enter the ship design field systematically or to use practical methodologies for the estimation of ship's main dimensions and of other ship main properties and elements of ship design.

**Rebuilding the Royal Navy** D. K. Brown, George Moore, 2012-07-30 This design history of post-war British warship development, based on both declassified documentation and personal experience, is the fourth and final volume in the author's masterly account of development of Royal Navy's ships from the 1850s to the Falklands War. In this volume the author covers the period in which he himself worked as a Naval Constructor, while this personal knowledge is augmented by George Moore's in-depth archival research on recently declassified material. The RN fleet in 1945 was old and worn out, while new threats and technologies, and post-war austerity called for new solutions. How designers responded to these unprecedented challenges is the central theme of this book. It covers the ambitious plans for the conversion or replacement of the bigger ships; looks at all the new construction, from aircraft carriers, through destroyers and frigates, to submarines (including nuclear and strategic), to minesweepers and small craft. The authors pay particular attention to the innovations introduced, and analyses the impact of the Falklands War. At the start of the twenty-first century the Royal Navy is still a powerful and potent force with new and a number of innovative classes, both surface and sub-surface, coming on stream. This book offers a fascinating insight into how the post-war fleet developed and adapted to the changing role of the Navy.

War in the Balkans Richard C. Hall, 2014-10-09 This authoritative reference follows the history of conflicts in the Balkan Peninsula from the 19th century through the present day. The Balkan Peninsula, which consists of Albania, Bulgaria, Romania, Moldova, and the former Yugoslavia, resides in the southeastern part of the European continent. Its strategic location as well as its long and bloody history of conflict have helped to define the Balkans' role in global affairs. This singular reference focuses on the events, individuals, organizations, and ideas that have made this region an international player and shaped warfare there for hundreds of years. Historian and author Richard C. Hall traces the sociopolitical history of the area, starting with the early internal conflicts as the Balkan states attempted to break away from the Ottoman Empire to the assassination of Archduke Franz Ferdinand that ignited World War I to the Yugoslav Wars that erupted in the 1990s and the subsequent war crimes still being investigated today. Additional coverage focuses on how these countries continue to play an important role in global affairs and international politics.

**Modern Greece** John S. Koliopoulos, Thanos M. Veremis, 2009-10-27 Modern Greece: A History since 1821 is a chronological account of the political, economic, social, and cultural history of Greece, from the birth of the Greek state in 1821 to 2008 by two leading authorities. The Political Economy of NATO Todd Sandler, Keith Hartley, 1999-04-13 Using simple economic methods while accounting for political and institutional factors, this book puts forward a political economy viewpoint of NATO's current status and its future prospects. A host of NATO policy concerns are addressed

including the optimal membership for the alliance, its role in peacekeeping missions worldwide, the appropriate methods for deterring terrorism, and proper procurement practices for the next generation of weapons. Additional topics concern defense burden sharing, arms trade, NATO's institutional structure, and NATO's role vis-a-vis other international organizations. Although the analysis is rigorous, the book is intended for a wide audience drawn from political science and economics.

Navy Frigate (FFG[X]) Program Ronald O'Rourke, 2020-05-06 The FFG(X) program is a Navy program to build a class of 20 guided-missile frigates (FFGs). Congress funded the procurement of the first FFG(X) in FY2020 at a cost of \$1,281.2 million (i.e., about \$1.3 billion). The Navy's proposed FY2021 budget requests \$1,053.1 million (i.e., about \$1.1 billion) for the procurement of the second FFG(X). The Navy estimates that subsequent ships in the class will cost roughly \$940 million each in then-year dollars. On April 30, 2020, the Navy announced that it had awarded the FFG(X) contract to the team led by Fincantieri/Marinette Marine (F/MM) of Marinette, WI. F/MM was awarded a fixed-price incentive (firm target) contract for Detail Design and Construction (DD&C) for up to 10 ships in the program-the lead ship plus nine option ships. Under the DD&C contract awarded to F/MM, Navy has the option of recompeting the FFG(X) program after the lead ship (if none of the nine option ships are exercised), after the 10th ship (if all nine of the option ships are exercised), or somewhere in between (if some but not all of the nine option ships are exercised).

Defence Economics Keith Hartley, 2020-08-20 This Element introduces students, policy-makers, politicians, governments and business-people to this new discipline within economics. It presents the recent

history of the subject and its range of coverage. Traditional topics covered include models of arms races, alliances, procurement and contracting, as well as personnel policies, industrial policies and disarmament. Newer areas covered include terrorism and the economics of war and conflict. A non-technical approach is used and the material will be accessible to both economists and general readers.

