Spetsnaz Viktor Suvorov,1988 For anyone who is interested in the true military capability of the Soviet Union, this book is essential reading. The author, once an officer in the GRU, the military intelligence agency that trains spetsnaz agents, tells of his experiences training Soviet men for an unlimited range of tasks.

Spetsnaz Viktor Suvorov,1989

Combat Vehicles of Russia's Special Forces Mark Galeotti,2020-05-28 An illustrated study of both the combat vehicles of Russia's legendary Spetsnaz special forces and the whole range of unique and modified vehicles that Russia's elite units use, from combat snowmobiles to the world's biggest water-cannon. Elite forces need elite vehicles. As Vladimir Putin has devoted effort and funds into modernising Russia's armed forces and turning them into an instrument geared not just for defending the Motherland but also projecting power beyond its borders, Russia has seen a growing emphasis on special and specialist forces. Traditionally, the elite Spetsnaz commandos had to make do with regular vehicles or civilian-based 'technicals', not least to conceal their presence (or, indeed, very existence). Now, increasingly at the forefront of Russian power projection, the Spetsnaz are acquiring more capable, versatile vehicles, such as the paratroopers' BTR-D personnel carrier, and also experimenting with exotic, specialist new acquisitions, such as the Chaborz M-3 buggy and Yamaha Grizzly all-terrain vehicle. The other elite branches of Russia's forces, such as the Arctic-warfare troops of the 200th Independent Motor Rifle Brigade, the paratroopers of the Air Assault Troops (VDV), the Naval Infantry, and the elite units of the security forces are also developing and fielding new vehicles for their specialist roles, from combat snowmobiles to urban-warfare vehicles. From highly-mobile LMVs able to operate in the deserts of Syria or the streets of Ukraine, through dedicated fire-support vehicles such as the air-droppable Sprut-SD or the massive BMPT 'Terminator', to amphibious tanks and drone-equipped security trucks, these are the workhorses of Russia's special forces. This study explores all these combat vehicles in detail, combining expert analysis from Russia expert Mark Galeotti with highly accurate full-colour illustrations and photographs.

The Russian Elite Carey Schofield,1993 Russiske elitetropper og deres indsats i Afghanistankrigen. Om de russiske elitetropper fra Sovjetunionens flyvevåben, deres historie, opbygning og deltagelse i krige siden den 2. verdenskrig med særlig vægt på Afghanistankrigen (1980-1989). Med russisk-engelsk ordliste, oversigtstavler, og korte biografier over nøglepersoner i Spetsnaz

The Soviet Army Department of the Army,2019-07-19 The Soviet Army: Operations and Tactics FM 100-2-1 This field manual is part of FM series 100-2, The Soviet Army. The other volumes are FM 100-2-2, The Soviet Army: Specialized Warfare and Rear Area Support, and FM 100-2-3, The Soviet Army: Troops, Organization and Equipment. These manuals cannot stand alone, but should be used interchangeably. These field manuals serve as the definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare. These manuals represent the most current unclassified information and they will be updated periodically. More information would become available in the event of war or national emergency. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some

pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Badenheim Nineteen-thirty-nine Aharon Apelfeld,1980 A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but Badenheim and its summer residents go about life as normal.

The Soviet Army Department of the Army,2018-06-12 This is a reproduction of the 1984 Department of the Army Field Manual 100-2-2 (The Soviet Army: Specialized Warfare and Rear Area Support). In its day, it - along with its sister publications FM 100-2-1 and 100-2-3 - was the definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare. St. Michael Publishing House has re-printed these so that the military scholar and student of history may learn from other nation's way of war.
