The Grand Strategy of the Byzantine Empire Edward Luttwak,2009-11 In this book, the distinguished writer Edward Luttwak presents the grand strategy of the eastern Roman empire we know as Byzantine, which lasted more than twice as long as the more familiar western Roman empire, eight hundred years by the shortest definition. This extraordinary endurance is all the more remarkable because the Byzantine empire was favored neither by geography nor by military preponderance. Yet it was the western empire that dissolved during the fifth century. The Byzantine empire so greatly outlasted its western counterpart because its rulers were able to adapt strategically to diminished circumstances, by devising new ways of coping with successive enemies. It relied less on military strength and more on persuasion—to recruit allies, dissuade threatening neighbors, and manipulate potential enemies into attacking one another instead. Even when the Byzantines fought—which they often did with great skill—they were less inclined to destroy their enemies than to contain them, for they were aware that today's enemies could be tomorrow's allies. Born in the fifth century when the formidable threat of Attila's Huns were deflected with a minimum of force, Byzantine strategy continued to be refined over the centuries, incidentally leaving for us several fascinating guidebooks to statecraft and war. The Grand Strategy of the Byzantine Empire is a broad, interpretive account of Byzantine strategy, intelligence, and diplomacy over the course of eight centuries that will appeal to scholars, classicists, military history buffs, and professional soldiers.

The Crimean War Winfried Baumgart,2020-01-09 Winfried Baumgart's masterful history of the Crimean War has been expanded and fully updated to reflect advances made in the field since the book's first publication. It convincingly argues that if the war had continued after 1856, the First World War would have taken place 60 years earlier, but that fighting ultimately ceased because diplomacy never lost its control over the use of war as an instrument in power politics. With 19 images, 13 maps and additional tables as well as a brand new chapters on 'the medical services', this expanded and fully-updated 2nd edition explores * The origins and diplomacy of the Crimean War * The war aims and general attitudes of the belligerent powers (Russia, France, and Britain), non-belligerent German powers (Austria and Prussia) and a selected number of neutral powers, including the United States * The characteristics and capabilities of the armies involved * The nature of the fighting itself The Crimean War: 1853-1856 examines the conflict in both its Europe-wide and global contexts, moving beyond the five great European powers to consider the role and importance of smaller states and theatres of war that have otherwise been under-served. To this end, it looks at fighting on the Danube front, the Black Sea, the Baltic Sea, the Caucasian battlefield, as well as the White Sea and the Pacific, with final chapters devoted to the Paris peace congress of 1856, the end of the war and its legacy. This book remains the definitive study of one of the most important wars in modern history.

Rebuilding the Royal Navy D. K. Brown, George Moore, 2012-07-30 This design history of post-war British warship development, based on both declassified documentation and personal experience, is the fourth and final volume in the author's masterly account of development of Royal Navy's ships from the 1850s to the Falklands War. In this volume the author covers the period in which he himself worked as a Naval Constructor, while this personal knowledge is augmented by George Moore's in-depth archival research on recently declassified material. The RN fleet in 1945 was old and worn out, while new threats and technologies, and post-war austerity called for new solutions. How designers responded to these unprecedented challenges is the central theme of this book. It covers the ambitious plans for the conversion or replacement of the bigger ships; looks at all the new construction, from aircraft carriers, through destroyers and frigates, to submarines (including nuclear and strategic), to minesweepers and small craft. The authors pay particular attention to the innovations introduced, and analyses the impact of the Falklands War. At the start of the twenty-first century the Royal Navy is still a powerful and potent force with new and a number of innovative classes, both surface and sub-surface, coming on stream. This book offers a fascinating insight into how the post-war fleet developed and adapted to the changing role of the Navy.

Literary Studies in Reconstruction Marko Juvan, 2011 The identity and relevance of literary studies require a conceptual and institutional reconstruction in response to the global reshaping and commodification of knowledge. The author thus proposes a theory of literary discourse and literary history that take into account literariness as an important socio-cultural phenomenon and revisits several critical concepts, such as world literature, literary text, genre, style, fiction, literary space, and cultural memory.
