Theory of Ground Vehicles J. Y. Wong, 2001-03-20 An updated edition of the classic reference on the dynamics of road and off-road vehicles As we enter a new millennium, the vehicle industry faces greater challenges than ever before as it strives to meet the increasing demand for safer, environmentally friendlier, more energy efficient, and lower emissions products. *Theory of Ground Vehicles*, Third Edition gives aspiring and practicing engineers a fundamental understanding of the critical factors affecting the performance, handling, and ride essential to the development and design of ground vehicles that meet these requirements. As in previous editions, this book focuses on applying engineering principles to the analysis of vehicle behavior. A large number of practical examples and problems are included throughout to help readers bridge the gap between theory and practice. Covering a wide range of topics concerning the dynamics of road and off-road vehicles, this Third Edition is filled with up-to-date information, including: * The Magic Formula for characterizing pneumatic tire behavior from test data for vehicle handling simulations * Computer-aided methods for performance and design evaluation of off-road vehicles, based on the author's own research * Updated data on road vehicle transmissions and operating fuel economy * Fundamentals of road vehicle stability control * Optimization of the performance of four-wheel-drive off-road vehicles and experimental substantiation, based on the author's own investigations * A new theory on skid-steering of tracked vehicles, developed by the author.

Terramechanics and Off-road Vehicles Jo Yung Wong, 1989 Hardbound. The computer-aided methods presented in this book represent recent advances in the methodology for predicting and evaluating off-road vehicle performance. The mathematical models established for vehicle-terrain systems will enable the engineering practitioner to evaluate, on a rational basis, a wide range of options and to select an appropriate vehicle configuration for a given mission and environment. The models take into account all major design and operational parameters, as well as pertinent terrain characteristics. Applications of the computer-aided engineering methods to the parametric analysis of off-road vehicle design are demonstrated through examples.

Elon Musk Ashlee Vance, 2017-01-24 Elon Musk is an inspirational role model for young entrepreneurs, breaking boundaries and revolutionising the tech-world. He is also the real-life inspiration for the Iron Man series of films, starring Robert Downey Junior. From his humble beginnings in apartheid South Africa, he showed himself to be an exceptionally bright child, and overcame brutal bullying to become the world's most exciting entrepreneur, founding PayPal, SpaceX, Tesla and Solar City. He has emerged as something of a superhero-like figure for today's generation of children. He's not only seen as an entrepreneur in the spirit of a Steve Jobs but as an inventor and bold thinker. He's the guy offering children the possibility of a brighter, more exciting future and has come to symbolize innovation and optimism.

The Trick to Money is Having Some Stuart Wilde, 1995-03-07 Money making is not a serious business. It is a game that you play. At first it may seem that it is a game that you play with forces outside yourself--the economies of the market place so to speak--but as you proceed you discover it is actually a game you play with yourself.--Stuart Wilde. Stuart Wilde's money book, his fifth work, deals with the E.S.P. of easy money and the art of being in the right place at the right time, with the right idea and the right attitude. Like his other highly successful books, this work is full of useful information. His breezy and comical style make for effortless reading, as you plot your path to complete financial freedom.

Global Marketing (First Edition) Johny Johansson, Michael Furick, 2016-01-27 The New Global Marketing: Local Adaptation for Sustainability and Profit discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths and weaknesses and analyze opportunities and risks in foreign markets. It discusses the proper balance between standardization and localization, and addresses the importance of the triple bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, *The New Global Marketing* is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.

Climate Change from a Criminological Perspective Rob White, 2012-06-12 Few would dispute the power of climate change to lead to profoundly destructive weather events. At the same time, the possibility of climate change as a consequence—or even a cause—of criminal events is far less recognized. As the earth grows warmer, issues regarding land use, water rights, bio-security, and food production and distribution will continue to have far-reaching impact, and produce more opportunity for offenses by individuals and groups as well as political and corporate entities. In *Climate Change from a Criminological Perspective*, a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects. Illegal acts are analyzed as they contribute to environmental decline

(e.g., wildlife poaching) or result from ecological distress (e.g., survival-related theft). Regulatory and other interventions are critiqued, concepts of environmental harm refined, and new research methodologies called for. And while individual events described are mainly local, the contributors keep the global picture, and substantial questions about human rights and social relationships, firmly in mind. Topics featured include: Global warming as corporate crime. Climate change and the courts: U.S. and global views. Climate change, natural disasters, and gender inequality. The roles and responsibilities of environmental enforcement networks. A sociocultural perspective on climate change denial. PLUS: instructive in-depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster. A volume of considerable timeliness and vision, *Climate Change from a Criminological Perspective* will be read and discussed, and will inspire action, by researchers in criminology, criminal justice, environmental studies, and related disciplines, as well as policymakers.

Oudry's Painted Menagerie Mary Morton, 2007-06-25 In the 1720s and 1730s, Jean-Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's Painted Menagerie focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been out of public view for more than a century, and it is presented here in its newly conserved state.

Rocket Man Jessica Easto, 2017-02-14 A compilation of inspiring and motivational quotes from Elon Musk, "the world's most remarkable living entrepreneur" (Chris Anderson, curator of TED). Elon Musk, the South African-born entrepreneur who made his first fortune with Internet companies such as PayPal, has risen to global prominence as the visionary CEO of both Tesla Motors and SpaceX, two companies with self-proclaimed missions to improve life as we know it and better secure the future of humanity. For the first time, the most insightful, thought-provoking, and revealing quotes from this entrepreneurial engineer have been compiled into a single book. *Rocket Man: Elon Musk in His Own Words* is a comprehensive guide to the inner workings of the man dubbed "the real Tony Stark." Hundreds of his best quotes, comprising thoughts on business, clean energy, innovation, engineering, technology, space, electric vehicles, entrepreneurship, life lessons, and more, provide an intimate and direct look into Silicon Valley's most ambitious industrialist. How could a young man who at one time seemed like "just" another Internet entrepreneur have gone on to build two highly disruptive companies and innovate technologies related to everything from electric batteries to rocket manufacturing? There's no better way to learn than through his own words. This book curates Musk quotes from interviews, public appearances, online postings, company blogs, press releases, and more. What emerges is a "word portrait" of the man whose companies' swift rise to the top will undoubtedly keep their status-quo competitors scrambling to keep up.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

A Thrilling Race Patricia Harris, 2017-07-15 It's race day at Mr. Fred's racetrack. Who will win? This fast-paced story puts young readers in the driver's seat as Mary Ann and her friends zoom around the track. Basic concepts such as opposites and colors are introduced in this exciting fiction book, which accompanies the HABA game Monza. Readers will also learn about teamwork, problem solving, and the importance of being a good sport regardless of whether they win or lose. Age-appropriate text and colorful illustrations make this an enjoyable book for both emerging readers and younger listeners.

Slave Stealers Timothy Ballard, 2018 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day underground railroad which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The Conductor; Abraham Lincoln--the Great Emancipator; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
