The Saab 37 Viggen ,1970

SAAB 37 Viggen Walk Around - Op Mikhail Putnikov,2013 For the 30 years the Saab 37 Viggen thundered over Sweden, a resolute Cold War deterrent against any potential aggression. Named for the thunderclap that resounded when the god Thor banged his hammer, and developed to replace the Saab 32 Lansen as an attacker and Saab 35 Draken as a fighter, Viggen was designed as a multirole combat aircraft capable of performing fighter, strike and reconnaissance duties. Saab adopted a novel and extremely advanced aerodynamic configuration of a main delta wing combined with delta-shaped foreplanes. Viggen became the first canard-equipped military aircraft to enter production since aviation's 'stick-and-string' days. Viggen easily met the strict Swedish Air Force specification of combat operations from 500-meter runways and public roads - a performance standard that few other attack jets in the world could equal. Significantly, the Viggen was the first aircraft to be equipped with both afterburner and reverse thrust. Continually upgraded during its career, the Viggen produced a number of variants, including a two-seater trainer as well as photo-reconnaissance, ground-attack, and all-weather interceptor versions, which came to an end with the last Viggen flight in Swedish military service in June 2007. This volume contains photos seen here for the first time, as well as detailed drawings based on original Saab technical manuals.

Outstanding among the few publications in the world devoted to Saab 37, this book will be of interest to modelers and aircraft enthusiasts alike. Illustrated with 196 photographs, color profiles and numerous line drawings.

The Fighting Colours of Richard J. Caruana. 50th Anniversary Collection. 1. Saab 37 Viggens

Richard J. Caruana,2021-06-30 Internationally renown aviation artist and historian Richard J. Caruana provides a tribute to an often under-appreciated aviation legend, the Saab 37 Viggens, an aircraft that was ahead of its time on many fronts. Richard's book provides a brief history of the aircraft combined with an exceptional collection of over 56 color profiles showing schemes worn by Viggens operationally, as well as the special celebratory schemes that became so familiar towards the end of its career. Each profile is accompanied by a detailed caption and a brief operational history. A page of detailed scale drawings illustrates and explains the different versions of the Viggens and another page illustrates unit markings worn by the type as illustrated in the profiles of the book.

Saab Viggens Robert F. Dorr,1985-01-01 Udover at beskrive Viggens, dets udvikling og anvendelse indeholder bogen et afsnit om forgængerens Draken.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

B-2A Spirit Units in Combat Thomas Withington, 2012-11-20 The B-2A 'Spirit' was an aircraft conceived to fight the Cold War but which has proved invaluable to both the 'New World Order' and more recently the 'War on Terrorism'. The combination of low-observability, precision strike, range and payload flexibility has made the 'Spirit' the weapon of choice when America hits its enemies at the start of a campaign. Spirits have fired the first shots of Operation 'Allied Force' over Kosovo and

Serbia, as well as operations 'Enduring Freedom' and 'Iraqi Freedom'. Despite the tremendous cost of the aircraft – each unit is literally worth its weight in gold – the B-2 has had an impact on modern warfare which has vastly exceeded this small force of 21 bombers. Developed in utmost secrecy, the B-2's gestation saw the use of new computer design and manufacturing techniques and ultra-modern synthetic materials making it the most revolutionary aircraft in terms of design and performance. This book examines these incredible aircraft.