Qualitative Researching with Text, Image and Sound Martin W Bauer, George Gaskell, 2000-05-16 'This excellent text will introduce advanced students - and remind senior researchers - of the availability of a broad range of techniques available for the systematic analysis of social data that is not numeric. It makes the key point that neither quantitative nor qualitative methods are interpretive and at the same time demonstrates once and for all that neither a constructivist perspective nor a qualitative approach needs to imply abandonment of rigor. That the chapters are written by different authors makes possible a depth of expertise within each that is unusually strong' - Susanna Hornig Priest, Texas A&M University; Author of 'Doing Media Research' Qualitative Researching with Text, Image and Sound offers a unique resource for today's social researcher. This practical handbook provides a comprehensive and accessible introduction to a broad range of research methods with the objective of clarifying procedures, good practice and public accountability. Following an introduction which discusses quality and quantity, and how these relate to issues of representation and knowledge interests in social research, the book is organized into four parts: · Part I covers different ways of collecting data and different types of data relating to text, image and sound: corpus construction, individual and group interviewing, narrative and episodic interviewing, video and film, and bemetology. · Part II introduces the main analytic approaches for text, image and sound: classical

content analysis, argumentation, discourse, conversation analysis, rhetoric, semiotics, analysis of moving images, and of noise and music - each includes an introduction with examples and step-by-step advice on how to do it. · Part III covers computer-assisted analysis - including computer-assisted qualitative data analysis and key-word-in-context analysis. · Part IV addresses issues of good practice, looking at problems and fallacies in interpretation and develops quality criteria for qualitative research. This book provides researchers with the skills and knowledge to make the appropriate choices between different methods, types of data, and analytic procedures, and gives examples and criteria of good practice for each one. It will be essential reading for students and researchers across the social sciences.

**The Ghost That Died at Sunda Strait** Walter G. Winslow, 2012-12-12 Recounting the last stand of the heavy cruiser Houston, this tale of survival brings to life the 1942 battle at Sunda Strait.

Turkey's New Foreign Policy Aaron Stein, 2015-07-16 Turkey's Justice and Development Party (AKP), after coming to power in 2002, sought to play a larger diplomatic role in the Middle East. The AKP adopted a proactive foreign policy to create 'strategic depth' by expanding Turkey's zone of influence in the region, drawing on the opportunities of geography, economic power and imperial history to reconnect the country with its historical hinterland. Yet despite early promise, this policy came undone after the Arab upheavals of 2011 and has seen Turkey increasingly at odds with its neighbours and the West. Turkey's New Foreign Policy outlines the key tenets of the AKP's policy of strategic depth in the Middle East and how this marks a departure from traditional Turkish foreign policy. Particular attention is focused on the Turkish reaction to the political changes that swept through the Arab world – including the Syrian

civil war – and presented Turkey with its most significant foreign-policy challenge to date. Based on extensive primary research of Turkish-language sources, this monograph argues that political changes in the Middle East have precipitated a serious decline in Turkish regional influence, reversing earlier gains in influence after the AKP came to power. However, despite these foreign-policy defeats, the AKP has shown little indication that it is willing to scale back its ambitions, insisting that it stands on the right side of history – drawing a clear distinction between Turkey and the West.

**Seapower** Geoffrey Till, 2018-06-19 This is the fourth, revised and updated, edition of Geoffrey Till's *Seapower: A Guide for the Twenty-first Century*. The rise of the Chinese and other Asian navies, worsening quarrels over maritime jurisdiction and the United States' maritime pivot towards the Asia-Pacific region reminds us that the sea has always been central to human development as a source of resources, and as a means of transportation, information-exchange and strategic dominion. It has provided

the basis for mankind's prosperity and security, and this is even more true in the early twenty-first century, with the emergence of an increasingly globalised world trading system. Navies have always provided a way of policing, and sometimes exploiting, the system. In contemporary conditions, navies, and other forms of maritime power, are having to adapt, in order to exert the maximum power ashore in the company of others and to expand the range of their interests, activities and responsibilities. While these new tasks are developing fast, traditional ones still predominate. Deterrence remains the first duty of today's navies, backed up by the need to 'fight and win' if necessary. How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century. This book investigates the consequences of all this for the developing nature, composition and functions of all the world's significant navies, and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty-first century. Seapower is essential reading for all students of naval power, maritime security and naval history, and highly recommended for students of strategic studies, international security and international relations.

**The Ghost of the Java Coast** Walter G. Winslow, 1974 This is the story of the Houston as told by a naval scout plane pilot who lived through her battles. The author's own experiences are enhanced by accounts from others involved, and by official and unofficial documents ... He sheds light on new evidence supporting the contention that the Houston and other Allied warships inflicted a heavier toll on the Imperial Navy than the Japanese have ever been willing to admit. His reconstruction of the two battles and the earlier Battle of the Flores Sea provides a detailed account of these engagements--Publisher's

description.
