Paper Toys Francois Chetcuti,2008 This extraordinary construction kit contains eight different models to build yourself from a delightful car with driver to a pop-up monster or a plane with propeller. There are perforated construction sheets for each figure and additional material, including wooden sticks, rubber bands and beads, and an extensive manual with detailed step-by-step illustrations. Even non-experts will be able to build these papertoys models. The colorful results will delight not only children. The models have been lovingly created and include ingenious mechanisms: when you push the car, the driver and his luggage sway amusingly from side to side, caused by clever positioning of the rear axle. The doll moves gracefully at the slightest breath of wind, and the clown's facial expression changes when you turn the wooden stick.
